

Newsletter
Issue 131

Issue 131 - 14.10.2002

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week. Visit Help Net Security for the latest security news.

***** ALERT! *****

ALL OF THE FOLLOWING APPLICATIONS ARE VULNERABLE TO ATTACK!:

*** Oracle

*** Microsoft SQL Server

*** Sybase

*** Lotus Domino

QUESTION: How Vulnerable are Your Applications?

ANSWER: Find out by downloading AppDetective from:

***** <http://www.appsecinc.com/products/#pentest>

AppDetective will DISCOVER Rogue Installations; Perform Zero Knowledge PENETRATION TESTS without Administrative Rights; and Perform In-Depth SECURITY AUDITS from the Inside-Out without Agents.

DOWNLOAD YOUR FREE EVALUATION VERSION TODAY FROM:

<http://www.appsecinc.com/products/#pentest>

Table of contents:

- 1) Security news
- 2) Vulnerabilities
- 3) Advisories
- 4) Articles
- 5) Security world
- 6) Security software
- 7) Virus news

[General security news]

VIRUS WRITERS GET SLAPPER HAPPY

Internet vandals have continued to modify the recent Slapper worm and have sent at least four new variants of the hostile Linux program into the electronic wilds.

>> <http://www.net-security.org/news.php?id=1178>

RUSSIAN HACKER SENTENCED TO 3 YEARS

A Russian man snared in an FBI scheme to catch computer hackers has been sentenced to three years in prison for convictions on 20 counts of conspiracy, fraud and related computer crimes.

>> <http://www.net-security.org/news.php?id=1179>

HACKWARE AUTHOR ARRESTED - MAYBE

A group whose chat network took hits from a hacker known as Torner applauds his London arrest. But no one's certain that the man in custody is the one who wrote the hacking toolkit used in the attacks.

>> <http://www.net-security.org/news.php?id=1180>

CONFIGURING FIREWALLS FOR LINUX USING NETFILTER/IPTABLES

The author provides an introduction to the netfilter/iptables system, how it works, its advantages, installing and configuring, and how to use it to configure firewalls on Linux systems to filter IP packets.

>> <http://www.net-security.org/news.php?id=1181>

SECURITY TOOLS IN LINUX DISTRIBUTIONS, PART I

In part one of this two-part series, Bobby discusses various HIDS and NIDS that come with Red Hat distributions.

>> <http://www.net-security.org/news.php?id=1182>

SECURITY TOOLS IN LINUX DISTRIBUTIONS, PART II

The second part of this series is an overview of tools included in SuSE distributions for hardening, monitoring and securing your system.

>> <http://www.net-security.org/news.php?id=1188>

FIXING THE FBI'S 'TOP 20' SECURITY FLAWS ISN'T ENOUGH

The U.S. FBI's top-20 list of software vulnerabilities provides a solid foundation for IT security. But you need to do more than just protect against these flaws alone.

>> <http://www.net-security.org/news.php?id=1183>

OPASOFT TARGETS WINDOWS SYSTEMS

Opasoft worm that targets machines running Microsoft's Windows 95, 98, and ME operating systems is spreading according to virus alerts posted by several antivirus companies.

>> <http://www.net-security.org/news.php?id=1184>

MALAYSIA REFUTES ORIGIN OF BUGBEAR VIRUS

Denying reports of the Bugbear virus's origin in Malaysia, cyber detectives of this region said that there is no proof to support the allegation.

>> <http://www.net-security.org/news.php?id=1185>

BUGBEAR TO SET NEW VIRUS RECORD

The virus is spreading a bit more slowly than last week, but is still on track to become the most prolific to date.

>> <http://www.net-security.org/news.php?id=1189>

DOD'S WIRELESS SAFETY NET

A Defense Department policy provides a workable strategy for eventually allowing the use of wireless communications within the Pentagon without compromising security.

>> <http://www.net-security.org/news.php?id=1190>

SPAM BLOCKER HAS OPPOSITE EFFECT

Satisfied users of junk e-mail filter SpamNet protest loudly when unsolicited messages suddenly flood their inboxes. The problem? System "upgrades" - and the widespread UUNet failure.
>> <http://www.net-security.org/news.php?id=1191>

FEDS PROBE DIGITAL TV PIRACY FUROR

The Justice Department is investigating allegations that a company controlled by Rupert Murdoch's News Corp. hacked a rival's protection technology and distributed the information on the Internet.
>> <http://www.net-security.org/news.php?id=1192>

IMPROVE LINUX SECURITY

Although Linux's native support for networking services is part of the OS's appeal, these services can also create a security risk. Stop unnecessary network services.
>> <http://www.net-security.org/news.php?id=1193>

SHUTTING DOWN SPYWARE LOOPHOLES

A recent court decision against AOL Netscape finally puts some limits on the clickwrap contracts that make spyware legal.
>> <http://www.net-security.org/news.php?id=1194>

FIREWALLS - BACK TO BASICS

The most frequently asked questions (and answers) about Firewalls without the frills.
>> <http://www.net-security.org/news.php?id=1198>

UNIVERSITY TO STUDY COMBATING CYBERTERROR

The Defense Department is giving Carnegie Mellon University \$35.5 million to develop tools and tactics for fighting cyberterrorism.
>> <http://www.net-security.org/news.php?id=1199>

USING HONEYPOT WIRELESS LAN

The busiest journalist at the RSA Conference 2002, Peter Judge from ZDNet UK, did an article on another war* action - "wartrapping".
>> <http://www.net-security.org/news.php?id=1201>

HACKER BOOK AUTHOR: COMPANIES TOO STINGY ABOUT SECURITY

The author of a book on network security warns that most companies aren't spending enough money to adequately protect themselves and most IT administrators are out of control of their own networks.
>> <http://www.net-security.org/news.php?id=1202>

VOIP: DON'T OVERLOOK SECURITY

Corporations that are implementing VOIP technologies in a bid to cut communications costs shouldn't overlook the security risks that can crop up when the voice and data worlds converge.
>> <http://www.net-security.org/news.php?id=1205>

FBI MEMO DETAILS SURVEILLANCE LAPSES IN TERROR, SPY CASES

FBI agents illegally videotaped suspects, intercepted e-mails without court permission and recorded the wrong phone conversations during sensitive terrorism and espionage investigations.

>> <http://www.net-security.org/news.php?id=1207>

VIRUS THREATS ON MOBILE TOOLS

Handhelds are not yet targets for hostile code writers, but that will soon change.

>> <http://www.net-security.org/news.php?id=1208>

MOZILLA'S 'CODE OF SILENCE' ISN'T

Developers are accused of not publicizing the browser's security vulnerabilities enough. But do we really need world wide alerts for every bug?

>> <http://www.net-security.org/news.php?id=1209>

LIGHT MAY BE KEY TO SAFEGUARDING SECRETS

Advances in devices that emit the smallest possible amount of light may portend an era of guaranteed confidentiality in Digital Age communication, which until now has had almost no protection.

>> <http://www.net-security.org/news.php?id=1210>

GUIDE TO INTRUSION PREVENTION

Diverse security technologies deliver the same message: "Keep Out!"

>> <http://www.net-security.org/news.php?id=1211>

ATTACHMENTS CAN CAUSE SEVERE DAMAGE

FWD: FWD: FWD: Read Now! - How many times have you opened your e-mail inbox and found a similar message waiting for you?

>> <http://www.net-security.org/news.php?id=1212>

VIRUSES ATTACK RAMPANT

At least 80% of computers in China have been affected by viruses, which increasingly spread through file downloading and Internet surfing.

>> <http://www.net-security.org/news.php?id=1213>

LIE DETECTORS DO TELL LIES TOO...

In routine security screening, polygraph tests often mark innocent people as lying but miss actual security risks, says panel.

>> <http://www.net-security.org/news.php?id=1214>

BUG WATCH: THE PRIMITIVE PROBLEM OF PASSWORDS

Recent security breaches have highlighted the inadequacy of passwords as a means of securing sensitive information, says Baltimore's Stephen Byrne.

>> <http://www.net-security.org/news.php?id=1218>

FINGERPRINTING EXPLOITS IN SYSTEM AND APPLICATION LOG FILES

This article focuses on the identification of the footprints that exploits leave on system logfiles and what they mean, as well as some of the most common traces that some recent exploits leave.
>> <http://www.net-security.org/news.php?id=1219>

CYBERCRIME VICTIMS HIT BACK

As Web thieves get slicker, frustrated consumers are taking matters into their own hands to block further damage.
>> <http://www.net-security.org/news.php?id=1220>

IS LINUX REALLY MORE SECURE THAN WINDOWS?

Microsoft has organized a huge security program as a result of vocal complaints from users, while the Linux effort is, in Eric Hemmendinger's words, "less disciplined but more timely."
>> <http://www.net-security.org/news.php?id=1221>

PRACTICAL LINUX SECURITY

Developer Cameron Laird outlines strategies for keeping different types of users organized for secure account management.
>> <http://www.net-security.org/news.php?id=1222>

PROGRAMMING PHP WITH SECURITY IN MIND

Writing code that prevents some common types of attacks is rather easy - here are some guidelines.
>> <http://www.net-security.org/news.php?id=1223>

APACHE LOG ANALYSIS USING PYTHON

This article first explains the framework, and then describes two examples that use it. My hope is that by the end of this article you will be able to use this framework for analyzing your own text files.
>> <http://www.net-security.org/news.php?id=1224>

AFTER SCHOOL SCAM

A group of Long Island high-school students ran a cyber-fraud operation by using computers at a bank where they were interns.
>> <http://www.net-security.org/news.php?id=1225>

PGP 8.0 PUBLIC BETA AVAILABLE FOR DOWNLOAD

PGP 8.0 Public Beta is now offered for download. Two versions are available for your beta testing pleasures: PGP 8.0 for Windows Beta and PGP 8.0 for Mac OS X Beta.
>> <http://www.net-security.org/article.php?id=207>

SECURITY INCIDENT ALERT

43,136 security incidents have been reported through June, 2002. Last year 52,658 were reported for the entire year. The most common point of entry is exploitation of known operating system vulnerabilities.

Check your Web servers, FTP servers, Mail servers, DNS servers, firewalls, IDS systems, switchers and routers for over 900 up to date vulnerabilities. Secure your critical assets today!

FREE System Security Test and Detailed Report

[Security Software]

Windows software is located at:
http://net-security.org/software_main.php?cat=1

Linux software is located at:
http://net-security.org/software_main.php?cat=2

CRYPTOEXPERT 2003 2.01.01
CryptoExpert uses an on-the-fly encryption system to encrypt and decrypt data. Data is stored in the encrypted form, but when it is requested by any application, it gets decrypted on-the-fly.
>> <http://www.net-security.org/software.php?id=305>

ACSV 1.0.0

The handy and fast program with an clear interface for calculation and verifying the MD5 and CRC32 checksums of files in specified folder.

>> <http://www.net-security.org/software.php?id=306>

FIREHOL R5 1.6

FireHOL is a Linux iptables firewall generator. It's goal is to be extremely abstracted so that the administrators can design firewalls of any complexity without the need to know all the details about protocols, sockets, ports, etc.

>> <http://www.net-security.org/software.php?id=307>

TINYCA 0.4.4

TinyCA is a simple graphical userinterface written in Perl/Tk to manage a small CA (Certification Authority).

>> <http://www.net-security.org/software.php?id=308>

RATEMASK 1.0.0

Ratemask is a small program that will make it easier to create ICMP type masks, as used in the icmp_ratemask sysctl, viewable through the /proc filesystem.

>> <http://www.net-security.org/software.php?id=309>

IPSHUTTER 0.2

IPShutter listens for connections on one port, and upon proper authentication temporarily unlocks a second port. The unlocking is brief (by default two minutes) and only applies to the IP address from which the authentication occurred.

>> <http://www.net-security.org/software.php?id=310>

BITDEFENTER ANTIOPASERV

This easy to use tool detects and removes the Opaserv virus from your system.

>> <http://www.net-security.org/software.php?id=311>

MMFTPD 0.0.11

mmftpd is a secure FTP server that runs as a normal user, and supports virtual users only. Each user may have specific permissions, including the maximum home directory size limit and download/upload speeds.

>> <http://www.net-security.org/software.php?id=312>

PASSWORDS PLUS 3.68

Passwords Plus allows an unlimited number of users* to each keep an individual password-protected encrypted list of their passwords.

>> <http://www.net-security.org/software.php?id=313>

FIREPARSE 2.0

Fireparse is a Perl script that emails a report of all packets that have been logged by the kernel's ipchains or iptables packet

filtering subsystems.

[Winners Announcement]

The winners of the latest HNS Book Contest have been chosen. The lucky ones are:

Mislav Gluscevic
Anne Carasik
Abraham Lincoln Hao
Jason Beauford
Wael Ghandour
Pieter Swart
Paul Laudanski
Teemu Suopelto

A big thanks goes to Addison Wesley to making this contest possible.
