

HNS Newsletter

Issue 157 - 14.04.2003.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week. Visit Help Net Security for the latest security news - <http://net-security.org>.

ALERT: How a Hacker Launches a SQL Injection Attack - Step-by-Step!

It's as simple as placing additional SQL commands into an input box on a web form giving hackers complete access to all your backend data! Firewalls and IDS will not stop SQL Injection attempts because they are NOT seen as intrusions.

Download this *FREE* white paper from SPI Dynamics for a complete guide to protection!

[**Security news**]

MICROSOFT MAKES A GOOD ARGUMENT FOR OPEN SOURCE

It's very hard for me to swallow the idea that Microsoft is unable to come up with a patch for the system. The company has legions of programmers and billions of dollars in the bank.
>> <http://net-security.org/news.php?id=2313>

FEAR OF A MILLION BIG BROTHERS

The U.S. government's surveillance push isn't the only thing on the minds of privacy advocates this year. Concern is growing about the trails netizens leave in routine Web server logs, and who's seeing them.
>> <http://net-security.org/news.php?id=2314>

SECURING LINUX FOR JAVA SERVICES

Enterprise Java expert Dennis Sosnoski starts with his view of how Java server technologies fit with Linux, then gives pointers on setting up the Tomcat Java servlet engine on Linux - securely.
>> <http://net-security.org/news.php?id=2315>

THE TRAILS LEFT IN WEB SERVER LOGS - AND WHO'S SEEING THEM

The privacy advocates and civil libertarians at the 13th annual Computers, Freedom and Privacy conference sometimes seem dwarfed by the enormity of the projects they oppose.
>> <http://net-security.org/news.php?id=2317>

ONLINE SECURITY WEEK AIMS TO EDUCATE

The online security week run by eBucks.com begins this week. The aim of the week is to educate consumers about online banking to improve security and break stigmas associated with the medium.
>> <http://net-security.org/news.php?id=2318>

HACKERS CRACK UK WIRELESS NETWORKS

Insecure wireless networks across London are being exploited by hackers on a daily basis exposing businesses to cyber attacks, research by RSA Security revealed today.
>> <http://net-security.org/news.php?id=2323>

ANYONE CAN BE A GOOGLE "HACKER"

What most of us know about computer hacking we learn from movies, and of course the moviemakers know nothing.
>> <http://net-security.org/news.php?id=2324>

CHEAP IP TAKEOVER

Accomplish IP takeover with ping, bash, and a simple network utility.
>> <http://net-security.org/news.php?id=2325>

E-MAILMAN TURNS AWAY SPAMMERS

Geller said WhatCounts' mailings are sometimes confused with spam. But the company requires customers to guarantee they'll send e-mail only to people who have requested it.

>> <http://net-security.org/news.php?id=2326>

FIREWALLS TO BE DRAWN BETWEEN INDUSTRY, FINANCE

The Fair Trade Commission (FTC) yesterday made it clear that a strict firewall will be set up between industrial giants and their financial subsidiaries in a move to prevent conglomerates from abusing financial units for business expansion and controlling the business arms.

>> <http://net-security.org/news.php?id=2327>

SECURITY START-UP TO BLOCK TROJANS

Start-up WholeSecurity debuts this week with Web server software designed to prevent remote-access Trojans or eavesdropping software from penetrating networks during e-commerce or employee interactions over the Internet.

>> <http://net-security.org/news.php?id=2328>

SYMBOL TECH. ENHANCES WIRELESS SECURITY ON HANDHELDS

Symbol Technologies today announced that it has integrated the Federal Information Processing Standard for cryptography (FIPS 140-2) into its line of wireless mobile computing devices.

>> <http://net-security.org/news.php?id=2329>

HARDWARE-BASED SSL CERTIFICATES

VeriSign and hardware encryption specialist nCipher are coming to market with hardware-based SSL Certificates, designed to boost protection against online data theft and Web site spoofing.

>> <http://net-security.org/news.php?id=2331>

PDA SECURITY 101

Users are increasingly relying on PDAs to check e-mail, surf the Web, and a variety of other tasks. When you use PDAs for online tasks they become just as vulnerable as desktop systems to viruses, mobile code exploits, and other threats. What should organizations do to make keep their PDA users safe from the threats of the Internet?

>> <http://net-security.org/news.php?id=2332>

WLAN SECURITY: REDUCING THE RISKS

Therein lies the Wi-Fi rub. Even as enterprises equip their employees with Smartphones, PDAs, and wireless laptops, the data traversing the wireless LAN can be intercepted all too easily.

>> <http://net-security.org/news.php?id=2333>

ISS REVISES SECURITY INCIDENT NUMBERS

Internet Security Systems on Monday revised its take on the increase in security incidents and attacks to account for an error introduced in a report TechWeb reported last Friday.

>> <http://net-security.org/news.php?id=2335>

HOST INTRUSION-PREVENTION SOFTWARE MARKET EXPECTED TO GROW

The increasing threat of virus and hacker attacks is expected to drive the market for security software that acts as a gate to a computer's operating system kernel.

>> <http://net-security.org/news.php?id=2336>

POINT-TO-POINT ENCRYPTION FOR PRESERVING PRIVACY

This article describes a simple method of encrypting traffic as it travels across a potentially hostile LAN.

>> <http://net-security.org/news.php?id=2339>

TOP FIVE VIRUS PROTECTION TIPS

Keep yourself virus-free or you may face some crippling computer hassles.

>> <http://net-security.org/news.php?id=2340>

INSIDE THE WORLD OF SECURE OPERATING SYSTEMS

On a normal system, if an attacker gains root or administrator access, he or she can run rampant. Not so on a trusted system - at least so long as it is properly configured.

>> <http://net-security.org/news.php?id=2342>

LINUX SHADOW PASSWORD HOWTO AUTHOR DIES AT AGE 38

Mike Jackson, Linux Shadow Password HOWTO author, passed away on Friday, March 28th at the young age of 38. The Linux community has lost a great friend and advocate.

>> <http://net-security.org/news.php?id=2343>

SPECTER: A COMMERCIAL HONEYPOT SOLUTION FOR WINDOWS

In this paper we will look at a different honeypot, the commercially supported solution, Specter.

>> <http://net-security.org/news.php?id=2344>

SUN TOUTS NEW SECURITY SOFTWARE PACKAGE: TRUSTED SOLARIS

Sun Microsystems will begin offering a security software package to commercial customers that was originally developed for military and government intelligence use.

>> <http://net-security.org/news.php?id=2345>

WORLD'S MOST STUPID SECURITY MEASURES NAMED AND SHAMED

Privacy International today announced the results of its competition to find the world's most pointless security measures.

>> <http://net-security.org/news.php?id=2346>

ROLLING YOUR OWN FIREWALL

How to use Pebble, a Debian-lite distribution, to get your homemade firewall up and running.

>> <http://net-security.org/news.php?id=2347>

NEW WIRELESS SECURITY: WHY YOU SHOULD USE IT

While wireless networks continue to become more affordable and easier to set up, many users (as well as many companies) still have little regard for just how insecure those networks are.

>> <http://net-security.org/news.php?id=2348>

ANTISPAM ACTIVIST CLAIMS COURT VICTORY

An antispam activist who posted a purported spammer's contact information on his Web site is claiming a legal victory.

>> <http://net-security.org/news.php?id=2349>

DIGITAL DEFENSE REGRETS SAMBA DISCLOSURE

Digital Defense apologizes for prematurely disclosing the code needed to take advantage of a serious vulnerability in open source file-sharing program.

>> <http://net-security.org/news.php?id=2350>

NOKIA TO DETAIL E-MAIL SECURITY SCHEME AT CONFERENCE

Nokia's Internet Communications Division will release first details on it's Message Protector architecture at the RSA Security Conference in San Francisco.

>> <http://net-security.org/news.php?id=2351>

SECURITY HOLES: PATCH AND PRAY?

IT pros know firsthand the pain of patching vulnerable software. With bulletins coming as frequently as once every five days or up to 80 times a year (depending on the study), they may feel as if they're drowning in a sea of notifications.

>> <http://net-security.org/news.php?id=2352>

PORTING THE PF STATEFUL PACKET FILTER

The upcoming release of OpenBSD 3.3 on May 1'st will include, among many other improvements, a notably enhanced version of PF, OpenBSD's stateful packet filter.

>> <http://net-security.org/news.php?id=2353>

US ARMY BUYS VIRUS BLOCKER

The Army's Chief Technology Office is using a trio of products from Trend Micro to help protect the more than 1.1 million Army Knowledge Online (AKO) users from viruses, malicious content and spam.

>> <http://net-security.org/news.php?id=2358>

US GOVT. MOVING TOO SLOWLY ON CYBERSECURITY

President Bush's former cybersecurity adviser came out swinging in testimony before Congress this week, saying that the Department of Homeland Security is moving too slowly to safeguard the nation's information infrastructure.

>> <http://net-security.org/news.php?id=2359>

INTERNET FRAUD COMPLAINTS TRIPLED IN 2002

Fraud on the Internet rose sharply in 2002, with the FBI

reporting more than 48,000 complaints referred to prosecutors
- triple the number of the year before.
>> <http://net-security.org/news.php?id=2360>

RESEARCHERS INFILTRATE DENIAL OF SERVICE NETWORKS

Security researchers have been infiltrating denial of service 'botnets' in order to study a remarkably affective Distributed Denial of Service (DDoS) technique.
>> <http://net-security.org/news.php?id=2361>

ENCRYPTION, HASHING, AND OBFUSCATION

Encryption and one-way hashing have been part of passive-data protection for many years. With the advent of dynamically-linked, intermediately-compiled languages such as Java and C#, the research into obfuscation is sure to increase.
>> <http://net-security.org/news.php?id=2362>

GETTING TO KNOW FREEBSD 5.0

Here's an overview of FreeBSD 5.0. The author of the article notes: "Speed and stability are two keywords that describe FreeBSD with great accuracy."
>> <http://net-security.org/news.php?id=2363>

INTERNAL THREATS: KEEP AN EYE ON THE BACK DOOR

Systems are far more susceptible to internal threats than most companies realise. From a security point of view, businesses tend to overlook this aspect and concentrate on guarding against external threats.
>> <http://net-security.org/news.php?id=2364>

HOAXSTER HACKER DISCOVERS INFINITE -WEALTH ALGORITHM

Hacker stunt-double and convicted financial fraudster Kim Schmitz (aka Kimble) is up to his old tricks, this time with a package of techno trickery for making a killing in the stock market.
>> <http://net-security.org/news.php?id=2365>

PHYSICAL AND TECH SECURITY SHOULD MERGE

Enterprises need closer collaboration between their physical and IT security teams in order to cut costs and improve communications.
>> <http://net-security.org/news.php?id=2367>

COMPANIES JUST HAVE TO SPEND ON SECURITY, SAYS DATAPRO

In today's digital economy, where knowledge and information based business is what it is all about, the need to establish and maintain high levels of security has never been more imperative - and this importance is only going to increase.
>> <http://net-security.org/news.php?id=2368>

STEGANOGRAPHY REVEALED

This article will offer a brief introductory discussion of

steganography: what it is, how it can be used, and the true implications it can have on information security.
>> <http://net-security.org/news.php?id=2369>

ACLU LOSES FIRST DMCA CHALLENGE
The American Civil Liberties Union on Wednesday lost its first attempt to challenge a controversial 1998 copyright law.
>> <http://net-security.org/news.php?id=2370>

NEW CHARGES OVER WEB BANK SCAM
Eleven new charges relating to a \$27,840 swindle in which users of an online banking site were persuaded to send their security passwords to an imposter were laid in court yesterday.
>> <http://net-security.org/news.php?id=2373>

GARTNER TIPS TOP 11 CYBERTHREAT ISSUES
Gartner said 11 looming issues should compel companies to dig through the promotional tip - and each came with its own bugbears.
>> <http://net-security.org/news.php?id=2374>

NEW YORKERS FACE OFF IN SPAM SPAT
A new anti-spam law pending in New York would fine senders of unsolicited e-mail sales pitches up to \$500 for each message. The insurance industry says the bill gives ISPs too much power, and could prevent insurers from sending "important e-mail" to their customers.
>> <http://net-security.org/news.php?id=2375>

TECH ON PRIVACY: OFFENDER OR DEFENDER?
Although modern technology created many of society's most pressing threats to privacy, a group of researchers is out to prove that it is also the greatest defender of civil liberties.
>> <http://net-security.org/news.php?id=2376>

FEW TAKERS FOR SECURITY OUTSOURCING
As one analyst group predicts a boom in outsourcing, another says that few firms are prepared to hand over the security of their IT systems.

ALERT: How a Hacker Launches a SQL Injection Attack - Step-by-Step!

It's as simple as placing additional SQL commands into an input
box on a web form giving hackers complete access to all your
backend data! Firewalls and IDS will not stop SQL Injection
attempts because they are NOT seen as intrusions.

**Download this *FREE* white paper from SPI Dynamics for a complete
guide to protection!**
