

**HNS Newsletter**

Issue 178 - 08.09.2003.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

---

**ALERT: ARE YOU "POSITIVE" THAT YOUR SECURITY POLICY WORKS?**

---

Your network firewall and IDS products do not prevent Web application attacks - the most common form of online exploitation - resulting in Web defacement, data theft, sabotage and fraud. KaVaDo provides the first and only integrated Web application Scanner and Firewall security suite.

**Download a FREE whitepaper on Security Policy Automation for Web Applications** - <http://www.net-security.org/v/kavado>

---

**Table of contents:**

- 1) Security news
- 2) Vulnerabilities
- 3) Advisories
- 4) Articles
- 5) Reviews
- 6) Webcasts
- 7) Conferences
- 8) Security world
- 9) Virus news

**[ Security news ]**

---

**IBM SQUASHES WORMS**

IBM researchers in Zurich, Switzerland, have developed novel worm-squashing software the company says it wants to turn into a product to help guard against computer-network attacks such as those that slowed Internet traffic earlier this month.

<http://www.net-security.org/news.php?id=3473>

**SOCIAL SECURITY NUMBERS SOLD ON WEB**

Group buys data on top U.S. officials to underscore need

for tougher laws.

<http://www.net-security.org/news.php?id=3474>

#### NETWORK DEFENSE - DIVERSITY IS STRENGTH

One of my favourite quotes is: "He who fails to learn the lessons of history is doomed to repeat it". And I believe what is going on in the IT industry today is a good example.

<http://www.net-security.org/news.php?id=3475>

#### HACKING BY SUBPOENA RULED ILLEGAL

Issuing an egregiously overbroad subpoena for stored e-mail qualifies as a computer intrusion in violation of anti-hacking laws, a federal appeals court ruled.

<http://www.net-security.org/news.php?id=3476>

#### VIRUS ATTACKS SWITCHED OFF US POWER

August 2003 was the worst month for virus attacks in history – and one virus may have switched off the lights on America's East Coast, according to the experts.

<http://www.net-security.org/news.php?id=3477>

#### MOBILE SECURITY

Backing-up and encryption can alleviate some of the pain caused by losing a mobile device.

<http://www.net-security.org/news.php?id=3478>

#### SMES TURN BLIND EYE TO PROTECTION

A third of SMEs in the UK ignore anti-virus or firewall security, says survey.

<http://www.net-security.org/news.php?id=3481>

#### VIRUSES BOOST 'BIG BROTHER' SOFTWARE

It has never been easier for employers to monitor the e-mails and Internet activity of their staff.

<http://www.net-security.org/news.php?id=3482>

#### BLASTER-B WORM AUTHOR RELEASED ON BAIL

Jeffrey Lee Parson, the American teenager charged with unleashing the MS Blast internet worm, was released on bail following a hearing Friday in the US Federal Court.

<http://www.net-security.org/news.php?id=3483>

#### SURVEY: FEARS GROW THAT CYBERATTACK MAY STRIKE AMERICA

Americans are increasingly worried that terrorists could launch cyberattacks against banks, transportation networks and other critical systems, a new survey shows.

<http://www.net-security.org/news.php?id=3484>

#### SECURITY: GIVING AN OUTSIDER THE KEYS

Michael Warrilow, analyst in security and risk strategy at META Group, says non-government expenditure on managed security services will reach about \$100 million during 2003 in Australia.  
<http://www.net-security.org/news.php?id=3485>

#### MICE SIGN ON THE DOTTED LINE

Soon the way you use your mouse could help prove who you are.  
<http://www.net-security.org/news.php?id=3486>

#### BUSINESS CALLS IT MONITORING - CRITICS CALL IT SPYING

It's not government that is emerging as the clearest embodiment of Big Brother — the all-seeing all-knowing entity in Orwell's novel "1984" — but Corporate America.  
<http://www.net-security.org/news.php?id=3487>

#### HOW MANY SECURITY VULNERABILITIES A MONTH ARE ACCEPTABLE?

Are twenty security vulnerabilities in one month an acceptable number for Sun customers? It seems to me rather a lot? But then, I know about them. The question is, do Sun customers?  
<http://www.net-security.org/news.php?id=3489>

#### A SUPPORT GROUP FOR SPAMMERS

Spammers congregate online at the Bulk Club, a site where they trade tips and support. But a glitch reveals the club's roster, potentially exposing members to more backlash from those opposed to spam.  
<http://www.net-security.org/news.php?id=3490>

#### INSIDE NIP HYPE

Though we think NIP systems can enhance an existing security infrastructure, we don't consider integrating intrusion prevention and firewalls into a single unit a desirable goal.  
<http://www.net-security.org/news.php?id=3491>

#### COMPUTER VIRUS CREATORS RARELY FACE JAIL

Although nearly 63,000 viruses have rolled through the Internet, causing an estimated \$65 billion in damage, criminal prosecutions have been few, penalties light and just a handful of people have gone to prison for spreading the destructive bugs.  
<http://www.net-security.org/news.php?id=3492>

#### USE DSPAM TO REDUCE SPAM FROM A LINUX MAIL SERVER

DSPAM acts as the local delivery agent for the server and learns to recognize spam to ease the administrative burden of constantly keeping up with blacklists.  
<http://www.net-security.org/news.php?id=3493>

#### BE AWARE AND THWART THEFT

While banks and the state's attorney general are taking steps to thwart identity theft, they say their safeguards can quickly be offset by carelessness by consumers.

<http://www.net-security.org/news.php?id=3494>

#### DEFCON - ALL IN GOOD FUN

There are no rules at DefCon, the world's largest computer hacker convention.

<http://www.net-security.org/news.php?id=3495>

#### ONLINE RETAILERS, SECURITY COMPANIES JOIN TO FIGHT WEB ID THEFT

The ITAA will help run the coalition, but it's not part of the technology trade group.

<http://www.net-security.org/news.php?id=3496>

#### TEEN CHARGED IN WORM ATTACK SAYS CASE IS INFLATED

A high school senior charged with modifying a version of the Internet worm that crippled computer networks worldwide said the government has exaggerated its case against him.

<http://www.net-security.org/news.php?id=3497>

#### IS YOUR NETWORK SAFE? TRY THESE TOOLS AND FIND OUT

You patch your web server and are mindful of your firewall configuration, but is your site really secure? How do you check it?

<http://www.net-security.org/news.php?id=3498>

#### SECURITY EXPERT TURNS POLITICAL

Wired News talks with Richard Forno about his latest book, a departure from his usual computer security work. In it, he warns that "the real danger facing America is what we're allowing ourselves to become."

<http://www.net-security.org/news.php?id=3499>

#### SECURITY FEARS OVER HOSPITAL DATA

A data protection expert has exposed a lack of security at one of Switzerland's leading hospitals by hacking into confidential patient files in a matter of minutes.

<http://www.net-security.org/news.php?id=3500>

#### EXPLORING RHCT CERTIFICATION

In this article, Emmett explores what the RHCT certification is, how it fits into the acronym stream, and some things you should know when preparing for it.

<http://www.net-security.org/news.php?id=3501>

#### POCKET-SIZED WIRELESS DETECTION

This article provides a comparison of two tiny 802.11 detectors

and discusses how they would fit into your overall WiFi security framework.

<http://www.net-security.org/news.php?id=3502>

#### HOW SOME SPAMMERS GET YOUR E-MAIL

While not as efficient as "spiders" which automatically crawl the Web in search of addresses, computer experts warn that some spammers are using chain letters to collect e-mail usernames.

<http://www.net-security.org/news.php?id=3503>

#### SOPHOS TECH CHIEF BLASTS EVER-SO-BIG VIRUS CLAIMS

Recent computer viruses, such as MSBlaster, SoBig-F and Nachi-A cause much alarm, "but some of us today tend to be a little cynical about the figures quoted on the financial damage created", says Paul Ducklin, head of technology in Australia for a major anti-virus company.

<http://www.net-security.org/news.php?id=3504>

#### ISRAELI SCIENTISTS CRACK GSM MOBILE CALL SECURITY

An Israeli scientist said his team had found a way to break into mobile phone calls made on the popular GSM network, allowing eavesdroppers to listen in on calls and even take on a caller's identity.

<http://www.net-security.org/news.php?id=3505>

#### SECOND SUSPECT ARRESTED FOR INTERNET VIRUS

Police in Romania on Wednesday arrested a 24-year-old former student in connection with a computer-crippling Internet worm, according to a computer security company that aided police.

<http://www.net-security.org/news.php?id=3507>

#### INTERVIEW WITH BRUCE SCHNEIER

Author Bruce Schneier discusses why the Patriot Act and other anti-terror measures mean "giving up a lot -- and not getting very much".

<http://www.net-security.org/news.php?id=3508>

#### VIRUSES, WORMS - WHAT'S IN A NAME?

Researchers who first discover viruses or worms get the honor of naming them. Sometimes, the names are easy to pick. But as more viruses are created, researchers are having a harder time coming up with catchy monikers.

<http://www.net-security.org/news.php?id=3509>

#### INTRUSION DETECTION TERMINOLOGY (PART ONE)

This is the first of a two-part series that discusses IDS terminology, including terms where there may be disagreement from within the security community.

<http://www.net-security.org/news.php?id=3510>

#### IDENTITY THIEVES CHEAT 27 MILLION IN UNITED STATES

FTC survey cites crime spike, though not all in cyberspace.

<http://www.net-security.org/news.php?id=3511>

#### COLLEGES MOVE TO THWART INTERNET VIRUSES

Still recovering from a summer of Internet infections, colleges are taking unusually aggressive steps to protect campus computer networks from virus outbreaks.

<http://www.net-security.org/news.php?id=3513>

#### FBI REPORTEDLY HUNTING ADRIAN LAMO

FBI agents armed with a federal arrest warrant out of New York were searching for Adrian Lamo Thursday, according to the hacker and his mother.

<http://www.net-security.org/news.php?id=3514>

#### ARE WE OUTSMARTING SPAM?

The increasing glut of unsolicited, unwanted e-mail is a frustrating fact of life for businesses. Fighting it is a very real, everyday job for IT personnel.

<http://www.net-security.org/news.php?id=3515>

#### CAN OPEN-SOURCE SOFTWARE PREVENT THE NEXT BIG BLACKOUT?

North America's power grid, creaking under loads it was never designed to handle, may be facing an even grimmer future thanks to security flaws in aging control systems that are increasingly interconnected with Microsoft-based enterprise systems.

<http://www.net-security.org/news.php?id=3516>

#### AUSTRALIA'S ANTI-TERROR FIGHTERS SUFFER SECURITY BREACH

On the night of August 27, two men dressed as computer technicians entered the cargo processing and intelligence centre at Sydney International Airport. They managed to disconnecting two mainframe computers, which they wheeled out the building.

<http://www.net-security.org/news.php?id=3517>

#### LAWMAKERS MAY SEEK FULL DISCLOSURE

Spammers, scammers and child pornographers can hide easily on the Internet because regulators allow them to register under false names with stolen credit cards, lawmakers and technology experts said Thursday.

<http://www.net-security.org/news.php?id=3518>

#### TEACH WORMS A LESSON FROM WATERLOO

A world weary of computer viruses needs to take a tip from Nathan Rothschild.

### BLINDFOLDED SQL INJECTION

This whitepaper shows that supressing error messages does not provide real protection. The research reveales a set of techniques that attackers can use to bypass this obstacle, making it clear that more substantial measures must be taken against SQL injection attacks.

<http://www.net-security.org/article.php?id=553>

### PRISON FOR COMPUTER CRIME

The Justice Ministers of the 15 Member States of the European Union have decided to modify their country laws , to include prison sentences for the authors of computer crime. This decision may have more implications than it may seem: there are many different types of computer crimes, and all of them can be seen from different perspectives.

---

### INSTALLING, TROUBLESHOOTING, AND REPAIRING WIRELESS NETWORKS

When dealing with computer networks, we can expect a number of possible problems, so troubleshooting and repairing tips and tricks can come really handy in the moment of crisis. The book basically provides a detailed overview of general wireless network installations, with a scope on helping future wireless deployers to get the best out of their wireless networks.

<http://www.net-security.org/review.php?id=98>

### LINUX+ CERTIFICATION BIBLE

The aim of this book is to provide you with all the information you need to pass the CompTIA Linux+ Certification exam. The Bible series of books is very popular and always a synonym of quality

so I approached this title with great expectations.  
<http://www.net-security.org/review.php?id=97>

#### GOOGLE HACKS: 100 INDUSTRIAL-STRENGTH TIPS & TOOLS

Even if you use Google all the time, this exceptional book will show you things you didn't know were possible. Since the Internet is developing and growing quite rapidly, the audience of this book is basically everyone. We all need to learn how to search more efficiently.

<http://www.net-security.org/review.php?id=96>

**ALERT: ARE YOU "POSITIVE" THAT YOUR SECURITY POLICY WORKS?**

---

Your network firewall and IDS products do not prevent Web application attacks - the most common form of online exploitation - resulting in Web defacement, data theft, sabotage and fraud. KaVaDo provides the first and only integrated Web application Scanner and Firewall security suite.
