

**HNS Newsletter**

Issue 179 - 15.09.2003.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

---

**GET THAWTE'S NEW STEP-BY-STEP SSL GUIDE FOR MSIS**

---

In this guide you will find out how to test, purchase, install and use a Thawte Digital Certificate on you MSIS web server. Throughout, best practices for set-up are highlighted to help you ensure efficient ongoing management of your encryption keys and digital certificates.

---

**Get you copy of this new guide now:**

**[ Security news ]**

---

**PASSWORDS MULTIPLY AS USERS' RAGE RISES**

As logins get more complex, people may be the ones in need of a memory upgrade.

<http://www.net-security.org/news.php?id=3521>

**ADRIAN LAMO SPEAKS WITH LEO BEFORE ARREST**

The gray-hat hacker talked with 'The Screen Savers' as he waited to hear charges before turning himself in.

<http://www.net-security.org/news.php?id=3522>

#### PRIVACY'S NEW IMAGE

America's new rules of privacy are coming from the Old Country. Here's how Europe is getting America to rethink privacy.  
<http://www.net-security.org/news.php?id=3523>

#### SECURITY HOLES VEX WEB HOST FIRM

More than a thousand websites hosted by Interland, a leading Web-hosting company, appear to have been hacked in the last week, according to a security expert. But Interland denies there's a problem.  
<http://www.net-security.org/news.php?id=3524>

#### INTERNET SERVICE PROVIDERS: THE LITTLE MAN'S FIREWALL?

The fast spread of network worms and other malware has forced ISPs into implementing packet filtering. In some cases, this is the only way to keep the network operating, but it has become common to block certain ports permanently even after the threat diminishes. We argue in favor of limited, long term port blocking.  
<http://www.net-security.org/news.php?id=3525>

#### ID THEFT HITS 10M AMERICANS A YEAR

A staggering 27.3 million Americans have been victims of identity theft in the last five years, according to Federal Trade Commission survey out this week.  
<http://www.net-security.org/news.php?id=3528>

#### RAISING THE STANDARD FOR INFORMATION SECURITY

Key business functions are increasingly reliant on efficient IT infrastructures, but security breaches and their impact on the business are becoming greater.  
<http://www.net-security.org/news.php?id=3529>

#### CYBER GUERILLA NETWORKING

Cyber guerillas are hunting your wireless signals and gathering your private information. Find out how to combat them.  
<http://www.net-security.org/news.php?id=3530>

#### ENCRYPTION? GIVE IT A REST

Any hacker can tell you that data 'at rest' is much easier to access, but security efforts are being targeted in the wrong place, using complex, costly encryption schemes for data in motion.  
<http://www.net-security.org/news.php?id=3531>

#### LINUX FOR WINDOWS ADMINISTRATORS WITH DELIXUS 8.0

Delixus 8.0 makes administering a Linux server almost seamless to the Windows environment most people are used to.  
<http://www.net-security.org/news.php?id=3532>

#### QUANTUM CRYPTOGRAPHY GETS NANOTUBE BOOST

The U.S. Department of Defense is very interested in developing quantum cryptography, a theoretically unbreakable method of coding information, which necessitates a reliable way to deliver single photons on demand.

<http://www.net-security.org/news.php?id=3534>

#### MANUAL SOFTWARE CONFIGURATION LEAVES SYSTEMS OPEN TO ATTACK

Enterprise software manufacturers should ship products with the maximum security set as default, according to Mary Ann Davidson, chief security officer at Oracle.

<http://www.net-security.org/news.php?id=3535>

#### LAMO SET TO SURRENDER TODAY

An agreement with prosecutors has the New York Times hacker walking into custody Tuesday morning, and likely being released on bail later the same day.

<http://www.net-security.org/news.php?id=3536>

#### DON'T TURN THAT CHEEK TO HACKERS --BE UNCHIC

So what do we do with Jeffrey Parson, the 18-year-old whose Blaster variant attacked 7,000 computers last month?

<http://www.net-security.org/news.php?id=3537>

#### FORGIVE ME MY TRESPASSES

How a recent federal appeals court decision makes virtually everyone a computer criminal.

<http://www.net-security.org/news.php?id=3538>

#### MICROSOFT STANDS BY IE SECURITY PATCH

Microsoft has responded to claims that a recent patch for Internet Explorer fails to fix the security vulnerability.

<http://www.net-security.org/news.php?id=3539>

#### SECURITY FORCES - ACT BEFORE YOU MUST REACT

Information security is a reactive world. The next intrusion, vulnerability or worm is always right around the corner.

<http://www.net-security.org/news.php?id=3540>

#### SCO DEMANDS NAME OF WEBSITE ATTACKER

The SCO Group has asked Open Source Initiative president Eric Raymond to disclose the name of the person who carried out a distributed denial of service attack on the company's website last month, "so that justice can be done."

<http://www.net-security.org/news.php?id=3541>

#### ANTISPAM COMPANIES RAKING IT IN

Not everyone is unhappy about the scourge of spam. Antispam

software companies are seeing rising revenues and growing lines of investors.

<http://www.net-security.org/news.php?id=3542>

#### CRIME STATS WEB SITE A HIT

A Web site launched a week ago to monitor South African crime has had an overwhelming response from members of the public, receiving 24 000 hits since its launch, says site owner Spero Patricious.

<http://www.net-security.org/news.php?id=3543>

#### TOP SECURITY PROS TO TALK WORM DEFENSE

A group of high-powered security experts and industry executives will be in Washington, testifying before a Congressional committee looking into ways to bolster the nation's defenses against threats such as worms and viruses.

<http://www.net-security.org/news.php?id=3545>

#### LAPTOP STOLEN IN FURTHER SECURITY BREACH

Highly sensitive government security information has been stolen in a second major intelligence breach.

<http://www.net-security.org/news.php?id=3546>

#### CHINA MOVES TO BLOCK SPAM SERVERS

In its latest battle against junk e-mail, China has blocked 127 mail servers it identified as responsible for spam, the official Xinhua News Agency said Tuesday.

<http://www.net-security.org/news.php?id=3547>

#### THE VIRUS OF YOUTHFUL IRRESPONSIBILITY

College kids just don't pay enough attention to computer security. Thank goodness adults on campus are prepared to force the issue.

<http://www.net-security.org/news.php?id=3548>

#### ADRIAN LAMO TURNS HIMSELF IN

Adrian Lamo, aka the helpful hacker, responds to an arrest warrant by surrendering to federal marshalls. Lamo has admitted involvement in some of the most-publicized computer break-ins in recent years.

<http://www.net-security.org/news.php?id=3549>

#### BEST PRACTICES: HANDHELD SECURITY

Handheld security expert suggests best practices for organizations that support the devices.

<http://www.net-security.org/news.php?id=3550>

#### MONEY FOR JAM: A NEW KIND OF SCAM

In what appears to be a scam of a different kind, an email is doing the rounds offering people 10 percent of the money deposited in

their bank accounts by outsiders.  
<http://www.net-security.org/news.php?id=3551>

**TWO BRITS CHARGED WITH RELEASING TK WORM**  
Two British men were charged on Monday with conspiring to take over computers using malicious code.  
<http://www.net-security.org/news.php?id=3553>

**RIAA SETTLES WITH 12-YEAR-OLD GIRL**  
Barely 24 hours after suing alleged file swappers around the United States, the recording industry has settled its first, agreeing to drop its case against a 12-year-old New York girl in exchange for \$2,000.  
<http://www.net-security.org/news.php?id=3554>

**PREVENTING THE NEXT WORM**  
Information security is a reactive world. The next intrusion, vulnerability or worm is always right around the corner.  
<http://www.net-security.org/news.php?id=3555>

**JUST SAY NO TO VIRUSES AND WORMS**  
Members of the computing industry and law enforcement testified before the technology subcommittee of the House Committee on Government Reform Wednesday about how to protect the nation's computing systems from viruses and worms.  
<http://www.net-security.org/news.php?id=3557>

**MICROSOFT WARNS ON THREE CRITICAL BUGS**  
Buffer overflow and denial of service vulnerabilities affect Windows RPC service.  
<http://www.net-security.org/news.php?id=3558>

**MURKY LAWS MAKE PIRACY SUITS LESS LIKELY IN CANADA THAN U.S.**  
When the U.S. record industry spread fear and loathing south of the border on Monday by filing lawsuits against music "pirates," Canadian file sharers were left looking over their shoulders wondering if the same thing could happen to them.  
<http://www.net-security.org/news.php?id=3559>

**HACKERS HIT RICHMOND**  
International hackers have crashed the computer system of a Richmond real estate agent, costing it thousands of dollars.  
<http://www.net-security.org/news.php?id=3560>

**HARDENING THE TCP/IP STACK TO SYN ATTACKS**  
This article discusses methods of hardening the TCP/IP stack of various operating systems to make servers more resistant to SYN flooding and SYN spoofing Denial of Service (DOS) attacks.

<http://www.net-security.org/news.php?id=3562>

#### HACKER'S PRANKS STARTED OUT SMALL

Investigators say his career as a computer hacker began more than a year ago when he saw a roommate typing her password and copied it.

<http://www.net-security.org/news.php?id=3563>

#### MICROSOFT'S WORMY PROBLEM

Investors should not dismiss concerns of more security flaws when looking at Microsoft's stock.

<http://www.net-security.org/news.php?id=3564>

#### IT'S TIME TO TACKLE THREATS TO THE NET

Individuals and businesses that depend on the Internet won't tolerate nuisances such as spam and viruses.

<http://www.net-security.org/news.php?id=3565>

#### STEVE WOZNIAK SPEAKS ON MAC PASSIONS AND MAC VIRUSES

Among other reasons Macintosh has a loyal following: the absence of viruses -- such as SoBig -- that have plagued the PC world.

<http://www.net-security.org/news.php?id=3566>

#### BEYOND BIOMETRICS: NEW STRATEGIES FOR SECURITY

Biometrics technology, despite its sluggish acceptance, might be on the edge of newfound popularity.

<http://www.net-security.org/news.php?id=3567>

#### DOES THE KILLER WORM REALLY EXIST?

Technology is not holding hackers back from creating uber worms, Chris Wysopal, director of R&D at @stake, told the E-Commerce Times. Rather, the limiting factor is the psychology of the majority of people -- generally young males -- who write malware.

<http://www.net-security.org/news.php?id=3568>

#### THE PERILS OF ONLINE DATA ENTRY

Fraser Thomas, chief executive at Swivel Technologies, advises on how to minimise the risks posed by criminals looking to obtain other people's authentication details.

<http://www.net-security.org/news.php?id=3569>

#### ESCAPE THE SPYWARE NIGHTMARE

Spyware and adware are the newest threats to connected PCs. Here's how to get them off your machine--and keep them off.

<http://www.net-security.org/news.php?id=3570>

## RUMBLINGS ON IT SECURITY JOBS MOVING OVERSEAS

When can you expect your IT Security job to disappear and move overseas?

<http://www.net-security.org/news.php?id=3571>

## COMPUTER-HEAVY ELECTRICAL GRID IS VULNERABLE TO ATTACK

Replacing the aging monitoring systems on the Northeast's power grid with digital switches and other high-tech gear has made the electricity supply vulnerable to a new kind of peril.

A WALK THROUGH "SOMBRIA": A NETWORK SURVEILLANCE SYSTEM  
Sombria ("shadowy" in Portuguese) is a honeypot system set up in  
Tokyo, Japan, that is intended for network surveillance and research

and not for production purposes. This paper provides some statistics and an overview of the most prominent attacks from May through July 2003. [more]

<http://www.net-security.org/article.php?id=558>

#### INTERVIEW WITH JOHN VACCA

The information technology consultant and internationally known author of many books and articles discusses identity theft issues as well as his latest book "Identity Theft".

<http://www.net-security.org/article.php?id=557>

#### AN INTEGRATED APPROACH TO THREAT MANAGEMENT

Effective Threat Management embodies the actions organizations must take to defend themselves against today's ever-present cyber-threats. At a high-level, these actions form an intrusion prevention and protection lifecycle where each stage provides critical information to the next.

<http://www.net-security.org/article.php?id=559>

#### INFORMATION SECURITY CHECKLIST

Today's heightened awareness of the need to secure IT infrastructures and protect mission critical data is leading more and more organizations to reevaluate their security practices. To help you determine how your security program stacks up, infosecurity guru Ken Cutler has developed this security checklist.

<http://www.net-security.org/article.php?id=556>

#### PROTECTING DATABASES

Securing your databases involves not only establishing a strong policy, but also establishing adequate access controls. In this paper, we will cover various ways databases are attacked, and how to prevent them from being "hacked".

<http://www.net-security.org/article.php?id=555>

-----

#### [ **Reviews** ]

All reviews are located at:

<http://www.net-security.org/reviews.php>

-----

#### LINUX SERVER HACKS

This 200+ pages long book doesn't bother to cover all Linux server administration topics, but provides a collection of 100, sharp to the point, server administration situations, written by a well

known figure in the administration world.  
<http://www.net-security.org/review.php?id=99>

#### WINDOWS SERVER 2003 SECURITY BIBLE

This book is a perfect choice for all you administering Windows Server 2003 machines as it deals exclusively with security. Read the review and get a sample chapter.  
<http://www.net-security.org/review.php?id=100>

---

#### [ **Software** ]

Windows software is located at:  
[http://net-security.org/software\\_main.php?cat=1](http://net-security.org/software_main.php?cat=1)

Linux software is located at:  
[http://net-security.org/software\\_main.php?cat=2](http://net-security.org/software_main.php?cat=2)

---

#### RAINBOWCRACK 1.01

RainbowCrack is an instant windows password cracker based on Philippe Oechslin's faster time-memory trade-off technique.  
<http://www.net-security.org/software.php?id=515>

---

#### [ **Webcasts** ]

<http://www.net-security.org/webcasts.php>

---

#### SPONSORED WEBCAST: Anatomy of a Database Attack

---

Organized by Application Security on 25 September 2003, 11:00 AM EDT

---

The webcast will provide a detailed example of how an attacker can break into a database. Real world visuals together with step-by-step explanations in layman's terms will be used to detail this attack on a fictional company's database.  
<http://www.net-security.org/webcast.php?id=15>

---

Cryptography and Digital Signing

Organized by Microsoft on 15 September 2003, 4:00 PM ET  
<http://www.net-security.org/webcast.php?id=33>

Penetration Testing with CORE IMPACT – Understanding the Attacker Perspective

Organized by Core Security Technologies on 16 September 2003, 11:00 AM ET  
<http://www.net-security.org/webcast.php?id=19>

Tripwire Challenge Series: The IT Audit

Organized by Tripwire on 16 September 2003, 11:00 AM PDT  
<http://www.net-security.org/webcast.php?id=46>

The Hazards of Email Security Policies: How Companies Can Accurately Assess Effectiveness

Organized by Zix Corporation on 16 September 2003, 1:00 PM CST  
<http://www.net-security.org/webcast.php?id=3>

The Basics of WLAN Security

Organized by Funk Software on 16 September 2003, 1:00 PM EDT  
<http://www.net-security.org/webcast.php?id=20>

Spam and Email Threats

Organized by CipherTrust on 16 September 2003, 1:00 PM ET
