

HNS Newsletter

Issue 180 - 22.09.2003.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

ALERT: ARE YOU "POSITIVE" THAT YOUR SECURITY POLICY WORKS?

Your network firewall and IDS products do not prevent Web application attacks - the most common form of online exploitation - resulting in Web defacement, data theft, sabotage and fraud. KaVaDo provides the first and only integrated Web application Scanner and Firewall security suite.

Download a FREE whitepaper on Security Policy Automation for Web Applications - <http://www.net-security.org/v/kavado>

Table of contents:

[Security news]

SECURITY ROLLUP PLANNED FOR WINDOWS XP

Microsoft is hurrying to produce a post Service Pack 1 security rollup package for Windows XP, reversing its August decision to rely solely on Windows Update to deliver individual patches.

<http://www.net-security.org/news.php?id=3574>

WHY YOU MUST INSTALL A FIREWALL NOW

If you haven't already installed a personal firewall on your Windows computer, consider this your last warning.

<http://www.net-security.org/news.php?id=3575>

SECURE TRANSACTIONS WITH NO STRINGS ATTACHED

Security vendors pitch PKI alternatives that cut costs and management headaches.

<http://www.net-security.org/news.php?id=3576>

PAYING SPAMMERS NOT TO SPAM

Based on the idea that junk e-mailers will do anything for money, a new company is offering spammers cash for each name they add to a do-not-spam list.

<http://www.net-security.org/news.php?id=3577>

WIFI WHISTLE BLOWER FACES CRIMINAL CHARGES

A North Carolina man faces criminal charges after his attempt to expose the insecurity of his local medical facility's wireless network landed him in hot water with the authorities.

<http://www.net-security.org/news.php?id=3578>

TOTAL SECURITY?

Think your PC is protected by those passwords you key in every time you start up or log on to your e-mail client or Web applications? Think again.

<http://www.net-security.org/news.php?id=3579>

VIRUS ATTACKS: WHO IS TO BLAME?

August was possibly the busiest month in the history of computer viruses: 800 new viruses were detected.

<http://www.net-security.org/news.php?id=3582>

QUANTUM CRYPTOGRAPHY FINALLY COMMERCIALIZED?

Start-up MagiQ Technologies, from Somerville, Massachusetts, has released the first commercial implementation of quantum cryptography, the much-heralded solution to the perfect encryption cipher.

<http://www.net-security.org/news.php?id=3583>

UK SECURITY GROUP GROWS FIVEFOLD

Since its launch at the Infosecurity exhibition and conference in April, the UK branch of the US-based Information Systems Security Association (ISSA) has boosted membership fivefold, from about 20 founder members to more than 120 organisations and individuals.

<http://www.net-security.org/news.php?id=3584>

DYNAMIC HONEYPOTS

Instead of discussing what honeypots can do and how they work, we will take a look into the crystal ball and see what honeypots should do, how they could work.

<http://www.net-security.org/news.php?id=3585>

ENCRYPTED EMAIL COOKBOOK

Using a cookbook approach, the author demonstrates how to set up various email clients to use authentication and encryption.

<http://www.net-security.org/news.php?id=3586>

SECURITY WOES THREATEN INDUSTRY SAYS BALLMER

Is the increase in security threats good or bad for the computer industry? Apparently it's both.

<http://www.net-security.org/news.php?id=3587>

NEW CYBERSECURITY CHIEF PICKED

The Bush administration on Monday selected Amit Yoran, a respected software executive from Symantec Corp., as the nation's new cybersecurity chief inside the Department of Homeland Security.

<http://www.net-security.org/news.php?id=3588>

FEARS OF NEW WINDOWS EXPLOIT GROW

Fears are growing that vulnerabilities detailed by Microsoft on September 4 may be exploited soon, after a research company published a paper providing guidance on how these could be exploited.

<http://www.net-security.org/news.php?id=3589>

PGP MAKES EMAIL ENCRYPTION EASIER

PGP Corporation today introduced simpler email encryption in which the burden of securing email messages is shifted from the client to the network.

<http://www.net-security.org/news.php?id=3590>

DOES MICROSOFT GIVE A DAMN?

The software-maker's dismal security record seems to have left it immune to criticism and shame.

<http://www.net-security.org/news.php?id=3591>

HACKERS DISTRIBUTING NEW WINDOWS EXPLOIT

Security researchers on Tuesday detected hackers distributing software to break into computers using flaws announced last week in some versions of Microsoft Corp.'s Windows operating system.

<http://www.net-security.org/news.php?id=3594>

DON'T RELY ON MICROSOFT AV, WARNS ANALYST

Gartner advises companies not to bank on future Windows OS for virus protection.

<http://www.net-security.org/news.php?id=3595>

ACCELERATING SECURITY CERTIFICATION

Can information security professionals really get certified in half the ordinary time?

<http://www.net-security.org/news.php?id=3596>

BANKS IN U.K, CANADA HIT WITH E-MAIL SCAM

British officials and the Royal Canadian Mounted Police are investigating.

<http://www.net-security.org/news.php?id=3597>

IF THESE NETWORKS GET HACKED, BEWARE

America's critical transportation, power, and communications systems remain quite vulnerable and lack funds to remedy that.

<http://www.net-security.org/news.php?id=3598>

INTEL BACKS OFF SECURITY PLAN

LaGrande architecture will appear in only some chips, and can be disabled.

<http://www.net-security.org/news.php?id=3599>

CRON TUTORIAL

What is cron? It is the scheduling daemon of the Linux operating system. Learn how to use it.

<http://www.net-security.org/news.php?id=3600>

FORMER ANTI-SPY CHIEF SAYS GADGETRY FAILING

Despite the introduction of ever-improving surveillance technologies and snooping gadgets, today's spies were failing to gain the upper hand in "the war on terrorism," the former head of Britain's national security agency, MI5, said on Monday.

<http://www.net-security.org/news.php?id=3601>

ADRIAN LAMO SPEAKS OUT

The past two years have been a wild ride for Adrian Lamo: The 22-year-old has publicly taken credit for tunneling into networks belonging to Yahoo, Microsoft, Excite@Home and WorldCom.

<http://www.net-security.org/news.php?id=3602>

EXPERTS PLOT TACTICS TO BEAT WEB CRIME

The UK government's first e-crime conference in London talked tough on computer crime.

<http://www.net-security.org/news.php?id=3603>

CRACKER PUT DETAILS ON WEB IN SPITE

A 14-year-old hacker put 895 customer records of Hamilton internet provider Net4U on the web in an act of spite.

<http://www.net-security.org/news.php?id=3606>

VIRUSES A BLESSING IN DISGUISE, SAYS OPEN UNIVERSITY

The SoBig and Blaster viruses could be a "blessing in disguise" as they can help IT departments apply a security policy to home users, according to the software manager at the Open University (OU).

<http://www.net-security.org/news.php?id=3607>

AMERICA FAILS ON INFORMATION SECURITY

We've all seen the mass disruption caused by the recent Sobig, Nachi and MSBlast worms--costing American companies \$3.5 billion in August alone. Where's the outrage? Where's the action?

<http://www.net-security.org/news.php?id=3608>

SOLARIS TO ENLIST MILITARY SECURITY

The next release of Sun's operating system will add security features from Trusted Solaris, which was developed in partnership with the US government and military.

<http://www.net-security.org/news.php?id=3609>

VIRUS SENDER AGREED TO WORK WITH FBI

Federal prosecutors credited the man responsible for transmitting the Melissa virus with helping the FBI bring down several major international hackers.

<http://www.net-security.org/news.php?id=3610>

DISTRIBUTORS OF DVD-COPY SOFTWARE SUED

Hollywood studios Paramount Pictures and 20th Century Fox sued a handful of small software companies Wednesday, alleging that their distribution of DVD-copying software violates copyright law.

<http://www.net-security.org/news.php?id=3612>

BLASTER TRIAL SET FOR NOVEMBER 17

The Minnesota teenager accused of unleashing a variant of the Blaster worm pleaded not guilty yesterday to a federal charge that carries a maximum sentence of 10 years imprisonment.

<http://www.net-security.org/news.php?id=3614>

VERISIGN'S 'SITEFINDER' FINDS PRIVACY HULLABALOO

Already reviled by network operators, Verisign's ambitious typosquatting project is raising hackles with privacy advocates too.

<http://www.net-security.org/news.php?id=3615>

IN BRITAIN, SPAMMERS WILL PAY

Instead of the latest U.S. tactic in the spam war - paying spammers not to spam - Britain looks at the flip side the coin. A new law makes spamming a criminal act worthy of jury trials and the potential for unlimited fines.

<http://www.net-security.org/news.php?id=3616>

BEWARE THE FAKE SECURITY PATCH

A new Internet worm masquerading as a security patch sent by Microsoft is spreading fast around the world.
<http://www.net-security.org/news.php?id=3617>

IBM, GE LOCK UP SECURITY PARTNERSHIP

IBM and GE's Interlogix business unit announced a joint agreement to provide integrated computer and physical security systems to large customers.
<http://www.net-security.org/news.php?id=3618>

WAITING FOR A DIGITAL SEPT. 11

After a rash of security flaws had wreaked havoc upon millions of users of Microsoft's operating systems, Steve Ballmer blew into Silicon Valley to make a public mea culpa in front of a roomful of industry executives.
<http://www.net-security.org/news.php?id=3619>

SECURITY APPLIANCES BENEFIT FROM SCARES

Security-server sales were up by 10 per cent in the second quarter, with a spate of viruses forcing firms to become more security conscious.
<http://www.net-security.org/news.php?id=3620>

WIRELESS POLICY DEVELOPMENT (PART ONE)

This is the first of a two-part series that will help create a framework for the most important aspect of any wireless security strategy -- policy development.
<http://www.net-security.org/news.php?id=3621>

SUN BOOSTS SUPPORT FOR RFID

Another major enterprise IT vendor has further embraced the move toward using radio frequency identification (RFID) tags in manufacturing and retailing.
<http://www.net-security.org/news.php?id=3622>

INTERIOR ADMITS SECURITY FLAWS IN TRUST SYSTEMS

Interior secretary Gale Norton told the Office of Management and Budget recently that the department's financial systems are riddled with security weaknesses, even after she had told the U.S. District Court for the District of Columbia last month that they were secure.

ALERT: ARE YOU "POSITIVE" THAT YOUR SECURITY POLICY WORKS?

Your network firewall and IDS products do not prevent Web application attacks - the most common form of online exploitation - resulting in Web defacement, data theft, sabotage and fraud. KaVaDo provides the first and only integrated Web application Scanner and Firewall security suite.
