

HNS Newsletter

Issue 189 - 24.11.2003.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

GET THAWTE'S NEW STEP-BY-STEP SSL GUIDE FOR MSIS

In this guide you will find out how to test, purchase, install and use a Thawte Digital Certificate on your MSIS web server. Throughout, best practices for set-up are highlighted to help you ensure efficient ongoing management of your encryption keys and digital certificates.

Get your copy of this new guide now:

[Security news]

ENCRYPTION REVOLUTION: THE TANTALIZING PROMISE OF 'UNBREAKABLE' CODES

Code-makers could be on the verge of winning their ancient arms race with code-breakers.

<http://www.net-security.org/news.php?id=4055>

IT WASN'T ME, IT WAS THE TROJAN HORSE

Three U.K residents have been acquitted after saying a Trojan horse caused their computers to commit crimes. Robert bets we'll soon see creative defenses for tech-related crimes in

the U.S. as well.

<http://www.net-security.org/news.php?id=4056>

HOW TO FLOSS YOUR SECURITY SYSTEM

Patch management is a little like flossing your teeth. Everyone knows they're supposed to do it, but most of us still don't.

<http://www.net-security.org/news.php?id=4057>

GATES ADDRESSES SPAM, SECURITY FLAWS AT COMDEX

Addressing a more button-down crowd than in past years, Microsoft Chairman Bill Gates attempted Sunday to usher in a new era of computing he dubbed "seamless computing."

<http://www.net-security.org/news.php?id=4058>

KEEPING WATCH FOR INTERSTELLAR COMPUTER VIRUSES

Microsoft may have to fork up big bounty bucks trying to unearth future hackers, particularly when they are light years away on distant worlds.

<http://www.net-security.org/news.php?id=4059>

SECURITY: MORE THAN JUST TECHNOLOGY

You have to design for good security, not just load a new program.

<http://www.net-security.org/news.php?id=4060>

DESKTOP SECURITY: A CONTRARIAN VIEW

Rather than a perimeter defense around a trusted host, I keep tight control of the host itself, and make sure there is nothing worth stealing. I don't recommend this approach to others. It goes against best practices. It may be more lucky than effective. But it has two huge virtues. It's simple and I'm in control.

<http://www.net-security.org/news.php?id=4061>

NEW SYSTEM HALTS MALWARE

A computer scientist at Washington University in St. Louis has developed technology to stop malicious software - malware - such as viruses and worms long before it has a chance to reach computers in the home and office.

<http://www.net-security.org/news.php?id=4062>

HACKING: POTENTIALLY A NEW KIND OF WAR IN THE MIDDLE EAST

Security for companies' IT systems is a growth market as firms move to protect themselves from costly phenomenon.

<http://www.net-security.org/news.php?id=4063>

SECURITY CONSIDERATIONS WHEN MIGRATING FROM UNIX TO LINUX

The Linux server market is expected to grow by 35% from last year, according to research firm IDC. Many of these Linux systems are replacing Unix in corporations looking to reduce IT costs. However,

at the same time, there are more attacks on Linux than ever before.
<http://www.net-security.org/news.php?id=4064>

LACK OF WEB SECURITY WILL LIMIT TRADING PARTNERSHIPS

Organisations planning to deploy business-to-business web services in the next three years should limit their number of trading partners because of immature security products and standards.
<http://www.net-security.org/news.php?id=4067>

ORACLE ROW LEVEL SECURITY: PART 2

This paper explores the row level security feature added to Oracle 8i and above, and provides examples.
<http://www.net-security.org/news.php?id=4068>

THE FIREWALL AND THE WANDERING WORKERS

Corporations that have strong firewall defenses didn't take long to figure out that their greatest threat was from employees who log on to their networks from outside the building.
<http://www.net-security.org/news.php?id=4069>

E-MAIL WORM MASQUERADES AS PAYPAL MESSAGE

An e-mail worm is posing as a message from online payment company PayPal in an effort to harvest credit card numbers and account passwords.
<http://www.net-security.org/news.php?id=4070>

PICKPOCKETS TURN TO TECHNOLOGY

A potential loophole in security for Bluetooth phones, which could see strangers hacking into your address books, has been uncovered.
<http://www.net-security.org/news.php?id=4071>

WI-FI STARTS LEAPING SECURITY BARRIERS

As it proves its worth at work, companies are buying new products and services that help remove the worry of open access.
<http://www.net-security.org/news.php?id=4072>

AUTOMATING RSYNC WITH A SIMPLE EXPECT SCRIPT

This short article provides an example script that uses Expect to automate a series of rsync operations using an ssh tunnel.
<http://www.net-security.org/news.php?id=4073>

BLOGS GET A SECURITY BOOST

Two new applications offer more tools for creating Web logs.
<http://www.net-security.org/news.php?id=4074>

BUSH PUSHES FOR CYBERCRIME TREATY

President Bush has asked the U.S. Senate to ratify the first international cybercrime treaty.

<http://www.net-security.org/news.php?id=4076>

SECURITY RESEARCHER CALLS FOR VULNERABILITY TRADE ASSOCIATION

The idea for the organization came from Thor Larholm, a senior security researcher at PivX Solutions Inc. Larholm is well-known in security circles for his research, particularly on Internet Explorer.

<http://www.net-security.org/news.php?id=4077>

CISCO, ANTIVIRUS COMPANIES TEAM TO BATTLE WORMS

Cisco announced licensing agreements with three leading antivirus software companies and a new program that it said will protect computer networks from worms and viruses.

<http://www.net-security.org/news.php?id=4078>

THE ECONOMICS OF SPAM

Spammers can make lucrative living even though only 50 in every million people respond to unsolicited commercial email.

<http://www.net-security.org/news.php?id=4079>

NO EASY SOLUTION TO SPYWARE

Congress would be better off protecting individuals against online surveillance than trying to legislate spyware that monitors their online activity, a policy group says.

<http://www.net-security.org/news.php?id=4080>

RED HAT OFFERS NEW SECURITY COURSE

Red Hat Tuesday said it is offering a new training course, designed to improve the security skills of users.

<http://www.net-security.org/news.php?id=4081>

GERMANY TOUTS HIGH-SECURITY PHONE

A German company launched a new mobile handset on Tuesday targeted at business executives that secures that lines are free from eavesdroppers, sparking criticism that it could also make criminals harder to catch.

<http://www.net-security.org/news.php?id=4083>

SYMANTEC CEO URGES SHIFT IN SECURITY TACTICS

Comdex: John Thompson warns that unless the security industry changes its focus, technology could become a liability.

<http://www.net-security.org/news.php?id=4084>

APPLE SECURITY PATCHES POSTED

Apple has released security updates for Mac OS X Panther 10.3.1 client and server systems and Mac OS X Jaguar 10.2.8 client and server operating systems.

<http://www.net-security.org/news.php?id=4085>

HOME USER SECURITY: YOUR FIRST DEFENSE

The swiss cheese approach to applying security patches that are required to keep desktop computers safe and useable just doesn't work for the average home user. A firewall should now be a home user's first line of defense.

<http://www.net-security.org/news.php?id=4086>

CISCO SECURITY INITIATIVE

In an unusual alliance among staunch competitors, Cisco Systems will collaborate with three of the largest computer security firms to fight virus and worm attacks.

<http://www.net-security.org/news.php?id=4087>

CODEFELLAS - A MAFIA HACKER TELLS HIS STORY

Smart mobs? Fuhgeddaboutit. Not till they hired me. Now they're getting a secure P2P bet-processing system. A mafia hacker tells his story to Wired magazine's Simson Garfinkel.

<http://www.net-security.org/news.php?id=4088>

HACKERS DID NOT CAUSE BLACKOUT - REPORT

There is no evidence that the blackout that struck the northeastern United States and southern Canada on August 14 was caused by hackers, but the power grid's reliance on the Internet makes it vulnerable to potentially devastating online attacks.

<http://www.net-security.org/news.php?id=4089>

SETTING UP SERVER TOOLS FOR SPAM- AND VIRUS-FREE MAIL

After a week of email nearly free of spam and viruses, the time and effort it took to configure a Linux mail server with SpamAssassin, MIMEDefang, and sendmail seem well worth the trouble.

<http://www.net-security.org/news.php?id=4090>

SANDIA LABS STUDIES PHONY COMPUTER NETWORK FOR HACKERS

Instead of merely fending off thousands of daily computer attacks, federal researchers are trying a new tack: Create a meaningless digital universe to bog down hackers and study their tactics.

<http://www.net-security.org/news.php?id=4091>

CA OFFERS FREE ANTIVIRUS, FIREWALL SOFTWARE

Computer Associates International Inc. (CA) will give away its consumer antivirus and firewall software product with a year's subscription to virus signature updates.

<http://www.net-security.org/news.php?id=4092>

BIOMETRICS ARE THE FUTURE, SAY AVIATION SECURITY EXPERTS

Biometric identification methods such as fingerprints and digital photographs are tomorrow's technology to ensure security of civil aviation, participants of a conference said.

<http://www.net-security.org/news.php?id=4093>

HP EYES SECURITY, SMB SPACES

Security projects currently in the hopper include moving VPN technology to 802.11 wireless networks.

<http://www.net-security.org/news.php?id=4094>

"PHISHING" IDENTITY THEFT IS GAINING POPULARITY

Most of us know by now not to give out our passwords, ATM PINs, or other secret information when requested by e-mail. But an increasing number of people are giving out that information, even those of us who should know better.

<http://www.net-security.org/news.php?id=4095>

CYBERCRIME SWEEP NETS 125 ARRESTS

Attorney General John Ashcroft said Thursday that 125 suspects have been arrested in a crackdown on Internet crimes ranging from hacking to fraud to selling stolen goods.

<http://www.net-security.org/news.php?id=4096>

TAKING SCAMMERS FOR A RIDE

A scam-baiter has plenty of interesting tales to tell as he takes would-be scammers for a ride.

<http://www.net-security.org/news.php?id=4097>

HACKER LIFE DOESN'T LAST FOREVER

In 2 1/2 years in the late 1990s, Breuninger hacked into dozens of computer systems. He peeked at the payroll of a nearby Taco Bell, left messages supporting Jesse Ventura on Web sites and stole thousands of Internet e-mail accounts and passwords.

<http://www.net-security.org/news.php?id=4098>

THE FUTURE OF OPEN SOURCE IN SECURITY

This year we held our 2nd Annual Open Source Symposium and it certainly fit the bill as a wide variety of topics were presented from security to higher education theory.

<http://www.net-security.org/news.php?id=4099>

GALVANISING PHYSICAL SECURITY WITH IT

Cingulum Security Services has teamed with Internet Solutions (IS) to take on-site CCTV recording and physical guarding into the realm of "more secure" IT.

<http://www.net-security.org/news.php?id=4100>

SIX FACE SENTENCING FOR INTERNET ID THEFT AND FRAUD

A London court will hear today that six fraudsters used the Internet to obtain false identities and con Lloyds TSB out of £300,000.

<http://www.net-security.org/news.php?id=4101>

SECURITY IS ABOUT MORE THAN AN IMAGE PROBLEM

Microsoft's latest hacker bounty won't solve the problem - it'll only divert public attention away from the core security problem that users face.

<http://www.net-security.org/news.php?id=4102>

RADIO TAGS SPARK PRIVACY WORRIES

The use of radio tags on consumer products should be put on hold, say privacy campaigners.

<http://www.net-security.org/news.php?id=4103>

DEBIAN PROJECT MACHINES HAVE BEEN COMPROMISED

Some Debian servers were found to have been compromised on November 20th. The archive was not affected by this compromise.

http://www.net-security.org/articles_main.php

Articles can be contributed to articles@net-security.org

WHY BOTHER VIRUS SCANNING?

I have always thought the idea of scanning for viruses to be flawed, well certainly as a security measure. Yet nearly all of you reading this article will be relying on just that technology to protect your networks, PCs and laptops.
<http://www.net-security.org/article.php?id=605>

SOAP WEB SERVICES ATTACKS

This whitepaper discusses various types of attacks based on the SOAP implementation of Web services over HTTP and describes how you can shield your applications from these assaults.
<http://www.net-security.org/article.php?id=604>

WORMS OF THE FUTURE: TRYING TO EXORCISE THE WORST

This is a research paper on the security (or lack of) within computer systems and ways of improvement with respect to mobile and hostile code such as worms.
<http://www.net-security.org/article.php?id=603>

FLOODING FROM THE UNDERGROUND - A GLOBAL THREAT

When Khaled Mardam-Bey developed an IRC client for the Windows platform, I doubt he envisaged mIRC becoming the basis for the control of an immeasurable number of compromised machines in bot-nets. Khaled has the original authors of the Global-Threat bot to thank for that.
