WI-FI: SECURE OR NOT? DEBATE RAGES

We all know what kind of internet we have. Most of us have dedicated connections at home- whether dialup, broadband, or even faster. But what about Wi-Fi? Is it secure or not? The following article explains the debate between WiFi proponents and detractors.

<http://www.net-security.org/news.php?id=4209>

MOVING BEYOND PASSWORDS

New options for strong authentication help agencies find the right security for their needs.

<http://www.net-security.org/news.php?id=4210>

CYBERSECURITY WORRIES KEEP MANY FROM BANKING ONLINE

Alma Villalpando, a program director at Eastfield College in Mesquite, Texas, says she's comfortable using a computer. She even offers training programs on cybersecurity.

<http://www.net-security.org/news.php?id=4211>

FORTUNE 500 FIRMS PICK SMARTCARD SECURITY

More than one third of enterprise companies will rely on smartcard technology by 2006.

<http://www.net-security.org/news.php?id=4212>

SECURING YOUR LINUX ENVIRONMENT

As Linux gains momentum, Linux systems become more attractive to virus writers. Read on to learn more about antivirus software, end-user education, and safe computing practices that can protect you from attacks.

<http://www.net-security.org/news.php?id=4213>

SECURITY FEARS PUSH USERS TO OPEN SOURCE

CIOs look seriously at Linux for the desktop as Microsoft's security problems continue.

<http://www.net-security.org/news.php?id=4214>

NEW AUTHENTICATION SYSTEM TRIES TO BLOCK SPAM

Yahoo said it is working on technology to combat e-mail spam by changing the way the Internet works to require authentication of a message's sender.

<http://www.net-security.org/news.php?id=4215>

HACKERS STEAL FROM PIRATES, TO NO GOOD END

The people who design rogue programs that take over computers from afar are now applying the tactic that made music pirating programs so effective--and the Internet may never be the same.

<http://www.net-security.org/news.php?id=4217>

THE NEXT WINDOWS: MICROSOFT'S BIG CHALLENGE

Microsoft Corp. has been tarred as an illegal monopoly and a copycat. Its flagship Windows operating system gets knocked for its security holes and user-unfriendly quirks.

<http://www.net-security.org/news.php?id=4218>

POLICE ARREST IPOD EMAIL SUSPECT

Cambridgeshire force pounces on local man in alleged credit

card hoax.

<http://www.net-security.org/news.php?id=4219>

GOOD GUYS VERSUS BAD GUYS - WHO'S AHEAD?

For Symantec CEO John Thompson, there's always something new to worry about.

<http://www.net-security.org/news.php?id=4220>

CONGRESS OKS ANTISPAM LEGISLATION

The U.S. Congress on Monday gave final approval to the first federal law regulating spam, which President Bush has indicated he will sign before the end of the year.

<http://www.net-security.org/news.php?id=4221>

Q&A: A TWO-PRONGED APPROACH TO CYBERSECURITY

The head of the US government's cybersecurity programme explains why he feels that the public and private sectors are making progress towards achieving security.

<http://www.net-security.org/news.php?id=4222>

HOME USER SECURITY: PERSONAL FIREWALLS

This article discusses personal firewall alternatives, including freeware firewalls, firewalls included with current Microsoft and Apple OSes, and various commercial offerings of interest to the home user.

<http://www.net-security.org/news.php?id=4223>

WINDOWS TAKES 7 SPOTS IN SYMANTEC'S TOP 10 NOVEMBER FLAWS

A remote buffer overflow vulnerability in Windows Workstation Service has been rated the biggest risk for computer users during November, from among vulnerabilities discovered or announced during the month.

<http://www.net-security.org/news.php?id=4224>

MAFIA MUSCLES IN ON SPAM AND VIRUSES

Attacks may become less common, but more dangerous, warns antivirus expert.

<http://www.net-security.org/news.php?id=4226>

ORACLE PATCHES SECURITY FLAWS

Oracle has issued a security alert and software patches for a set of serious vulnerabilities in the security protocols used by some of its server products.

<http://www.net-security.org/news.php?id=4227>

FIGHTING SPAM PAYS BETTER THAN SENDING IT

There's money to be made fighting spam--more money than even spammers see on their bottom lines, a research firm

said Monday.

<http://www.net-security.org/news.php?id=4228>

FLAW COULD UNLEASH ANOTHER SLAMMER

A research company warned Tuesday that an attacker could use a recently patched Microsoft flaw to create a fast-moving worm similar to SQL Slammer, which spread rapidly across the Internet a year ago.

<http://www.net-security.org/news.php?id=4230>

PATCHING: PROCESS MATTERS

The list of all-too-familiar names - Nachi, Klez, Lovsan, SoBig, BugBear, Swen, Blaster and Yaha - represents only a sampling of the most prevalent worms and viruses that slithered into corporate networks this fall. But they all have one thing in common: Patches were readily available before most damage had been done.

<http://www.net-security.org/news.php?id=4231>

CHINESE SECURITY STANDARD COULD FRACTURE WI-FI, SAYS IEEE

The implementation of a Chinese security standard for wireless networking could undermine efforts to develop a global standard for wireless Lans and drive up the cost of networking equipment for end users, warned a senior executive at the Institute of Electrical and Electronics Engineers (IEEE).

<http://www.net-security.org/news.php?id=4232>

WAR GAMES ONLINE

Seeking an edge in the battle against computer worms and viruses, UC Berkeley researchers are building a virtual playing field for cyber war games.

<http://www.net-security.org/news.php?id=4233>

FEDS GET A 'D' IN COMPUTER SECURITY

U.S. federal departments and agencies are showing some improvement in protecting their computer networks, but many--including the Department of Homeland Security--are failing, according to a government report released Tuesday.

<http://www.net-security.org/news.php?id=4234>

E-VOTING GROUP UNITES ON SECURITY CONCERNS

Stung by criticism over whether its e-voting technology is sound, Diebold Election Systems joined with five other electronic voting machine manufacturers Tuesday to "identify and address security concerns" about the industry.

<http://www.net-security.org/news.php?id=4235>

CAMERA PHONES ARE A SECURITY RISK

Analysts have warned that camera phones represent a risk for

employers and could be used to photograph commercially sensitive aspects of a business operation.

<http://www.net-security.org/news.php?id=4236>

ALTERNATIVE METHODS FOR PROTECTING YOUR COMPANY FROM VIRUSES

Microsoft and other software vendors will certainly continue refining their software and issuing patches.

<http://www.net-security.org/news.php?id=4237>

THE HIGHS AND LOWS OF THE CSO

Pity the public-sector CSO. He has to overcome all the typical security pitfalls - and he gets to do it all in a bureaucratic fishbowl.

<http://www.net-security.org/news.php?id=4238>

DEVELOPERS TAKE LINUX ATTACKS TO HEART

A handful of recent online attacks on free and open-source software servers has open-source developers looking over their shoulders.

<http://www.net-security.org/news.php?id=4239>

IE BUG LETS FAKE SITES LOOK REAL

Microsoft on Tuesday said it was looking into reports of a potential bug in its Web browser that could help malicious hackers design convincing Web site spoofs.

<http://www.net-security.org/news.php?id=4240>

UK SPAM BAN COMES INTO FORCE

Sending unsolicited e-mails, or spam, in Britain is now a criminal offense under new laws that came into force on Thursday.

<http://www.net-security.org/news.php?id=4241>

FIRMS FIGHT 500 INTERNET ATTACKS A MONTH

Small businesses facing onslaught from viruses, worms and DoS attempts, warns research.

<http://www.net-security.org/news.php?id=4242>

SCO WEB SITE ATTACKED AGAIN? MAYBE

SCO has reported that they are experiencing an attack on their servers. Groklaw has been flooded with information that indicates their story doesn't add up.

<http://www.net-security.org/news.php?id=4243>

WORM PROPAGATION IN PROTECTED NETWORKS

Many documents explore worm propagation methods across the global Internet. In contrast, this analysis focuses on the impact of three prominent worms (Blaster, Slammer, and Code Red I/II) inside protected networks, once the security perimeter has

been breached.

<http://www.net-security.org/news.php?id=4244>

IE PHISHING SCAM EXPLOIT UNEARTHED

Security researchers have discovered a way for scam artists to disguise more effectively the location of bogus Web sites.

<http://www.net-security.org/news.php?id=4245>

BUGWATCH: PROVE YOU BELIEVE IN PRIVACY

Privacy issues should not be the concern of IT professionals alone but of all users.

<http://www.net-security.org/news.php?id=4246>

TO EXPLOIT OR NOT TO EXPLOIT

Hackers tread a thin boundary of what is and is not legally accepted, and what is and is not ethical. They explore computer systems, prod for vulnerabilities, and hope to discover a flaw that has gone unnoticed so far.

<http://www.net-security.org/news.php?id=4247>

IN A DATA-MINING SOCIETY, PRIVACY ADVOCATES SHUDDER

Edward Socorro had a good thing going as a sales manager with Hilton Hotels Corp. But not long after he started, a company hired by Hilton to do background checks on new employees reported that Socorro once spent six months in jail.

<http://www.net-security.org/news.php?id=4248>

ISSUES SURROUNDING LINUX AND IMPLICATIONS FOR IT MANAGERS

The purpose of this paper is to provide analysis on the Linux operating system along with Open Source software in general.

<http://www.net-security.org/news.php?id=4249>

SINGLE SIGN-ON SECURITY WITH TIVOLI ACCESS MANAGER TUTORIAL

Here's a good tutorial for optimising the enduser experience in regard to eliminating multiple logons, while maintaining tight website security.

<http://www.net-security.org/news.php?id=4253>

MACS ARE NOT INVULNERABLE

I know this is wrong, but in one respect I was happy to learn earlier this month about the discovery of a significant security hole in the Jaguar and Panther versions (10.2 and 10.3, respectively) of the Apple operating system (OS).

<http://www.net-security.org/news.php?id=4254>

BILL GATES TO ADDRESS RSA CONFERENCE

Microsoft Corp. Chairman and Chief Software Architect Bill Gates will address the RSA Conference 2004 in February.
<http://www.net-security.org/news.php?id=4255>

COUNTERFEITERS HAVE NEW IMAGING TECH, TOO

Forged checks have always been a problem, but increasingly sophisticated technology is making it easier to create these checks. Today, it is not uncommon to see forged checks of more than one million dollars-so banks must be on the alert.
<http://www.net-security.org/news.php?id=4256>

MY SYSADMIN IS A SPECIAL CONSTABLE

Parliamentary lobby group EURIM is working with MPs and industry groups to draw a blueprint for the fight against cyber-crime.
<http://www.net-security.org/news.php?id=4257>

VIRGINIA NABS TWO BIG SPAMMERS

Two prolific spammers from North Carolina are facing four felony charges for sending thousands of unsolicited e-mail pitches. Each count under Virginia's tough antispam law carries up to five years in prison and fines of up to \$2,500.
<http://www.net-security.org/news.php?id=4258>

INFOSEC 2003: 'ZERO-DAY' ATTACKS SEEN AS GROWING THREAT

"Zero-day" attacks that take advantage of software vulnerabilities for which there are no available fixes are emerging as a major threat to corporate security.
<http://www.net-security.org/news.php?id=4259>

THE CIO AS A SECURITY STRATEGIST

While some pundits say that security should be the responsibility of a separate individual, a chief security officer (CSO), corporate India still relies on its CIOs to protect information from the barbarians at the gate, says Rahul Neel Mani.
<http://www.net-security.org/news.php?id=4260>

LOS ALAMOS NATIONAL LAB SUFFERS SECURITY LAPSE

Officials say they can't account for a high-capacity disk and nine diskettes but that they may have been destroyed and simply not accounted for.
<http://www.net-security.org/news.php?id=4261>

COMMENTARY: DOS ATTACK--PAYING FOR OTHERS' PROBLEMS

It's hard to feel sympathy for the SCO Group these days. The litigious company has tried to lay claim to some key parts of the Linux operating system as part of its contract dispute with IBM, a move that has distracted an important part of software development.

[Reviews]

All reviews are located at:
<http://www.net-security.org/reviews.php>

OPEN SOURCE NETWORK ADMINISTRATION

You would think that with all the information that comes with a Linux or Unix operating system and the wealth of information that can be found online that a book of this type is unnecessary. When you pick it up you also realize it's not one of those mammoth guides. So what did the author put into this title to make it interesting for all you network administrators using or interested in using open source tools? Read on to find out.

<http://www.net-security.org/review.php?id=116>

WIRELESS HACKS

Wireless networks are something quite new for the majority of computer users. We know its pros and cons, its security issues, but we don't have so much experience to create our own workarounds, helping tools and similar gadgets. Flickenger has that kind of experience and unselfishly shares that knowledge with his readers.

<http://www.net-security.org/review.php?id=117>

[Software]

Windows software is located at:
