

**HNS Newsletter**

Issue 193 - 22.12.2003.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

---

**FREE GUIDE-128-bit encryption**

---

Thawte is one of the few companies that offers 128 bit supercerts. A supercerts will allow you to extend the highest allowed 128 bit encryption to all your clients even if they use browsers that are limited to 40 bit encryption.

**LINUX IN THE SECURITY CROSSHAIRS**

Compared to Windows, Linux has enjoyed a reputation as a stable and secure operating systems, thanks in large part to an enthusiastic open source community that plugs holes before they create problems.

<http://www.net-security.org/news.php?id=4265>

**WILL VOIP BE WIRETAP-READY?**

Widespread consumer Internet telephony could come with an easy-to-use government surveillance capability.

<http://www.net-security.org/news.php?id=4266>

#### E-SHOT IN THE TERRORIST'S ARM

The potential growth areas of cyber crime include virus-writing, hacking and auction fraud. According to an expert on Net security, fraudsters can easily reprint credit cards using the numbers pillaged during manual swipes and use it for transactions that appear quite legitimate on the face of it.

<http://www.net-security.org/news.php?id=4267>

#### E-CRIME GUIDELINES GOOD FOR SECURITY SALES

NHTCU framework could drive sales of security products and services to SMEs.

<http://www.net-security.org/news.php?id=4268>

#### HACKING FOR DOLLARS

The lone computer geek—a bit rebellious, but with a heart of gold—is being eclipsed by the hardened professional criminal, who uses the Internet for spying, stealing and extortion.

<http://www.net-security.org/news.php?id=4269>

#### MIGRATING TO ASTARO SECURITY LINUX

Fed up with expensive, complicated firewalls, e-gaming company opts for open-source security solution.

<http://www.net-security.org/news.php?id=4270>

#### SPAM WARS PLAY OUT ACROSS INTERNET

Rules are simple: One side floods the market, other side hits delete.

<http://www.net-security.org/news.php?id=4271>

#### SCO: 'WE HAVE PROOF DOS ATTACK WAS REAL'

The editors of NewsForge.com received an email from the SCO Group's public relations agency, with the subject "DDOS ATTACK ON SCO WAS REAL." Read more to see what was inside.

<http://www.net-security.org/news.php?id=4272>

#### THE YEAR OF THE WORM

The year 2003 has clearly been the worst in virus history. At the same time, the entire computer virus phenomenon saw its 20th birthday this year.

<http://www.net-security.org/news.php?id=4273>

#### CISCO RELEASES SECURITY PATCH FOR AIRONET

Aironet wireless access point users faced a rushed upgrade following a Cisco security alert two weeks ago.

<http://www.net-security.org/news.php?id=4274>

#### BUSH SET TO OK SPAM BILL - BUT CRITICS NOT CONVINCED

President Bush is expected to sign the "CAN-SPAM" bill Tuesday,

creating the first federal law regulating spam, a move backers say would be a major step in the war against e-mail solicitations for pornography, Viagra, diet pills, get-rich-quick schemes and the like.

<http://www.net-security.org/news.php?id=4275>

#### DON'T LEAVE HOLES IN YOUR PATCHING POLICIES

With network device vulnerabilities being discovered all the time, should you be monitoring patch management yourself, or is outsourcing the best option?

<http://www.net-security.org/news.php?id=4276>

#### STOP! ID THIEF!

Identity theft is common—but keeping a watchful eye on your credit card accounts is now easy.

<http://www.net-security.org/news.php?id=4277>

#### SCO ATTACKS KEEP COMING BACK

More Internet attacks cut off access to the SCO Group's servers this past weekend and again on Monday, as the Unix software company struggled to stop the hackers.

<http://www.net-security.org/news.php?id=4278>

#### XMAS VIRUS ON THE CARDS

Users warned to beware emails bearing .gifs.

<http://www.net-security.org/news.php?id=4279>

#### FASTER, MORE SECURE WIFI

But 802.11g does beat 802.11b in terms of security. The older WiFi used a scheme called WEP to defy eavesdropping attempts - but in practice, even semi-skilled hackers can defeat it.

<http://www.net-security.org/news.php?id=4281>

#### SALES LEAP FOR CORPORATE SECURITY APPLIANCES

Sales of high-end security appliances have surged in the third quarter of 2003, as enterprises install them in their main networks, having seen lower-end devices prove themselves in branch offices, according to the latest figures from analyst firm IDC.

<http://www.net-security.org/news.php?id=4282>

#### MAINFRAME SECURITY: GOOD ENOUGH FOR THE 21ST CENTURY?

The mainframe is the hub of a network of connected devices, making it ever more vulnerable to attacks.

<http://www.net-security.org/news.php?id=4283>

#### UKRAINIAN HACKER TO BE EXTRADITED

A Thai court Tuesday approved the extradition of a Ukrainian man to the United States for alleged computer crimes, including the

sale of counterfeit software that deprived American companies of millions of dollars.

<http://www.net-security.org/news.php?id=4284>

#### WINDOWS-STYLE SECURITY HELL STALKS MAC OS X? YEAH, YOU WISH...

Since Apple released Mac OS X, even the PC industry trade publications have raved about its quality, design, and features.

<http://www.net-security.org/news.php?id=4285>

#### CYBER THREATS RISK NET'S FUTURE

The hunger in poor nations for going online is not without danger.

With improved access, comes the threat of ever more internet security violations.

<http://www.net-security.org/news.php?id=4286>

#### APACHE AND SSL

When you want to transmit information through an untrusted channel (i.e. internet) and want to keep that information private, guarantee it's integrity and keep the authenticity then you need something like SSL.

<http://www.net-security.org/news.php?id=4287>

#### NESSUS, PART 2: SCANNING

This article, the second in the series, provides direction through the scanning process with Nessus, a powerful open source vulnerability scanner.

<http://www.net-security.org/news.php?id=4288>

#### TURN YOUR ANTIVIRUS STRATEGY INSIDE OUT

Computer viruses, worms, and hacker Trojan Horses are arriving with more frequency and with ever greater destructive power.

Current systems are doing little to stem the tide. Something has to change, and the answer may lie in "fencing in."

<http://www.net-security.org/news.php?id=4289>

#### WINDOWS 98'S DEMISE LEAVES QUESTIONS ON SECURITY

Microsoft's plan to stop issuing security patches for the Windows 98 next month could pose significant security challenges for organisations still running the operating system, experts have warned.

<http://www.net-security.org/news.php?id=4290>

#### PIVX DENIES MICROSOFT INVOLVED IN REMOVAL OF IE VULNS PAGE

Security solutions provider PivX Solutions has denied that Microsoft in any way influenced a decision to remove from its website a page which listed a fair number of unpatched vulnerabilities in Internet Explorer.

<http://www.net-security.org/news.php?id=4291>

#### A QUICK GUIDE TO LINUX BACKUP AND RECOVERY

IBM e-business architect Chris Walden is your guide through a nine-part developerWorks series on moving your operational skills from a Windows to a Linux environment. In this part, we take stock of what is on the system, and plan and implement regular backups with an eye to recovery as well as security.

<http://www.net-security.org/news.php?id=4292>

#### NASA SITES HIT BY ANTI-WAR HACKERS

NASA's Web sites have been attacked by anti-war hackers, says an online defacement archive.

<http://www.net-security.org/news.php?id=4294>

#### MICROSOFT WARNS: YOUR NEW PC IS ALREADY OUT OF DATE

Microsoft has warned consumers that the first thing they need to do when they open their new computers this Christmas is to protect and update them.

<http://www.net-security.org/news.php?id=4295>

#### FEDS UNITE ON SECURITY BENCHMARKS

A group of high-level IT officials in the federal government has begun collaborating on configuration benchmarks that government agencies could be required to use in future purchases of hardware and software.

<http://www.net-security.org/news.php?id=4296>

#### TRUSTWORTHY OPEN-SOURCE COMPUTING

Open-source software relies on the confidence we have that project leaders can detect and respond to security compromises. Here's why that needs to change.

<http://www.net-security.org/news.php?id=4297>

#### TWO MORE SCAM VICTIMS TELL THEIR TALES

At least two Australians have fallen foul of a money-for-nothing scam which offers victims 10 per cent of funds transferred into their bank account.

<http://www.net-security.org/news.php?id=4298>

#### VERISIGN ACQUIRES SECURITY SERVICE PROVIDER

VeriSign is buying managed security service provider Guardent.

<http://www.net-security.org/news.php?id=4299>

#### MICROSOFT UNLEASHES LEGAL ATTACK DOGS ON SPAMMERS

Microsoft is to hold a press conference today in New York with Eliot Spitzer, the city's attorney general, to promote a joint crackdown against spam.

<http://www.net-security.org/news.php?id=4301>

#### MICROSOFT GETS WINDOWS XP UPDATE READY

Microsoft is set to release a test version of the next update to Windows XP, which adds security features as well as improved support for Bluetooth and Wi-Fi networks.

<http://www.net-security.org/news.php?id=4302>

#### SECRET SERVICE AIRBRUSHES AERIAL PHOTOS

The White House and other government buildings get the Photoshop treatment when the agency tinkers with publicly funded overhead images of Washington D.C.

<http://www.net-security.org/news.php?id=4304>

#### MITNICK CALLS FOR HACKERS' WAR STORIES

Kevin Mitnick is collating tales of hackers' 'art' into a book.

<http://www.net-security.org/news.php?id=4305>

#### LINUX 2.6.0 KERNEL RELEASED

Version 2.6.0 of the Linux kernel is ready for business. Readers of the linux-kernel mailing list learned that testing of the open source operating system's new core ended late Wednesday, when Linus Torvalds sent an e-mail beginning with the cryptic phrase "The beaver is out of detox."

<http://www.net-security.org/news.php?id=4306>

#### TEEN HACKER BILLED FOR L21,000 DAMAGE

All because he wanted to download his tunes faster, the scamp...

<http://www.net-security.org/news.php?id=4307>

#### APPLE ISSUES PANTHER UPDATE; SECURITY FIXES TO FOLLOW

Apple Computer issued an update late Wednesday night for its Mac OS X, also known as Panther, and will come out with a security update for the operating system on Friday.

<http://www.net-security.org/news.php?id=4308>

#### THE MOST DESTRUCTIVE VIRUSES OF ALL TIME

With the SQL Slammer virus, more than 500,000 servers worldwide were infected, there was a general slowdown all over the Internet, and many corporations took their systems offline altogether.
