[Security news]

SOUTH KOREAN COMPANIES FINED \$55,000 FOR SENDING SPAM

The South Korean Fair Trade Commission has fined 25 companies for sending unsolicited commercial messages via email and mobile phones.

<http://www.net-security.org/news.php?id=4578>

NOKIA ADMITS MULTIPLE BLUETOOTH SECURITY HOLES

Nokia has admitted that a number of its Bluetooth handsets are

vulnerable to bluesnarfing - in which data can be stolen from a phone without the owner's knowledge.
<http://www.net-security.org/news.php?id=4579>

INTERNET INDUSTRY ASSOCIATION FUNDS ANTI-VIRUS WEBSITE
Australia's ISPs have called on local internet users to better protect themselves from viruses and worms, setting up a website that lets users download trial versions of anti-virus software.
<http://www.net-security.org/news.php?id=4580>

E-VOTING SYSTEMS FACE SECURITY QUESTIONS
A number of recent studies have raised questions about the security and reliability of electronic-voting machines that a growing number of cities, counties, and states are deploying.
<http://www.net-security.org/news.php?id=4581>

THE VIRUS UNDERGROUND
NYT has profiled several young computer virus writers around the world. A young Austrian wrote a Batch Trojan Generator which has simple options for constructing your next virus: format drive C? Overwrite every file?
<http://www.net-security.org/news.php?id=4582>

JUNIPER'S \$4B BUY SIGNALS SECURITY PUSH
In a blockbuster telecom equipment deal underlining the growing importance of network security, Juniper Networks will buy NetScreen Technologies for \$4 billion in stock.
<http://www.net-security.org/news.php?id=4583>

VERISIGN SAYS ONLINE FRAUD GROWING FAST
A report released Monday by VeriSign, the company that maintains the Internet's .com and .net domain registry, indicates that attempted site hacks, online fraud and identity theft are growing rapidly, as e-commerce proliferates.
<http://www.net-security.org/news.php?id=4585>

HOW MICROSOFT BOTCHED ANOTHER SECURITY PATCH
Will Microsoft ever learn? Just last week it quietly released another Internet Explorer fix--and caused headaches for both developers and end users.
<http://www.net-security.org/news.php?id=4586>

LINUX SECURITY ON THE ROPES
Veteran programmers have brought lifetimes of experience to Linux's development, including an awareness of the "gotchas" of OS security, says Paula Hunter, OSDL business-development director. "There are people who are working on [Linux] projects that probably have children that work at Microsoft."
<http://www.net-security.org/news.php?id=4587>

SECURING A WIRELESS NETWORK

Make sure contracts with Wi-Fi suppliers and users limit your liability.

<http://www.net-security.org/news.php?id=4588>

VIRUSES TARGET MYDOOM INFECTIONS

Two worms are attacking PCs already infected with the MyDoom virus.

<http://www.net-security.org/news.php?id=4589>

NETWORK SECURITY SPECIALISTS SEEK SEAMLESS DEFENSE

Day and night, the war of attrition rages in the beleaguered world of network security. Defenders throw up firewalls, download patches, and scramble to fend off the hundreds of thousands of attempted intrusions into worldwide enterprise data.

<http://www.net-security.org/news.php?id=4590>

CON ARTISTS GO 'PHISHING' FOR PERSONAL INFORMATION

Last month, thousands of Internet users got an urgent message: Update your bank account information now or your federal deposit insurance may lapse.

<http://www.net-security.org/news.php?id=4591>

THE FIRST FALLOUT FROM CYBERGATE

Did Republican staffers commit a crime by clicking on the "My Network Places" icon to access Democratic memos?

<http://www.net-security.org/news.php?id=4592>

REVIEW: FORTIGATE ENTERPRISE SECURITY APPLIANCE

The rack-mountable FortiGate-3600 does a good job providing enterprises with the six elements most vital for network security: firewall, anti-virus, VPN, intrusion detection, content filtering and traffic management.

<http://www.net-security.org/news.php?id=4593>

ONLINE SEARCH ENGINES LIFT COVER OF PRIVACY

Sitting at his laptop, Chris O'Ferrell types a few words into the Google search engine and up pops a link to what appears to be a military document listing suspected Taliban and al Qaeda members, date of birth, place of birth, passport numbers and national identification numbers.

<http://www.net-security.org/news.php?id=4594>

MICROSOFT UNCOVERS CRITICAL WINDOWS SECURITY HOLE

Microsoft on Tuesday warned of a serious security vulnerability in all of the current versions of Windows that not only allows an attacker to run code on vulnerable machines, but also enables him to install software and change and delete data.

<http://www.net-security.org/news.php?id=4596>

PROGRAMMER CREATES MASK FOR FILE-SHARERS

Wyatt Wasicek was so outraged by the recording industry's legal assault on users of free music-downloading sites that he decided to ride to the rescue. He created a program called AnonX that masks the Internet address of people who use file-sharing programs such as Kazaa.

<http://www.net-security.org/news.php?id=4597>

VERISIGN WORKS TO ID KID SURFERS

VeriSign plans to unveil on Wednesday a digital identity program for school-age children, which it says will bolster online safety for the growing number of young Web surfers.

<http://www.net-security.org/news.php?id=4598>

SAFELY CREATING TEMPORARY FILES IN SHELL SCRIPTS

This paper discusses how a programmer can write shell scripts that securely create temporary files in world/group writable directories.

<http://www.net-security.org/news.php?id=4599>

FIREWALLING HTTP TRAFFIC USING REVERSE SQUID PROXY

This article describes the case in which the Web server is on the local network and the client is connecting from the Internet. In other words, Squid is acting as a reverse proxy.

<http://www.net-security.org/news.php?id=4600>

SECURING INTRANETS WITH IPCOP

IPCop is an ideal, low-budget solution for intranets that require comprehensive network security.

<http://www.net-security.org/news.php?id=4601>

SUN SECURES SOLARIS WITH KERNEL REWRITE

In an effort to batten down its operating system, Sun Microsystems Inc. this week will unveil a sweeping set of security enhancements to Solaris, as well as new managed security services.

<http://www.net-security.org/news.php?id=4602>

UK.GOV ANNOUNCES HI-TECH ELITE POLICE SQUAD

The Home Office has announced a new team of specialist investigators that will take on the challenge of dealing with organised crime in a digital world.

<http://www.net-security.org/news.php?id=4603>

MICROSOFT LAUDS IE AS 'THE MOST SECURE BROWSER'

Internet Explorer is now just about the most secure browser available, says Microsoft - because so many security holes have been filled.

<http://www.net-security.org/news.php?id=4604>

PRIVACY IS IN THE HOUSE

The House is considering a bill that would require government agencies to explain how citizens' privacy might be affected by new regulations. After years of erosion, privacy may again be in fashion in D.C.

<http://www.net-security.org/news.php?id=4605>

THE PAST IS PRESENT IN THE PRESENT PASSWORD

The cardinal rule of password creation is skirting the obvious: No names of children or pets, no street addresses or car names. The ideal password is a random combination of letters and numbers, unfathomable to a potential intruder.

<http://www.net-security.org/news.php?id=4606>

MYDOOM AUTHOR MAY BE COVERING TRACKS

A worm that started spreading on Sunday places the source code for the original MyDoom virus on victims' hard drives, an action equivalent to planting evidence, antivirus experts said Tuesday.

<http://www.net-security.org/news.php?id=4608>

SPAM AND VIRUSES - THE EMERGENCE OF CONVERGENCE

The line between spammers and virus writers is becoming increasingly blurred.

<http://www.net-security.org/news.php?id=4609>

DDOS ATTACKS GO THROUGH THE ROOF

The growing prevalence of criminally motivated DDoS attacks calls for a fundamental rethink in how enterprises approach security.

<http://www.net-security.org/news.php?id=4610>

IBM, CISCO PARTNER ON SECURITY TECHNOLOGY

Computer maker IBM and Cisco Systems said Friday that they would tailor their security technology for computers and communications networks to work better together.

<http://www.net-security.org/news.php?id=4611>

SECURITY-ENHANCED LINUX PROVIDES A LOCKED DOWN OS

Don't be naive enough to think that because you run Linux you won't be a target for hackers. If you rely on Linux for hosting or transmitting sensitive data, you should check out Security-Enhanced Linux, created by the U.S. NSA and available for free.

<http://www.net-security.org/news.php?id=4612>

IBM CENTRALIZES SECURITY FOR THE ZSERIES MAINFRAME

Continuing its broad strategy of infrastructure simplification, IBM Thursday introduced new security features for its latest mainframe operating system software to help centralize control of an environment that requires several tiers of security.

<http://www.net-security.org/news.php?id=4613>

WINDOWS CODE LEAK 'NOT A SECURITY THREAT'

Security experts say Microsoft's embarrassing Windows 2000 source code leak is unlikely to have given hackers more ammunition.

<http://www.net-security.org/news.php?id=4614>

CLIFF STANFORD CHARGED WITH HACKING REDBUS

Redbus Interhouse founder Cliff Stanford was today charged with conspiracy to blackmail and computer crime offences by officers of the UK's National Hi-Tech Crime Unit.
