**ALERT: Hackers New Trick- LDAP Injection Attacks- FREE White Paper**

---

It's as simple as placing additional LDAP query commands into a Web form input box giving hackers complete access to all your backend systems! Firewalls and IDS will not stop such attacks because LDAP Injections are seen as valid data.

**Download this \*FREE\* white paper from SPI Dynamics for a complete guide to protection!**

**AN ANTITRUST ANTIDOTE FOR SOFTWARE SECURITY**

Lawmakers have focused much attention on information security issues during the past year amid a spike in identity theft, viruses and other online criminal activity. The White House approved a national cybersecurity plan more than a year ago but it contains no requirements for businesses to improve their electronic security practices.

<http://www.net-security.org/news.php?id=5017>

### SECURITY FOCUS OR NOT, CAN AN UNREPENTANT MICROSOFT BE TRUSTED?

Microsoft is working hard to make good on the promises making security job #1, and with Windows XP Service Pack 2 just a few months away we're all looking forward to this very important first step.

<http://www.net-security.org/news.php?id=5018>

### OS X TROJAN HORSE IS A NAG

The first Trojan for Mac OS X is anything but, experts say, and Thursday's warning from antivirus company Intego was unnecessarily alarmist.

<http://www.net-security.org/news.php?id=5019>

### CYBERSECURITY TASK FORCE SPARKS DEBATE

Rift develops over who decides standards.

<http://www.net-security.org/news.php?id=5020>

### NEW INTEL CHIPS ENSURE BETTER SECURITY

The next generation of Intel Corp. microprocessors for cell phones and handheld computers will, for the first time, include hard-wired security features that can enforce copy protection and help prevent hackers from wreaking havoc on wireless networks.

<http://www.net-security.org/news.php?id=5021>

### CONCERN GROWS OVER BROWSER SECURITY

Browser-based security threats are on the rise and may pose the next significant risk to information technology operations, according to a technology trade association.

<http://www.net-security.org/news.php?id=5022>

### SECURITY TASK FORCE TO CEOS: MAKE IMPROVEMENT, OR ELSE

A computer industry task force working on cybersecurity with the Homeland Security Department urged top corporate management to initiate robust security measures now or face possible regulation on the issue later.

<http://www.net-security.org/news.php?id=5023>

### SECURING WIRELESS LANS WITH PEAP AND PASSWORDS

This is the second security solution guide for WLANs from Microsoft.

<http://www.net-security.org/news.php?id=5024>

### THREATS GIVE SECURITY BOOST

Widespread fear of hacking, viruses and worms loosens company purse strings.

<http://www.net-security.org/news.php?id=5027>

#### CHAT, COPY, PASTE, PRISON

When a New Hampshire judge threw out chat-log evidence against an accused pedophile, he illustrated just how jumbled and confused Internet privacy law can be.

<http://www.net-security.org/news.php?id=5028>

#### PHOTO RECOGNITION SOFTWARE GIVES LOCATION

For a small fee, photo recognition software on a remote server works out precisely where you are, and sends back directions that will get you to your destination.

<http://www.net-security.org/news.php?id=5029>

#### SOFTWARE WARFARE

The debate over security is an interesting one, as both the Linux community and Microsoft claim to have the more secure technology.

<http://www.net-security.org/news.php?id=5030>

#### USER ACCESS SYSTEM TO IMPROVE IT SECURITY

Northumbrian Water is responding to demands from industry regulators to demonstrate best practice in IT security by rolling out software to control the access rights of 2,000 staff to the firm's Windows and Unix systems.

<http://www.net-security.org/news.php?id=5031>

#### ATTACKERS INFILTRATING SUPERCOMPUTER NETWORKS

Unknown attackers have compromised a large number of Linux and Solaris machines in high-speed computing networks at Stanford University and other academic research facilities, according to a university advisory.

<http://www.net-security.org/news.php?id=5032>

#### MICROSOFT WARNS OF A SCORE OF SECURITY HOLES

Microsoft released on Tuesday fixes that cover at least 20 Windows flaws, several of which could make versions of the operating system vulnerable to new worms or viruses.

<http://www.net-security.org/news.php?id=5033>

#### USDA TO CERTIFY SECURITY

Officials at the Agriculture Department, with 29 agencies and more than 500 computer information systems, expects to spend as much as \$60 million to certify and accredit those systems during the next five years.

<http://www.net-security.org/news.php?id=5034>

#### WI-FI SECURITY STILL POOR

Wireless network protection neglected by more than half of UK businesses.

<http://www.net-security.org/news.php?id=5035>

#### UK FIRMS FAILING SECURITY CHALLENGE

Despite repeated warnings, many British businesses haven't come to grips with the security needed for wireless networks or remote access.

<http://www.net-security.org/news.php?id=5036>

#### LINUX 2.6: COMPILING AND INSTALLING

This article looks at the process of compiling and installing a new kernel safely, without overwriting the existing kernel.

<http://www.net-security.org/news.php?id=5037>

#### MORE TO BLAME FOR VIRUS EPIDEMIC

There is an interesting new dynamic to the recent malicious code outbreaks that have plagued corporations.

<http://www.net-security.org/news.php?id=5038>

#### SECURITY BODY SUPPORTS BIOMETRICS

SIA uses fingerprint authentication to boost security.

<http://www.net-security.org/news.php?id=5039>

#### STIFF SPAM PENALTIES URGED

Spammers convicted under a recently enacted national antispam law could face stiff sentences under newly finalized government recommendations.

<http://www.net-security.org/news.php?id=5040>

#### BASIC WEB SESSION IMPERSONATION

This article gives a basic introduction to common flaws in web applications that allow a malicious user to hijack a legitimate user's web session. Some practical countermeasures that reduce this threat are also discussed.

<http://www.net-security.org/news.php?id=5041>

#### AUDITORS WORKING ON CYBER-RISK STANDARD

Plans by an industry consortium to develop a checklist to assess cyber-threats could help IT directors justify security spending and help protect companies against hackers, according to IT directors and industry experts.

<http://www.net-security.org/news.php?id=5042>

#### 9/11 'ENTREPRENEUR' ON FRAUD RAP

A Californian man who claimed to be developing post-9/11 face recognition system has been arrested by Feds probing allegations of fraud.

<http://www.net-security.org/news.php?id=5043>

#### FEDS TO USE 'FEDERATED' ID CHECKS

Federal government officials will rely on other organizations to

verify users' identities when they apply online for government loans or jobs.  
<http://www.net-security.org/news.php?id=5044>

#### THE FRONT ON INTERNET TERRORISM

With attacks from spam, worms, malware, adware, and hackers, Internet security will become so tight that nothing will get through, not even the good data.  
<http://www.net-security.org/news.php?id=5045>

#### HIPAA SECURITY: YOU CAN RUN, BUT YOU CAN'T HIDE

This short course targets physicians who need to handle the looming HIPAA security deadlines.  
<http://www.net-security.org/news.php?id=5046>

#### IT SECURITY HAS NEVER BEEN SO NECESSARY

IT security is very much in the spotlight at the moment. And, unlike some IT trends, there is no danger that it is merely enjoying its 15 minutes of fame.  
<http://www.net-security.org/news.php?id=5047>

#### NETWORK VULNERABILITIES

Basic network security issues have changed very little over the past decade.  
<http://www.net-security.org/news.php?id=5048>

#### NO SILVER BULLET FOR SECURITY

Phil Cracknell, chief technology officer at NetSurity, considers the need for continued corporate management investment in security.  
<http://www.net-security.org/news.php?id=5049>

#### WATCH OUT - THERE'S AN ID THIEF ABOUT

When someone says 'get a life', they don't generally mean 'take mine'. But that's exactly what happened to more than 100,000 people in the UK last year.  
<http://www.net-security.org/news.php?id=5051>

#### PUSHING TO WIRETAP 'PUSH TO TALK'

U.S. cell phone service providers are willing to wiretap "push to talk" phone calls, but only one has the technological capability to do so, according to sources familiar with the situation.  
<http://www.net-security.org/news.php?id=5052>

#### U.K. SPAMMERS ELUDE SHUTDOWN

Legislation passed last year to clamp down on U.K. companies that send unsolicited e-mail over the Internet is unlikely to result in any prosecutions until 2005.

<http://www.net-security.org/news.php?id=5053>

#### HOW COOPERATION CAN BEAT VIRUSES

Prevention truly is better than cure - and there are steps that can be taken to teach a new computing generation to protect themselves.

<http://www.net-security.org/news.php?id=5054>

-----

#### [ Vulnerabilities ]

**ALERT: Hackers New Trick- LDAP Injection Attacks- FREE White Paper**  
-----

It's as simple as placing additional LDAP query commands into a Web form input box giving hackers complete access to all your backend systems! Firewalls and IDS will not stop such attacks because LDAP Injections are seen as valid data.

**Download this \*FREE\* white paper from SPI Dynamics for a complete guide to protection!**
