

**HNS Newsletter**

Issue 212 - 10.05.2004.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

-----  
Windows Server System is integrated server infrastructure software from Microsoft that is designed to work together and interact seamlessly with other data and applications across your IT environment so you can reduce the costs of ongoing operations, deliver highly reliable and secure IT infrastructure, and drive valuable new capabilities for the future growth of your business.

- 9) Virus news

**[ Security news ]**

-----  
**U.S. CHARGES 4 UNDER NEW LAW AGAINST 'SPAM' E-MAILS**  
Federal authorities say they managed to pierce the murky underworld of Internet spam e-mails, filing the first criminal charges under the government's new "can spam" legislation.  
<http://www.net-security.org/news.php?id=5130>

**FIRMS SPEND MORE ON PRINTERS THAN SECURITY**  
Users are spending less on security than printers, according to a report from IDC. However, the company does not think that pouring in more money is necessarily the answer.  
<http://www.net-security.org/news.php?id=5132>

#### WHY YOUR PERSONAL FIREWALL COULD BE OBSOLETE

If your business has turned the use of personal firewalls into a required countermeasure, now's a good time to start thinking more strategically before buying any more personal firewall technology from a third party.

<http://www.net-security.org/news.php?id=5133>

#### LINUX HAS ITS OWN SECURITY HOLES

There may be fewer viruses designed to attack the Linux operating system, but experts warn that Linux is no more bulletproof than any other system.

<http://www.net-security.org/news.php?id=5134>

#### INTRUDER ALERT - PREPARING FOR THE WORST-CASE SCENARIO

Is the "worst-case scenario" thinking helpful when it comes to network security and can imagining an extremely potent attack give IT security personnel a better picture of their infrastructure's strengths and weaknesses?

<http://www.net-security.org/news.php?id=5135>

#### STEAMED ABOUT SECURITY

Lawmakers increasingly push agencies for specifics.

<http://www.net-security.org/news.php?id=5136>

#### GIVE IT UP: INFO FOR PROTECTION

Derek V. Smith sees bad people lurking everywhere: terrorists, quack doctors, identity thieves. And yet Smith colors himself an optimist, insisting that society can protect itself from such dicey characters, using information as a shield.

<http://www.net-security.org/news.php?id=5137>

#### MICROSOFT UNVEILS NEW ANTIPIRACY TOOLS

Microsoft has released details of a long-delayed update to its content protection technology, offering new features aimed at bringing piracy-proof digital content to mobile devices and home networks.

<http://www.net-security.org/news.php?id=5141>

#### BIOMETRIC IDS OK WITH U.K.

About 80 percent of 1,000 British adults recently surveyed say they want a biometric identification card, citing concerns about illegal immigration and identity theft.

<http://www.net-security.org/news.php?id=5142>

#### NETSKY AUTHORS POSSIBLY PENNED SASSER

The unknown team of programmers who created the latest variant of the Netsky virus claim to be the authors of the Sasser worm --and researchers have found evidence that supports that assertion.

<http://www.net-security.org/news.php?id=5143>

#### MITNICK BUSTS BOMB HOAXER

Ex-hacker Kevin Mitnick is a hero to the small town of River Rouge, Michigan, after using his tech skills to help officials nab the culprit behind a harrowing series of bomb threats.

<http://www.net-security.org/news.php?id=5144>

#### WIFI HIGH CRIMES

Before WiFi can entirely fulfill its promise, we'll have to confront an oppressive latticework of outdated criminal laws.

<http://www.net-security.org/news.php?id=5145>

#### SASSER WORM SPREADING QUICKLY

Computer security experts are dealing with at least four variants of a worm that is spreading quickly through Windows operating systems.

<http://www.net-security.org/news.php?id=5146>

#### MICROSOFT SIGNS SECURITY PACT WITH GERMANY

Microsoft signed a security-related agreement Monday with the federal government of Germany, where the software giant has seen numerous challenges involving open-source products.

<http://www.net-security.org/news.php?id=5147>

#### WE ARE ALL SECURITY CUSTOMERS

National security is a hot political topic right now, as both presidential candidates are asking us to decide which one of them is better fit to secure the country.

<http://www.net-security.org/news.php?id=5148>

#### 'DECEPTIVE DUO' HACKER CHARGED

A Florida man has been charged in federal court in Washington DC for his alleged role as one half of the high-profile hacking team "The Deceptive Duo".

<http://www.net-security.org/news.php?id=5149>

#### BOFFINS BEEF-UP WIFI SECURITY

Security sits high on the WiFi development agenda this year as global adoption of the technology reaches a high.

<http://www.net-security.org/news.php?id=5150>

#### WORM DAMAGE COULD HAVE BEEN REDUCED

Far fewer computers would have been disabled by the latest Internet worm had their owners configured them to automatically get the latest security fixes.

<http://www.net-security.org/news.php?id=5151>

#### STUDENT HACKS ITUNES FOR COMPATIBILITY

Weakness in Apple's authentication technology is music to iTunes

hacker's ears.

<http://www.net-security.org/news.php?id=5152>

#### CYBER-CRIME FIGHT MAY NEED NEW LAWS

Computer Misuse Act needs updating 'to address the network world', experts tell inquiry.

<http://www.net-security.org/news.php?id=5153>

#### WORM CRASHES COASTGUARD COMPUTERS

Computers at the Coastguard Agency were among millions of PCs hit yesterday by a new worm that spreads over the internet.

<http://www.net-security.org/news.php?id=5154>

#### SECURITY FUNDS DRY UP

On May 3, federal civilian agencies were put on notice that they could have a harder time next year finding money for certifying their computer systems' security.

<http://www.net-security.org/news.php?id=5155>

#### HUNT ON FOR SASSER WORM CULPRIT

Security experts began the daunting task on Wednesday of trying to track down the authors of "Sasser," a tenacious computer worm expected to infect millions of machines before it runs its course.

<http://www.net-security.org/news.php?id=5156>

#### UK POLICE ARREST 12 PHISHING MULE SUSPECTS

The UK's National Hi-Tech Crime Unit (NHTCU) today arrested six men and six women from Eastern Europe suspected of laundering funds from bank accounts seized through phishing scams.

<http://www.net-security.org/news.php?id=5157>

#### SECURITY HAS ITS PRIVILEGES

Maybe an innocent bystander can be excused for not seeing and stopping a crime about to happen, but IT security administrators can't.

<http://www.net-security.org/news.php?id=5158>

#### SASSER IS FASTEST WRITTEN WINDOWS WORM

The "Sasser" computer worm now plaguing computers around the world was based on a critical software flaw revealed by Microsoft just 17 days before the worm's release.

<http://www.net-security.org/news.php?id=5159>

#### WORMS PART OF IT DIET

Some security experts believe that it's only a matter of time before a "superworm" is unleashed. Others have brushed it aside as mere myth.

<http://www.net-security.org/news.php?id=5160>

#### WI-FI SECURITY IMPROVES

New standards will be certified and products shipping this year, say developers.

<http://www.net-security.org/news.php?id=5161>

#### SECURITY FIRMS TEAM FOR NEW PRODUCT

Antivirus-technology companies Network Associates and Check Point Software co-released on Wednesday an automated Internet and desktop security package designed for small businesses.

<http://www.net-security.org/news.php?id=5162>

#### CUSTOMERS WON'T TOLERATE SECURITY BREACHES

Latest research shows that firms who fall victim to hacking, viruses or phishing may have to worry about more than just patching up their systems.

<http://www.net-security.org/news.php?id=5163>

#### LONGHORN WILL FEATURE 'SECURE' COMPONENTS

Microsoft says it still wants to incorporate major security features into its next operating system.

<http://www.net-security.org/news.php?id=5164>

#### DEFENCES TESTED BY VIRUS ATTACKS

The reaction times of companies are being tested by the accelerating rate that new viruses, worms and other forms of malicious code are appearing.

<http://www.net-security.org/news.php?id=5165>

#### LONGHORN: MICROSOFT'S SECURITY BULL?

"Ultimately, [Microsoft's forthcoming Windows XP Service Pack 2] will be a solution to many of these [security] problems. But when it first comes out, the situation will be the same as how people treat patches now," says Jimmy Kuo, a research fellow at Network Associates.

<http://www.net-security.org/news.php?id=5166>

#### SMALL BUSINESSES LEFT VULNERABLE TO VIRUS ATTACKS

As the new Sasser virus does the rounds, research shows almost two-thirds of the country's small businesses have been the victim of a malicious online attack.

<http://www.net-security.org/news.php?id=5167>

#### U.S. HIT BY RISE IN 'PHISHING' ATTACKS

An estimated one in five Americans were the target of a "phishing" attack in the past year, as the number of such Internet scams rose dramatically, according to a study released on Thursday.

<http://www.net-security.org/news.php?id=5168>

#### PRISON TIME FOR CYBER STOCK SWINDLER

Teen scammer hacked a brokerage account to dump worthless Cisco options. Diary entry: "Even if I go to jail -- big deal -- I will learn something there. Hahaha."

<http://www.net-security.org/news.php?id=5169>

#### NET WATCHERS WARY OF SASSER FALLOUT

Though the damage wrought by Sasser failed to reach the levels of MSBlast and other major infections, security experts are warning that there could still be more trouble to come from the worm.

<http://www.net-security.org/news.php?id=5170>

#### BRITAIN'S BIOMETRIC ID CARDS POSTPONED

Technical problems have delayed the British government's trials for biometric ID cards by three months.

<http://www.net-security.org/news.php?id=5171>

#### MAC VIRUS FEARS GROW

Recent vulnerabilities could make Macs vulnerable to virus attacks.

<http://www.net-security.org/news.php?id=5172>

#### SASSER INFECTION RATE ACCELERATES

The rapidly evolving Sasser computer worm has torn across the internet, disrupting home computer and corporate systems, including Westpac Bank, and stoking fears of more potent outbreaks to come.

Windows Server System is integrated server infrastructure  
software from Microsoft that is designed to work together and  
interact seamlessly with other data and applications across your  
IT environment so you can reduce the costs of ongoing operations,  
deliver highly reliable and secure IT infrastructure, and drive  
valuable new capabilities for the future growth of your business.
