

**HNS Newsletter**

Issue 213 - 17.05.2004.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

-----  
Windows Server System is integrated server infrastructure software from Microsoft that is designed to work together and interact seamlessly with other data and applications across your IT environment so you can reduce the costs of ongoing operations, deliver highly reliable and secure IT infrastructure, and drive valuable new capabilities for the future growth of your business.

-----  
**WINDOWS XP SERVICE PACK 2 EVEN FOR UNLICENSED USERS**

Both legitimate and unlicensed users of Microsoft's XP operating system software will be able to download the Service Pack 2 security patch for free.

<http://www.net-security.org/news.php?id=5175>

#### E-POSTMARK MAY THWART CYBER CROOKS

"Right now, none of the ISPs or router vendors is motivated to act, because Microsoft has promised to solve the spam problem by 2006," Penn State professor George Kesidis said. "They have the presumptive monopoly, and they're calling the shots."

<http://www.net-security.org/news.php?id=5176>

#### WI-FI SECURITY STANDARD TO REQUIRE NEW HARDWARE

In June the IEEE is expected to finally ratify the 802.11i security standard that uses for the first time AES (Advanced Encryption Standard) technology, a powerful 128-bit encryption technology.

<http://www.net-security.org/news.php?id=5177>

#### POLICE: SASSER SUSPECT CONFESSES

A German high school student has confessed to creating the "Sasser" worm that generated chaos across the globe by infecting hundreds of thousands of computers, authorities said Saturday.

<http://www.net-security.org/news.php?id=5178>

#### MYSTERY OF MS'S MISSING AV SOFTWARE

Microsoft's plans to improve the security of Windows through the purchase of an anti-virus company almost a year ago appear to be stuck in limbo. The software giant entered the AV market with the surprise acquisition of little known Romanian AV firm GeCAD Software for an undisclosed sum in June last year.

<http://www.net-security.org/news.php?id=5179>

#### MICROSOFT MODIFYING PALLADIUM

Company officials said that a published report that Microsoft has decided to do away with the hardware and software security project was completely inaccurate.

<http://www.net-security.org/news.php?id=5180>

#### COMBATING THE CYBER CRIMINALS

Detective Chief Superintendent Len Hynds, Head of the National Hi-Tech Crime Unit discusses the problems associated with hi-tech crime.

<http://www.net-security.org/news.php?id=5182>

#### COMBATING INTERNET WORMS

In recent years, not only has the number of network and computer attacks been on the rise, but also the level of complexity and sophistication with which they strike. The most common and perhaps most damaging of these attacks are called worms.

<http://www.net-security.org/news.php?id=5183>

#### A GUIDE TO CENTRALIZED SPAM AND VIRUS FILTERING

This article explores the integration of Sendmail, MIMEDefang, ClamAV, SpamAssassin, and Vipul's Razor as a partial measure against

spam and viruses.

<http://www.net-security.org/news.php?id=5184>

#### COURT TAKES GAG OFF ANTISPAM SERVICE

A district court judge has rescinded a temporary restraining order against antispam operation SpamCop, in an early blow to a case brought by self-professed "Spam King" Scott Richter.

<http://www.net-security.org/news.php?id=5226>

#### CYBER-CRIME LAWS HURT MORE THAN THEY HELP

The Council of Europe's Convention on Cybercrime is too far-reaching.

<http://www.net-security.org/news.php?id=5186>

#### HAND OVER SECURITY

Physical and information security have been converging, often under the control of IT. But companies are increasingly moving the role of policing security out of IT and into the hands of an independent CSO. Here's why you should consider doing the same.

<http://www.net-security.org/news.php?id=5187>

#### CAN MICROSOFT BOUNTY END VIRUSES?

Microsoft's \$5 million reward for antivirus informants may help catch script kiddies such as the German teenager suspected of authoring a variant of the Sasser worm, but it is unlikely to have any effect on virus writers working for organized crime syndicates, according to security experts.

<http://www.net-security.org/news.php?id=5188>

#### PHISHING SPREADS IN EUROPE

Phishing is slowly becoming more common in languages like Spanish, French, Dutch and German, a senior official of a company that markets security devices for online transactions says.

<http://www.net-security.org/news.php?id=5189>

#### SECURITY THREATS RAISE CONCERNS ABOUT BLUETOOTH

Some IT managers take steps to limit wireless use; vendors claim risks aren't widespread.

<http://www.net-security.org/news.php?id=5190>

#### HP DEBUTS RFID SERVICES

Hewlett-Packard unveiled on Monday services for companies trying to start radio frequency identification projects.

<http://www.net-security.org/news.php?id=5191>

#### EXPERTS: TIMING OF NEW SASSER WORM RAISES QUESTIONS

Questions raised on whether sole author is in custody.

<http://www.net-security.org/news.php?id=5192>

#### DMCA CHALLENGE TO BE CONSIDERED THIS WEEK

The Digital Millennium Copyright Act, better known as the DMCA, is a travesty of law.

<http://www.net-security.org/news.php?id=5193>

#### LOTTERY SCAMS NEW FLAVOUR OF THE MONTH

Lottery scam emails are increasing at an alarming rate, according to Fraudwatch International, the Australian website that protects consumers from identify theft.

<http://www.net-security.org/news.php?id=5194>

#### WHY COMPUTER SECURITY'S SO PRIMITIVE

We've only been working on it for a few years.

<http://www.net-security.org/news.php?id=5195>

#### SPEC IN WORKS TO SECURE WIRELESS NETWORKS

The Trusted Computing Group said Monday that it is working on a specification to ensure that wireless clients connecting to a network won't serve as a back door to worms and crackers.

<http://www.net-security.org/news.php?id=5196>

#### UNDERSTANDING TCP RESET ATTACKS

To better understand the reality of this threat, KernelTrap spoke with Theo de Raadt, the creator of OpenBSD, an operating system which among other goals proactively focuses on security.

<http://www.net-security.org/news.php?id=5197>

#### MICROSOFT PATCHES NEW WINDOWS FLAW

Microsoft on Tuesday detailed a new vulnerability in Windows XP and Windows Server 2003 that could enable an attacker to remotely execute malicious code.

<http://www.net-security.org/news.php?id=5201>

#### VIRUS ARRESTS CONTINUE, AS DO WORMS

Gartner research vice president Richard Stiennon told TechNewsWorld that the recent arrests are likely to deter lower-level virus writers.

<http://www.net-security.org/news.php?id=5202>

#### SASSER COPYCATS GET BUSY

Copypat virus authors have released a pair of worms targeted at the same vulnerability in Microsoft's operating system exploited by the infamous Sasser worm.

<http://www.net-security.org/news.php?id=5203>

#### MICROSOFT CORRECTS: NO XP SP2 FOR PIRATED COPIES

Despite reports indicating that Microsoft Corp. was planning to allow users with pirated copies of Windows XP to install Service Pack 2,

the company has confirmed to eWEEK.com that this will not be the case.

<http://www.net-security.org/news.php?id=5204>

#### RSA FOUNDERS GIVE PERSPECTIVE ON CRYPTOGRAPHY

Rivest, Shamir and Adleman implemented public-key cryptography in the 1970s following the landmark work of Whitfield Diffie, Martin Hellman and Ralph Merkle. They then founded RSA Security, which became one of the most respected security companies in the world.

<http://www.net-security.org/news.php?id=5205>

#### ANALYST: SECURITY WOES ADD TO WINDOWS COST

Prominent security analyst John Pescatore has put a new twist on the Windows cost of ownership debate with a call for enterprises to add the expense of managed intrusion prevention software to the price of Microsoft's operating systems.

<http://www.net-security.org/news.php?id=5206>

#### ANTIVIRUS COMPANIES MUTING FALSE ALARMS

They were wrong, and they were annoying, so now they've been stopped.

<http://www.net-security.org/news.php?id=5207>

#### BROWSER HIJACKERS RUINING LIVES

Malicious programs called browser hijackers install a lot of nasty stuff on people's computers. Some victims are facing firings, divorces and even criminal prosecution.

<http://www.net-security.org/news.php?id=5208>

#### 'WHISPERING KEYBOARDS' COULD BE NEXT ATTACK TREND

Listen to this: Eavesdroppers can decipher what is typed by simply listening to the sound of a keystroke, according to a scientist at this week's IEEE Symposium of Security and Privacy in Oakland, Calif.

<http://www.net-security.org/news.php?id=5209>

#### APACHE AUTHENTICATION

This article describes authentication and how to control user access.

<http://www.net-security.org/news.php?id=5210>

#### FEDS COMBINE SMART CARD BUYS

Five federal agencies have agreed to pool their smart card needs into a large contract buy of up to 40 million cards during the next three years.

<http://www.net-security.org/news.php?id=5211>

#### A THIRD OF UK CORPORATES OPEN TO HACKERS

Firms ignoring basic flaws as they fight high-risk vulnerabilities, warns research.

<http://www.net-security.org/news.php?id=5212>

#### US CONSIDERS "LEGALISING HACKING" WITH COPYRIGHT RULING

The people v the entertainment industry - who carries the most sway?  
<http://www.net-security.org/news.php?id=5213>

#### WHY ARE VIRUS WRITERS SO TOUGH TO CATCH?

The fight to rout Sasser and its ilk is fraught with ethical ambiguities. "Out of the 75,000 viruses that are written each year, all but 1,000 never infect anybody. So is it a crime to just write a virus?" asked David Perry of Trend Micro. "We are an open society. Do we give up all those [liberties] that make us Americans?"  
<http://www.net-security.org/news.php?id=5214>

#### MICROSOFT TO BATTLE SPYWARE

Microsoft says the upcoming release of Windows XP Service Pack 2 will make it much harder to sneak deceptive software onto users' computers. Is it game over for spyware authors?  
<http://www.net-security.org/news.php?id=5215>

#### WALLON VIRUS WRECKS WINDOWS MEDIA PLAYER

A new mass-mailing virus called Wallon, which destroys Windows media player and is activated when a user tries to play MP3 or video files from an infected PC, was discovered in Europe on Tuesday.  
<http://www.net-security.org/news.php?id=5216>

#### ACOUSTIC CRYPTANALYSIS

Preliminary analysis of acoustic emanations from personal computers shows them to be a surprisingly rich source of information on CPU activity.  
<http://www.net-security.org/news.php?id=5217>

#### NETWORLD+INTEROP SECURITY BRIEFING

Enterprises on the lookout for answers to security struggles have plenty of wares to pick from at the NetWorld+Interop 2004 conference, as suppliers such as FaceTime Communications, RedSiren and Senforce Technologies introduced offerings.  
<http://www.net-security.org/news.php?id=5218>

#### SYMANTEC PATCHES FOUR CRITICAL FIREWALL FLAWS

Symantec has issued patches for most of its firewall and antivirus products in order to fix four serious security holes.  
<http://www.net-security.org/news.php?id=5219>

#### GERMAN POLICE RAID FIVE HOMES IN SASSER CASE

German police have widened the hunt for the vandals responsible for the distribution of the infamous Sasser and NetSky worms by raiding the homes of five new suspects. All are close to the home of Sven Jaschan, the prime suspect.  
<http://www.net-security.org/news.php?id=5220>

#### 'SURVIVOR' SITE CONTAINS MALICIOUS CODE

Code embedded in a site likely to be surfed by fans of the 'Survivor' TV show takes advantage of known software flaws.

<http://www.net-security.org/news.php?id=5222>

#### PRIVACY JAM ON CALIFORNIA HIGHWAY

The pictures show a driver peering angrily out his window at the photographer. In one, his middle finger is raised at the camera. In the last, his license plate is captured on digital film as he drives away.

<http://www.net-security.org/news.php?id=5223>

#### HELP: I GOT HACKED. NOW WHAT DO I DO?

So, you didn't patch the system and it got hacked. What to do? The Security Program Manager at Microsoft Corporation will tell you.

<http://www.net-security.org/news.php?id=5224>

#### CONGRESS MULLS REVISIONS TO DMCA

Congress has taken a step toward revising the Digital Millennium Copyright Act, which has attracted extensive criticism over the past six years.

<http://www.net-security.org/news.php?id=5225>

#### COURT TAKES GAG OFF ANTISPAM SERVICE

A Northern California District Court judge issued a temporary restraining order last week to prevent SpamCop from interfering with messages sent by alleged junk e-mailer OptInRealBig.com, whose owner and president is Richter.

### ID\_BANK

ID\_Bank is a secure identity and password protection system.

<http://www.net-security.org/software.php?id=91>

#### OS-SIM

OSSIM is a distribution of open source products that are integrated to provide an infrastructure for security monitoring.  
<http://www.net-security.org/software.php?id=304>

#### SMOKEPING

With SmokePing you can measure latency, latency distribution and packet loss in your network.  
<http://www.net-security.org/software.php?id=178>

#### MIMEDEFANG

MIMEDefang is a flexible MIME email scanner designed to protect Windows clients from viruses.  
<http://www.net-security.org/software.php?id=214>

#### TINYCA

TinyCA is a simple GUI written in Perl-Gtk to manage a small certification authority. It works as a frontend to OpenSSL.  
<http://www.net-security.org/software.php?id=308>

#### LINUX-VSERVER

Linux-VServer allows you to create virtual private servers and security contexts which operate like a normal Linux server, but allow many independent servers to be run simultaneously in one box at full speed.  
<http://www.net-security.org/software.php?id=527>

#### ROOTKIT HUNTER

Rootkit scanner is scanning tool to ensure you for about 99.9% you're clean of nasty tools.  
<http://www.net-security.org/software.php?id=531>
