

**HNS Newsletter**

Issue 216 - 07.06.2004.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

-----  
**ADVERTISEMENT**  
-----

Windows Server System is integrated server infrastructure software from Microsoft that is designed to work together and interact seamlessly with other data and applications across your IT environment so you can reduce the costs of ongoing operations, deliver highly reliable and secure IT infrastructure, and drive valuable new capabilities for the future growth of your business.

-----  
**REPORT: FDIC DATA VULNERABLE**

Lax security in the Depression-era agency that protects American's bank deposits is the focus of a report by the General Accounting Office. The study says major losses of money, information and other data are possible.

<http://www.net-security.org/news.php?id=5313>

**WI-FI IS HOT, SECURITY IS NOT**

Mike Outmesguine ventured off to sniff out wireless networks between

Los Angeles and San Francisco. He got a big whiff of insecurity.  
<http://www.net-security.org/news.php?id=5314>

#### HNS NEWSLETTER ISSUE 215 HAS BEEN RELEASED

You can read the Newsletter in TXT or PDF format. If you haven't done it yet, consider subscribing. This issue is sponsored by Microsoft.  
<http://www.net-security.org/news.php?id=5315>

#### MICROSOFT, SUN SECURITY PATHS DIVERGE

Identity management is rapidly becoming a new battleground for rivals Microsoft Corp. and Sun Microsystems Inc., each of which is committing support for different standards.  
<http://www.net-security.org/news.php?id=5316>

#### THE GRSECURITY PROJECT IS ABOUT TO DISAPPEAR

Beginning May 31, 2004, development of grsecurity will cease.  
<http://www.net-security.org/news.php?id=5317>

#### CVS EXPLOIT LEADS TO PROJECT SERVER COMPROMISE

Users of Concurrent Versions System (CVS) software are being urged to patch their systems against an exploit used to hack the project's web site.  
<http://www.net-security.org/news.php?id=5318>

#### COMPLEX PASSWORDS FOIL HACKS

As more websites demand passwords, scammers are getting cleverer about stealing them -- hence, the need for such "passwords-plus" systems.  
<http://www.net-security.org/news.php?id=5319>

#### PUTTING SECURITY WHERE IT BELONGS

In recent years, business information systems have expanded into networks, encompassing partners, suppliers and customers. And this brings greater security challenges.  
<http://www.net-security.org/news.php?id=5320>

#### HOW TO SELL - A PRETTY KETTLE OF PHISH

New technologies have brought with them a new wave of security challenges. Resellers stand to benefit if they help end-users to create and manage the systems and policies required.  
<http://www.net-security.org/news.php?id=5321>

#### HACKERS 'RECYCLING CODE' TO SPREAD WORMS

Although less new malicious code appears to be being written, viruses and worms are continuing to cause problems around the world, says Trend Micro.  
<http://www.net-security.org/news.php?id=5322>

#### WHEN ENCRYPTION CAN BE MISLEADING

The trust that encryption generates can be deceptive, one researcher, a regular poster to the full-disclosure vulnerability mailing list, has discovered.

<http://www.net-security.org/news.php?id=5323>

#### EARLY ALERTING - THE KEY TO PROACTIVE SECURITY

In an environment where attacks are becoming more frequent and more sophisticated, what steps can enterprises take to ensure business continuity? Increasingly, these organizations are considering implementing an early warning system.

<http://www.net-security.org/news.php?id=5324>

#### BIG BUCKS FOR BIOMETRIC SCREENING

The Department of Homeland Security awards a \$10 billion contract to a group of companies, led by Accenture, to build a system to screen and track foreign visitors to the United States.

<http://www.net-security.org/news.php?id=5325>

#### CHROOTING APACHE

The chroot daemon allows you to run a program and have it see a given directory as the root (/) directory.

<http://www.net-security.org/news.php?id=5326>

#### MISSING: A LAPTOP OF DEA INFORMANTS

Federal investigators are frantically trying to determine what happened to a missing laptop computer that contains sensitive data.

<http://www.net-security.org/news.php?id=5327>

#### SECURE INFORMATION SHARING AND THE DATA RESIDENCY DILEMMA

One of the top priorities for companies today is information sharing with a vast ecosystem of external entities, ranging from business partners and suppliers to customers.

<http://www.net-security.org/news.php?id=5328>

#### SIMPLE PASSWORDS NO LONGER SUFFICE

To access her bank account online, Marie Jubran opens a Web browser and types in her Swedish national ID number along with a four-digit password. She then pulls out a card of scratch-off codes and uses one to log on.

<http://www.net-security.org/news.php?id=5329>

#### HOW MUCH SHOULD YOU INVEST IN IT SECURITY?

One of the main concerns of the organizers of the Olympic Games to be held in Athens this summer is security, but not only physical security, computer security as well.

<http://www.net-security.org/news.php?id=5330>

#### FROM EXPOSITION TO EXPLOIT: ONE SECURITY BOOK'S STORY

Even prior to its release in May, *The Shellcoder's Handbook: Discovering and Exploiting Security Holes* drew attention to the exploitive nature of the narrative.

<http://www.net-security.org/news.php?id=5331>

#### H.323 MEDIATED VOICE OVER IP: VULNERABILITIES AND MORE

This paper provides an overview of the H.323 (VoIP) protocol suite, its known vulnerabilities, and then suggests twenty rules for securing an H.323-based network.

<http://www.net-security.org/news.php?id=5332>

#### SECURITY ESCAPES FROM THE LAB

As security threats increase, HP's researchers concentrate on management and active countermeasures.

<http://www.net-security.org/news.php?id=5333>

#### WHEN PGP SIGNATURES CAN BE MISLEADING

The trust that PGP signatures generates can be deceptive, one researcher, a regular poster to the full-disclosure vulnerability mailing list, has discovered.

<http://www.net-security.org/news.php?id=5334>

#### MICROSOFT NOT A THREAT TO US NATIONAL SECURITY

Microsoft's dominance of the desktop operating system market isn't a threat to U.S. national security, according to a new study by a team of researchers at the George Mason University, who said a worm or other malicious attack on Windows is unlikely to produce a catastrophic failure of the Internet.

<http://www.net-security.org/news.php?id=5335>

#### RFID'S SECRET PATH TO ROI

"If manufacturers and retailers can get accurate, real-time demand data rather than estimates ... that would represent a sea change in demand forecasting," AMR's Kara Romanov says. "The holy grail for CPG manufacturers is real-time, clean and accurate demand data."

<http://www.net-security.org/news.php?id=5336>

#### PHISHERS PUT SURFERS ON THE HOOK

Trolling for credit card numbers with phony websites and e-mails is becoming more and more popular, but enforcement is still playing catch-up.

<http://www.net-security.org/news.php?id=5337>

#### MULTIPLE SECURITY ROLES WITH UNIX/LINUX

There are some areas of security where Linux and Unix have some strong wins, and simply fit in better than anything else.

<http://www.net-security.org/news.php?id=5338>

#### DOUBLE SNORTING

This article discusses running two instances of Snort — one configured for the attacks on the services he runs, and one with almost all attack rules enabled to keep him informed about the variety of attacks floating around the Internet.

<http://www.net-security.org/news.php?id=5339>

#### APPLE AND OS SECURITY - COMMUNICATION IS KEY

When it comes to security, Apple Computer's report card reads like that of a gifted child: high marks for achievement, but needs to communicate better with others.

<http://www.net-security.org/news.php?id=5340>

#### WINDOWS GETS 'STRONG' PASSWORDS AS SECURID TRIALS KICK OFF

RSA Security and Microsoft have started beta testing a product designed to kill off the traditional password.

<http://www.net-security.org/news.php?id=5341>

#### SECURITY VENDOR SAYS OFFSHORE DEVELOPMENT NEEDS CHECKS

An executive from Citadel Security Software Inc. pointed to offshore software development as one reason for security vulnerabilities in a hearing before a U.S. House Subcommittee Wednesday.

<http://www.net-security.org/news.php?id=5342>

#### HARRY POTTER VIRUS TARGETS CHILDREN

Virus authors have tapped into excitement over the latest Harry Potter film to spread an old worm.

<http://www.net-security.org/news.php?id=5343>

#### GAO: FEDS CAN IMPROVE CRITICAL CYBERSECURITY

Although the private sector owns most of the nation's critical infrastructures, the federal government has several options to improve cybersecurity of such assets.

<http://www.net-security.org/news.php?id=5344>

#### WORM STEALS CREDIT CARD DETAILS

Windows users are being warned about a virus that is "aggressively stealing" credit card numbers and passwords.

<http://www.net-security.org/news.php?id=5345>

#### SENDMAIL'S SECURITY

Some might say that security starts at the server. Some of these servers process millions of messages during a week's time. How do you know if the server is secure?

<http://www.net-security.org/news.php?id=5346>

#### NEW WORM TARGETS TWO MS VULNERABILITIES

Antivirus software companies are warning customers about a new e-mail

worm that targets unpatched Microsoft Corp. Windows machines with either of two recently disclosed software vulnerabilities.  
<http://www.net-security.org/news.php?id=5347>

SECURITY TIME BOMB IS TRIGGERED BY 'ROGUE LAPTOPS'  
Notebook PCs that have missed the regular patching cycle are vulnerable to security threats such as the recent Korgo worm, warn security experts.  
<http://www.net-security.org/news.php?id=5348>

---

### [ Vulnerabilities ]

All vulnerabilities are located here:  
[http://www.net-security.org/archive\\_vuln.php](http://www.net-security.org/archive_vuln.php)

---

Mandrakelinux Security Update Advisory - krb5 (MDKSA-2004:056)  
<http://www.net-security.org/advisory.php?id=3419>

NetBSD Security Advisory - CVS server vulnerability (2004-008)  
<http://www.net-security.org/advisory.php?id=3418>

Debian Security Advisory - New log2mail packages fix format string vulnerabilities (DSA 513-1)  
<http://www.net-security.org/advisory.php?id=3417>

MIT krb5 Security Advisory - buffer overflows in  
krb5\_aname\_to\_localname (2004-001)  
<http://www.net-security.org/advisory.php?id=3416>

Gentoo Linux Security Advisory - tla: Multiple vulnerabilities in  
included libneon (Errata Update GLSA 200405-25:02)  
<http://www.net-security.org/advisory.php?id=3415>

Debian Security Advisory - New rsync packages fix directory traversal  
bug (DSA 499-2)  
<http://www.net-security.org/advisory.php?id=3414>

Debian Security Advisory - New gallery packages fix unauthenticated  
access (DSA 512-1)  
<http://www.net-security.org/advisory.php?id=3413>

Slackware Security Advisory - PHP local security issue  
(SSA:2004-154-02)  
<http://www.net-security.org/advisory.php?id=3412>

Slackware Security Advisory - mod\_ssl (SSA:2004-154-01)  
<http://www.net-security.org/advisory.php?id=3411>

SOT Linux Security Advisory - Updated apache package for SOT Linux  
2003 (SLSA-2004:20)  
<http://www.net-security.org/advisory.php?id=3410>

Trustix Secure Linux Security Advisory - kerberos5 (#2004-0032)  
<http://www.net-security.org/advisory.php?id=3409>

Trustix Secure Linux Security Advisory - apache (#2004-0031)  
<http://www.net-security.org/advisory.php?id=3408>

Mandrakelinux Security Update Advisory - mod\_ssl (MDKSA-2004:054)  
<http://www.net-security.org/advisory.php?id=3407>

Mandrakelinux Security Update Advisory - apache2 (MDKSA-2004:055)  
<http://www.net-security.org/advisory.php?id=3406>

Mandrakelinux Security Update Advisory - xpcd (MDKSA-2004:053)  
<http://www.net-security.org/advisory.php?id=3405>

Gentoo Linux Security Advisory - tla: Heap-based buffer overflow in  
included libneon (GLSA 200405-25)  
<http://www.net-security.org/advisory.php?id=3404>

Debian Security Advisory - New ethereal packages fix buffer  
overflows (DSA 511-1)  
<http://www.net-security.org/advisory.php?id=3403>

Debian Security Advisory - New jftpgw packages fix format string  
vulnerability (DSA 510-1)  
<http://www.net-security.org/advisory.php?id=3402>

Debian Security Advisory - New gatos packages fix privilege  
escalation (DSA 509-1)  
<http://www.net-security.org/advisory.php?id=3401>

Apple Security Advisory - APPLE-SA-2004-05-28 Mac OS X Update 10.3.4  
<http://www.net-security.org/advisory.php?id=3400>

SGI Security Advisory - SGI Advanced Linux Environment security update #20 (20040508-01-U)  
<http://www.net-security.org/advisory.php?id=3399>

SGI Security Advisory - SGI Advanced Linux Environment 3 Security Update #2 (20040509-01-U)  
<http://www.net-security.org/advisory.php?id=3398>

Gentoo Linux Security Advisory - MPlayer, xine-lib: vulnerabilities in RTSP stream handling (GLSA 200405-24)  
<http://www.net-security.org/advisory.php?id=3397>

### AUTOPSY FORENSIC BROWSER 2.01

The Autopsy Forensic Browser is a graphical interface to the command line digital forensic analysis tools in The Sleuth Kit.

<http://www.net-security.org/software.php?id=216>

### CYCLONE 0.8

Cyclone is a programming language based on C that is safe, meaning that it rules out programs that have buffer overflows, dangling pointers, format string attacks, etc.

<http://www.net-security.org/software.php?id=128>

### FLAWFINDER 1.25

Flawfinder searches through source code looking for potential security flaws.

<http://www.net-security.org/software.php?id=183>

### GRSECURITY 2.0

grsecurity is a complete security system for Linux 2.4 that implements a detection/prevention/containment strategy.

<http://www.net-security.org/software.php?id=208>

### HIJACKTHIS 1.97.7

A general homepage hijackers detector and remover.

<http://www.net-security.org/software.php?id=565>

### MARADNS 1.1.20

MaraDNS is a DNS server that strives to be secure and fully open-sourced.

<http://www.net-security.org/software.php?id=84>

### PWGEN 1.40

PWGen is a password generator capable of creating \*cryptographically strong\* passwords or passphrases with lengths up to 2048 bits.

<http://www.net-security.org/software.php?id=435>

#### SHELL INTRUSION DETECTION 0.3.5

SID is a Shell Intrusion Detection system. The kernel part plugs into a terminal-processing subsystem and logs hashed terminal lines.

<http://www.net-security.org/software.php?id=473>

#### SHOREWALL 2.0.2f

Shorewall is an iptables based firewall that can be used on a dedicated firewall system, a multi-function masquerade gateway/server or on a standalone Linux system.

<http://www.net-security.org/software.php?id=40>

#### SNORT 2.1.3

Snort is a lightweight network intrusion detection system, capable of performing real-time traffic analysis and packet logging on IP networks.

<http://www.net-security.org/software.php?id=112>

#### TCPICK 0.1.23

Tcpick is a textmode sniffer that can track TCP streams and saves the data captured in files or displays them in the terminal.

<http://www.net-security.org/software.php?id=288>

#### THE SLEUTH KIT 1.70

The Sleuth Kit is a collection of UNIX-based command line file system forensic tools.

<http://www.net-security.org/software.php?id=215>

#### TRILLIAN RECOVERY PRO

This program decrypts and display passwords stored by the Trillian Instant Messaging client.

<http://www.net-security.org/software.php?id=564>

#### VTHROTTLE 0.54

Allows the administrator to control how much email users and hosts may send, hindering the rapid spread of viruses, worms, and spam.

<http://www.net-security.org/software.php?id=533>

#### WMPASMAN 0.8.4.1

wmpasman stores passwords and makes them available for pasting (both via the middle-click primary selection and the clipboard selection) at the click of a button.
