[Security news]

LITTLE BROTHERS LIKE IP CAMERAS

New surveillance cameras allow anyone with a broadband Internet connection to keep a 24-hour watch on nearly anything -- from anywhere. Parents can monitor kids, the boss can keep an eye on the office.

<http://www.net-security.org/news.php?id=5349>

IT SECURITY HITS THE STAGE

Following are some of the notable technology-related events scheduled for the week of June 6.

<http://www.net-security.org/news.php?id=5350>

MICROSOFT CALLS FOR OUTBOUND FILTERING AGAINST SPAM

In its continuing fight against unsolicited commercial e-mail, Microsoft Corp. plans to filter outgoing messages on its consumer mail services and is busy developing new "proofing" technologies.

<http://www.net-security.org/news.php?id=5351>

RECOGNITION KEYS ACCESS

Passwords are a problem. To be secure, a password must be non-obvious and changed often.

<http://www.net-security.org/news.php?id=5352>

HNS NEWSLETTER ISSUE 216 HAS BEEN RELEASED

You can read the Newsletter in TXT or PDF format. If you haven't done it yet, consider subscribing. This issue is sponsored by Microsoft.

<http://www.net-security.org/news.php?id=5353>

LINUX GAINS VIRUS ARMOUR

Red Hat and Intel have developed software that supports the antivirus NX security technology.

<http://www.net-security.org/news.php?id=5354>

MICROSOFT'S SWIFT RESPONSE NABBED SASSER SUSPECT

When indications of a worm exploiting the LSASS vulnerability in Windows surfaced April 30, the staff at Microsoft Corp.'s Security Response Center didn't hesitate; they knew exactly what to do.

<http://www.net-security.org/news.php?id=5355>

RSA PUMPS UP PASSWORDS

Forthcoming Sign-On Manager will ease authentication, toughen security.

<http://www.net-security.org/news.php?id=5356>

REPORT: JUNIPER NETWORKS/NETSCREEN EMEA PRESS SUMMIT

Two weeks ago in Marbella, Spain, the company managed to take us on an interesting journey. Speakers covering a broad range of topics illustrated the evolution of Juniper Networks and introduced their vision for the future after the acquisition of NetScreen.

<http://www.net-security.org/news.php?id=5357>

US WARDRIVER PLEADS GUILTY TO WI-FI HACKS

In a rare wireless hacking conviction, a Michigan man entered a guilty plea last Friday in federal court in Charlotte, North Carolina for his role in a scheme to steal credit card numbers from the Lowe's

chain of home improvement stores by taking advantage of an unsecured Wi-Fi network at a store in suburban Detroit.
<http://www.net-security.org/news.php?id=5358>

SECURE DEVELOPMENT: A POLARISED RESPONSE

Secure development is the process of authoring software in such a way as to embrace information security at every stage of the cycle. By addressing information security issues at the design and prototype stages, huge savings in development costs can be made.
<http://www.net-security.org/news.php?id=5359>

NEW ARMOR TO THWART HACKS

A small cadre of vendors is set to release a new class of host-based security technologies that protect applications and processes running in memory.
<http://www.net-security.org/news.php?id=5360>

TEN GUIDELINES FOR DEPLOYING SECURE XML WEB SERVICES

Eugene Kuznetsov, CTO of DataPower, offers these field-proven steps for protecting company resources by applying XML Web services security.
<http://www.net-security.org/news.php?id=5361>

TRUSECURE UPDATES SECURITY-COMPLIANCE MANAGER

TruSecure unveiled Risk Commander 2.0, a set of software tools that does double duty by measuring how effectively IT defenses are working
<http://www.net-security.org/news.php?id=5362>

APPLE PATCHES 'CRITICAL' OS X FLAW

Apple Computer on Monday released a security patch that fixes what the company called the first "critical" Mac OS X flaw.
<http://www.net-security.org/news.php?id=5363>

SECURITY SPENDING WILL INCREASE

Spending on security-related technology is expected to increase over the next couple of years, leveling off at 5 percent to 8 percent of the IT budget of global 2000 companies.
<http://www.net-security.org/news.php?id=5364>

FIRM ACCIDENTALLY EBAYS CUSTOMER DATABASE

A customer database and the current access codes to the supposedly secure Intranet of one of Europe's largest financial services group was left on a hard disk offered for sale on eBay.
<http://www.net-security.org/news.php?id=5365>

PASSWORDS CAN SIT ON HARD DISKS FOR YEARS

Typing your password or credit card number into a computer is a moment's work. But if you think your personal details disappear as

soon as you hit the Return key, think again: they can sit on the computer's hard disk for years waiting for a hacker to rip them off.
<http://www.net-security.org/news.php?id=5366>

CONFUSION SURROUNDS CISCO-LINKSYS WIRELESS HOLE

A report last week about a security hole in a wireless broadband router made by Cisco Systems Inc.'s Linksys division overstated the severity of the vulnerability, according to the man who first warned of the problem.

<http://www.net-security.org/news.php?id=5367>

THE WITTY WORM: A NEW CHAPTER IN MALWARE

The Witty worm was a big deal. It represented some scary malware firsts and is likely a harbinger of worms to come. IT professionals need to understand Witty and what it did, writes Bruce Schneier, CTO of Counterpane.

<http://www.net-security.org/news.php?id=5368>

ENCRYPTING PARTITIONS USING DM-CRYPT AND THE 2.6 SERIES KERNEL

This article looks at how to set up an encrypted partition using dm-crypt.

<http://www.net-security.org/news.php?id=5369>

STRIKING BACK AT SPYWARE

States, feds consider regulating intrusive software.

<http://www.net-security.org/news.php?id=5370>

TECH JOBS: SYSTEMS ADMINISTRATION

Systems administrators find themselves taking on responsibility for additional technologies, such as security and wireless. "The position has evolved into being more than just a systems administrator," says Terry Phillips of Robert Half International.

<http://www.net-security.org/news.php?id=5371>

MICROSOFT PATCHES A PAIR OF FLAWS

Microsoft released two security patches for Windows, plugging holes in an online gaming feature and a third-party program the company includes with several applications.

<http://www.net-security.org/news.php?id=5372>

FOUR-FIFTHS OF NETWORKS BLEEDING WI-FI DATA

Most businesses routinely broadcast company information over the airwaves.

<http://www.net-security.org/news.php?id=5373>

SPAM-FIGHTING THEORIES FAR FROM PRACTICE

Filters and sender authentication protocols are not likely to do much to stem the spam flood around the world, at least for the time being,

according to Gartner analysts.
<http://www.net-security.org/news.php?id=5374>

BEST PRACTICES FOR STORAGE SECURITY

IT professionals have learned the hard way in recent years that disaster can strike at anytime and that they must be prepared.
<http://www.net-security.org/news.php?id=5375>

NET NEEDS LAW ENFORCEMENT, AUTHOR SAYS

The Internet is a "god-awful mess," but few U.S. government officials are willing to take action against virus writers, spammers and other scammers, author Bruce Sterling said at the Gartner IT Security Summit Tuesday in Washington, D.C.
<http://www.net-security.org/news.php?id=5376>

SOLARIS 10 OPERATING SYSTEM PREVIEW

Solaris 10 Operating System, the upcoming release of the industry's leading UNIX platform, integrates revolutionary technologies and delivers extreme levels of performance, availability and security.
<http://www.net-security.org/news.php?id=5377>

PREVIEW OF WINDOWS XP SERVICE PACK 2

My normal policy is not to review beta releases of any software. But because Windows XP SP2 is so important I decided to break away from the norm. Readers should be aware that a release candidate is not a final release and this in should no way be construed as a review of the final product.
<http://www.net-security.org/news.php?id=5378>

THE WI-FI EXPLOSION: A VIRUS WRITER'S DREAM

With the consumer Wi-Fi explosion, launching a virus into the wild has never been easier and more anonymous than it is today.
<http://www.net-security.org/news.php?id=5379>

FEDS WANT E-VOTING SOURCE CODE DISCLOSED

Electronic voting machine vendors should make their source code available for scrutiny by state elections officials, the head of a federal voting commission said Tuesday.
<http://www.net-security.org/news.php?id=5380>

CYBER-COPS TO PATROL INTERNET CHATROOMS

Police plan to patrol Internet chatrooms as part of a multinational crackdown on pedophile rings. They will also seize the finances of Web site operators who peddle child pornography and freeze the credit cards of their customers.
<http://www.net-security.org/news.php?id=5381>

INTERNET SECURITY SYSTEMS CTO STEPS DOWN

Chris Klaus, the founder of Internet Security Systems, has decided to relinquish his role as chief technology officer, but is staying on with the company in the newly created position of chief security adviser.

<http://www.net-security.org/news.php?id=5382>

CINGULAR PATCHES CUSTOMER SECURITY GLITCHES

Cingular Wireless, which is set to become the biggest U.S. mobile service when it buys AT&T Wireless this year, said on Wednesday it was fixing security problems that exposed customer account details and could potentially have resulted in fraudulent credit card use.

<http://www.net-security.org/news.php?id=5383>

WHO'S GETTING RICH ON COMPUTER VIRUSES?

Computer viruses cost businesses and consumers around the world billions of dollars each year. So who -- if anyone -- is profiting from viruses?

<http://www.net-security.org/news.php?id=5384>

TEN GUIDELINES FOR DEPLOYING SECURE XML WEB SERVICES

The rise of internetworking was enabled by the use of network-level security technologies such as Secure Sockets Layer, IPsec and firewall filtering to create a secure perimeter around an enterprise network.

<http://www.net-security.org/news.php?id=5385>

VENDORS UNVEIL WLAN SECURITY PRODUCTS

A tool to detect rogue access wireless devices and a wireless security product aimed at small and medium businesses were unveiled Wednesday at the Wi-Fi Planet Conference in Baltimore.

<http://www.net-security.org/news.php?id=5386>

VPN/FIREWALL MARKET UP 11% IN 1Q04, DRIVEN BY CISCO'S STRONG QUARTER

Worldwide VPN and firewall hardware and software revenue was up 11% at \$733 million in 1Q04 from 4Q03, and will grow 12% to \$823 million by 1Q05, according to Infonetics Research.

<http://www.net-security.org/news.php?id=5387>

SECURITY WORRIES THREATEN VOICE OVER IP FUTURE

Security experts are becoming worried that Voice over IP technology may be too insecure for many companies.

<http://www.net-security.org/news.php?id=5388>

MORE SECURITY SOUGHT FOR ELECTRONIC VOTING

The head of a federal voting commission called Tuesday for tougher security measures for electronic voting by the November elections, but said the issue of requiring paper receipts as backup needs

further study.
<http://www.net-security.org/news.php?id=5389>

EURO 2004 WORMS TARGET FOOTY FANS
Security experts have warned football fans to watch out for virus-infected emails that contain attachments masquerading as Euro 2004 goodies.
