[Security news]

SECURITY PAYS OFF AS CYBERCRIME COSTS FALL

The number of cybercrimes and hacker attacks, and the cost attributed to such intrusions, declined for the fourth straight year, according to data released by the Computer Security Institute.

<http://www.net-security.org/news.php?id=5391>

APPLE MAKES ITS CASE FOR SECURITY

Stung by criticism of its handling of vulnerabilities in Mac OS X, Apple says it's serious about security and vows to be more attentive.
<http://www.net-security.org/news.php?id=5392>

PRE-EMPTIVE SECURITY PROMPTS ALARMS

Early warning systems are the latest tactic in security professionals' war on malware.
<http://www.net-security.org/news.php?id=5393>

MICROSOFT'S SP1 FOR SERVER 2003 PACKS A SECURITY PUNCH

Microsoft is working on a set of security upgrades for Windows Server 2003 that executives said will deliver on the company's promise to make its products more secure by default.
<http://www.net-security.org/news.php?id=5394>

BACKDOOR PROGRAM GETS BACKDOORED

The author of a free Trojan horse program favored by amateur computer intruders found himself with some explaining to do to the underground.
<http://www.net-security.org/news.php?id=5395>

USING JABBER AS A LOG MONITOR

Jabber, the streaming XML technology mainly used for instant messaging, is well-suited to its most common task. However, Jabber is a far more generic tool.
<http://www.net-security.org/news.php?id=5396>

SHORTAGE OF COMPUTER SECURITY EXPERTS HAMPERS AGENCIES

Bush administration officials and information technology industry experts on Thursday identified areas of cybersecurity that need to be addressed, including more research and development and the training of the next generation of cyber experts in government.
<http://www.net-security.org/news.php?id=5397>

INTERNET EXPLORER HOLES CAUSING ALARM

Four new holes have been discovered in the Internet Explorer (IE) Web browser that could allow malicious hackers to run attack code on Windows systems, even if those systems have installed the latest software patches from the Redmond, Washington company, security experts warn.
<http://www.net-security.org/news.php?id=5398>

TIME TO APPLY A PATCH

A renewed debate about patch management has highlighted a flaw in federal officials' views on information security.
<http://www.net-security.org/news.php?id=5399>

GROWING NEED FOR WIRELESS SECURITY POLICIES

The escalating use of wireless technology demands formal corporate security policies governing that use, according to users and analysts at a Gartner security conference in Washington DC.
<http://www.net-security.org/news.php?id=5400>

HNS NEWSLETTER ISSUE 217 HAS BEEN RELEASED

You can read the Newsletter in TXT or PDF format. If you haven't done it yet, consider subscribing. This issue is sponsored by Microsoft.
<http://www.net-security.org/news.php?id=5401>

EXECUTIVE CONVERSATION: WHY CLOUDMARK TOOK THE PATH LESS TRAVELED

Spam, spim, spoofs...will it ever end? Cloudmark believes that spam and all of its incarnations will indeed disappear through a combination of carefully harvested human feedback and ground-breaking tools.
<http://www.net-security.org/news.php?id=5402>

MICROSOFT RELEASES SECURITY-MINDED WINDOWS CODE

Microsoft on Monday released what it hopes is a nearly final test version of a security-oriented Windows upgrade.
<http://www.net-security.org/news.php?id=5403>

WLANS VULNERABLE TO HACKING

Wireless security is fraught with problems, but there are advanced technology solutions for many of them, says research firm Gartner. Fixed wireless intrusion-detection sensors can block hackers from breaching networks and masquerading as legitimate users.
<http://www.net-security.org/news.php?id=5404>

NEW LINUX SECURITY HOLE FOUND

A Linux bug was recently uncovered by a young Norwegian programmer that, when exploited by a simple C program, could crash most Linux 2.4 or 2.6 distributions running on an x86 architecture.
<http://www.net-security.org/news.php?id=5405>

RUSSIAN FIRM REPORTS FIRST MOBILE PHONE WORM

Antivirus company Kaspersky Labs Ltd. said on Monday that it discovered the first-ever computer virus capable of spreading over mobile phone networks.
<http://www.net-security.org/news.php?id=5406>

GOOGLE'S GMAIL: SPOOK HEAVEN?

Google's plans to run targeted advertising with the mail that you see through its new Gmail service represents a potential break for government agencies that want to use autobots to monitor the contents of electronic communications travelling across networks.
<http://www.net-security.org/news.php?id=5407>

EMAIL VIRUSES ARE MORE ANNOYING THAN SPAM

I've had my primary email address for many years, and I also get email through a number of work-related aliases. So I get spam. Tons of spam. And I filter it all. I filter viruses, too, not because they can affect my Linux computer, but because they suck up bandwidth.
<http://www.net-security.org/news.php?id=5408>

WORM CUTS OFF ANTIVIRUS PROGRAMS

A new worm can shut down antivirus applications, according to security firm F-Secure.
<http://www.net-security.org/news.php?id=5409>

INSIDE THE INSIDER THREAT

Mudge, the security expert and chief scientist at Intrusic Inc., details some of the ways that malicious hackers can slip into computer networks undetected.
<http://www.net-security.org/news.php?id=5410>

EASE THE SECURITY BURDEN WITH A CENTRAL LOGGING SERVER

Many administrators fall short of spending the necessary time monitoring log files. Because this is a critical security task, one of the best ways to accomplish it is with a central logging server. These tips will help you get started.
<http://www.net-security.org/news.php?id=5411>

A SECURITY TALE: FROM VULNERABILITY DISCOVERY TO DISASTER

It's one of the largest wireless companies in the United States. It has billions of dollars in the bank. And last week, it had a colossal security problem on its hands.
<http://www.net-security.org/news.php?id=5413>

AVOIDING IDENTITY THEFT: A PRIMER

Your identity is arguably your most valuable possession. A clean legal record and credit history open the door for work, mortgage loans and other day-to-day privileges that most people take for granted.
<http://www.net-security.org/news.php?id=5414>

MICROSOFT: NO ANTIVIRUS PRODUCT YET

Microsoft intends to create an antivirus service in the near future, but has not finalized its plans yet, a company executive said Tuesday.
<http://www.net-security.org/news.php?id=5415>

FTC SAYS NO TO ANTISPAM REGISTRY

The Federal Trade Commission tells Congress that a "do not e-mail" registry would be ineffective at stopping spam. In fact, it could make the problem worse.
<http://www.net-security.org/news.php?id=5416>

AKAMAI BLAMES 'GLOBAL DNS ATTACK' FOR DISRUPTIONS

A global attack on the DNS (domain name system) caused disruptions affecting customers of Internet hosting company Akamai Technologies Inc., including search engine sites, said Jeff Young, an Akamai spokesman.

<http://www.net-security.org/news.php?id=5417>

IRIS SCANS AT UK AIRPORTS

The Home Office is to install iris scanning technology in major UK airports. It says this will speed up immigration times for those who register on the scheme, as well as providing a "substantial increase in security".

<http://www.net-security.org/news.php?id=5418>

SECURITY OFFICIALS PLAY NICE

Federal agencies are deploying more sophisticated network scanning tools than ever before.

<http://www.net-security.org/news.php?id=5419>

WEB VULNERABILITY ASSESSMENT FOR SMBs

One modest-priced and nicely featured solution SMBs must consider is Syhunt's Sandcat Suite. This security software suite includes a security hardening tool, a vulnerability scanner, data mining and log analysis tools, and more.

<http://www.net-security.org/news.php?id=5420>

ANALYST: MOBILE SECURITY IS A TOP PRIORITY

With the detection of a virus that could worm its way onto smartphones, security has once again come to the forefront of people's minds.

<http://www.net-security.org/news.php?id=5421>

FEDS' IT SECURITY SPENDING GROWTH SET FOR SLOWDOWN

Government market-research firm Input says spending on IT security products and services will drop to 2% next year, down from 10% this year and 50% in 2003.

<http://www.net-security.org/news.php?id=5422>

'SASSER' WORM INFORMANT UNDER INVESTIGATION

The informant who tipped Microsoft Corp. to the identity of the "Sasser" computer worm's creator last month is among five people under investigation as possible accomplices, prosecutors said Wednesday.

<http://www.net-security.org/news.php?id=5423>

ONLINE THIEVES EMPTY BANK ACCOUNTS

Online thieves known as "phishers" have been gouging unsuspecting consumers by emptying their bank accounts and making fraudulent credit-card purchases. Research firm Gartner conducted a survey of

5,000 adult Web users in the U.S. and found that checking-account theft is the fastest-growing financial consumer fraud in the country.
<http://www.net-security.org/news.php?id=5424>

SPAMMER PROSECUTIONS WASTE TIME AND MONEY

The recent US Federal Trade Commission (FTC) report on the futility of establishing a national 'do not email' registry contains a number of interesting observations related to spam control and to the so-called CAN-SPAM Act.
<http://www.net-security.org/news.php?id=5425>

WARDRIVING FOR WLAN SECURITY

The 4th Annual Worldwide Wardrive is under way this week, with volunteers scanning the airwaves in a neighborhood near you for WLAN access points.
<http://www.net-security.org/news.php?id=5426>

JUDGE TOSSES ONLINE PRIVACY CASE

The dismissal of lawsuits brought against Northwest Airlines has online privacy advocates renewing calls for federal privacy legislation.
<http://www.net-security.org/news.php?id=5427>

APPLICATION DENIAL OF SERVICE ATTACKS

Denial of Services attacks aimed at disrupting network services range from simple bandwidth exhaustion attacks and those targeted at flaws in commercial software to complex distributed attacks exploiting specific commercial off-the-shelf software flaws.
<http://www.net-security.org/news.php?id=5428>

SECURITY SPENDING TO PEAK WITHIN THREE YEARS

Eight to 12 per cent of European IT budgets by 2007, says Meta.
<http://www.net-security.org/news.php?id=5429>

NO SWAN SONG FOR OPEN SOURCE IPSEC

Internet protocol security (define) for Linux got a boost today from Novell, which announced that it would be officially sponsoring and contributing to the Openswan open source project.
<http://www.net-security.org/news.php?id=5430>

READY? SECURE? DISCLOSE

Are you ready to declare your company secure against attacks from cyberterrorists? If you're not, get moving.
<http://www.net-security.org/news.php?id=5431>

XML DIGITAL SIGNATURES IN A NUTSHELL

Digital signatures are widely used as security tokens, not just in XML. In this article, we look at how to create a digital signature

and the way that digital signatures are constructed.
<http://www.net-security.org/news.php?id=5432>

SYMBOL BUYS INTO STRONGER MOBILE SECURITY

Symbol Technologies Inc. wants to help secure data and applications on handheld devices via the acquisition of Trio Security Inc., a privately held software vendor.
<http://www.net-security.org/news.php?id=5433>

FREE HOTSPOTS NEED FREE SECURITY

Wi-Fi security is getting more attention these days, but most of the solutions are focused on the enterprise or paid-hotspot market. Now one group is trying to tackle the problem for free hotspots as well.
<http://www.net-security.org/news.php?id=5434>

BRODY TO LEAD ENERGY CYBERSECURITY

Bruce Brody, the cybersecurity chief at the Department of Veterans Affairs, is moving to the Energy Department to help that agency toughen its security against viruses and hacker attacks.
<http://www.net-security.org/news.php?id=5435>

Q&A WITH SECURITYFOCUS' ALFRED HUGER

The cybersecurity expert on why its early-warning system is so hot: "People are sick and tired of being hit blind".
<http://www.net-security.org/news.php?id=5436>

IP PHONES CAN CREATE NETWORK SECURITY RISK

The increasing adoption of Internet telephony may be opening up a significant security risk for companies.
<http://www.net-security.org/news.php?id=5437>

TIME TO DUMP INTERNET EXPLORER

It's time to tell our users, our clients, our associates, our families, and our friends to abandon Internet Explorer.
<http://www.net-security.org/news.php?id=5438>

IT SECURITY IS A TOP PRIORITY AT THE OLYMPICS

Yan Noblot reassures Mark Samuels that his Olympic Games IT security strategy is sound.
<http://www.net-security.org/news.php?id=5439>

TSA TRIES BIOMETRIC CHECKS

Frequent travelers at five airports who submit biometric data and pass a background check will be able to breeze through security checkpoints as part of the Transportation Security Administration's Registered Traveler Pilot program.

APPLICATION DENIAL OF SERVICE (DOS) ATTACKS
Denial of Services attacks aimed at disrupting network services range
from simple bandwidth exhaustion attacks and those targeted at flaws
in commercial software to complex distributed attacks exploiting
specific commercial off-the-shelf software flaws.
<http://www.net-security.org/article.php?id=701>

HNS AUDIO LEARNING SESSION: ALTERNATIVES TO PASSWORDS

John Stuart, Signify CEO, discusses what are the alternatives to passwords. There are three fundamental technologies which users could take into consideration: one time passcodes (token based systems), digital certificates and biometrics. Mr. Stuart talks about all of these technologies and provides background and benefits on each of these security systems.

[**Software**]

Windows software is located at:

http://net-security.org/software_main.php?cat=1

Linux software is located at:

http://net-security.org/software_main.php?cat=2

Pocket PC software is located at:

http://net-security.org/software_main.php?cat=3

BOTAN 1.3.14

Botan aims to be a portable, easy to use, and efficient C++ crypto library.

<http://www.net-security.org/software.php?id=94>

DROPBEAR SSH SERVER 0.42

Dropbear is an SSH 2 server, designed to be usable in small memory environments.

<http://www.net-security.org/software.php?id=490>

ETTERCAP NG-0.7.0 RC1

Ettercap is a multipurpose sniffer/interceptor/logger for switched LAN.

<http://www.net-security.org/software.php?id=83>

FLAWFINDER 1.26

Flawfinder searches through source code looking for potential security flaws.

<http://www.net-security.org/software.php?id=183>

NUFW 0.7.1

NuFW is an "authenticating gateway". This means it requires authentication for any connections to be forwarded through the gateway.

<http://www.net-security.org/software.php?id=526>

OS-SIM 0.9.5p1

OSSIM is a distribution of open source products that are integrated to provide an infrastructure for security monitoring.

<http://www.net-security.org/software.php?id=304>

SAMHAIN 1.8.9

Samhain is an open source file integrity and host-based intrusion detection system.

<http://www.net-security.org/software.php?id=125>

SHOREWALL 2.0.3 RC1

Shorewall is an iptables based firewall that can be used on a dedicated firewall system, a multi-function masquerade gateway/server or on a standalone Linux system.

<http://www.net-security.org/software.php?id=40>

TINYCA 0.6.3

TinyCA is a simple graphical user interface to manage a small CA (Certification Authority).
