

## **HNS Newsletter**

Issue 230 - 13.09.2004.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

---

Multi-Save Offer! Register three colleagues at this year's RSA Conference, Europe 3rd-5th November 2004, Barcelona and receive a saving of €100 per registration.

If you haven't already registered your place at the RSA Conference, Europe – the most important information security event of 2004 – time is running out.

---

Visit [www.2004.rsaconference.com/europe](http://www.2004.rsaconference.com/europe) to register on-line today – you'll find all the latest information and critical highlights on the Conference.

---

### **Table of contents:**

- 1) Security news
- 2) Vulnerabilities
- 3) Advisories
- 4) Articles
- 5) Reviews
- 6) Software
- 7) Webcasts
- 8) Conferences
- 9) Security World
- 10) Virus News

[ Security news ]

### **ARMY PUTS UP ITS DEFENSES**

Army information technology officials started the Fort Campbell Network Upgrade in December 2003...

<http://www.net-security.org/news.php?id=5997>

### **SECURITY: THE BIGGER PICTURE**

Symantec chairman and CEO John W. Thompson tells vnunet.com about the company's strategy, and why he's not bothered about Microsoft's entry

into the market.

<http://www.net-security.org/news.php?id=5998>

#### EBAY DOMAIN HIJACKER ARRESTED

Police in Germany have arrested a 19 year-old from Helmstedt for hijacking the site of eBay Germany about a week ago.

<http://www.net-security.org/news.php?id=5999>

#### V710 HACKERS REWARD PROGRAM

The v710 Hacker Reward Program is a community-sponsored initiative to enable key features on the Verizon/Motorola v710 mobile phone which were disabled by the carrier.

<http://www.net-security.org/news.php?id=6000>

#### SSL VPNS: FULL ACCESS WITH MAXIMUM SECURITY

Many companies are turning to a relatively young technology, Secure Sockets Layer Virtual Private Networks, to provide a full range of remote access while ensuring maximum security.

<http://www.net-security.org/news.php?id=6001>

#### WIRELESS: NEW EYE ON CRIME AIDS SECURITY IN REAL TIME

Wireless technology has in recent weeks helped extend the long arm of the law at events ranging from the Republican National Convention in New York City to a rock concert in Staffordshire, England.

<http://www.net-security.org/news.php?id=6002>

#### WEB APP SECURITY USING STRUTS, SERVLET FILTERS, AND CUSTOM TAGLIBS

In this article, you will develop a generic security solution that can be used by most enterprise-level Web applications.

<http://www.net-security.org/news.php?id=6003>

#### COMPANIES STILL FAIL TO TAKE SECURITY SERIOUSLY

Too many firms see security as an IT issue, says survey.

<http://www.net-security.org/news.php?id=6005>

#### SPAM: SHOOT THE VENDOR

The constant evolution of spam to look as much as possible like real email will guarantee that filtering cannot be a complete solution.

<http://www.net-security.org/news.php?id=6007>

#### PATCH PLUGS WINZIP FLAW

WinZip Computing has released a patch WinZip 9.0 Service Release 1, which it claims will resolve a buffer overflow issue.

<http://www.net-security.org/news.php?id=6008>

#### JUNIPER INCORPORATES THIRD-PARTY SECURITY IN SSL VPNS

Juniper Networks Inc. is expanding users' security options by opening

new interfaces that allow integration of third-party tools with Juniper's line of SSL VPNs.  
<http://www.net-security.org/news.php?id=6009>

#### IS JBOSS READY FOR YOUR ENTERPRISE?

It's been about a month since JBoss, the Open Source J2EE application server, received its full certification from Sun.  
<http://www.net-security.org/news.php?id=6010>

#### MCAFEE AV ATE MY APPLICATION

An Australian software developer has been left fuming after the latest virus definition update from McAfee caused his package to be wrongly identified as a Trojan horse programme.  
<http://www.net-security.org/news.php?id=6011>

#### START-UP SAYS IT CAN DELIVER SECURE VOIP

A start-up called Net6 claims that its virtual private network products offer companies high-quality voice communications over any network from anywhere.  
<http://www.net-security.org/news.php?id=6012>

#### RED HAT UPGRADES SECURITY

Linux software maker Red Hat on Tuesday released an update to its enterprise product with security upgrades, support for IBM Power5 servers, new driver support and bug fixes.  
<http://www.net-security.org/news.php?id=6013>

#### TOP UK COMPANIES ARE FAILING TO DEVELOP WRITTEN SECURITY POLICIES

Almost half (47%) of the UK's top 350 companies do not have a fully documented information security policy.  
<http://www.net-security.org/news.php?id=6014>

#### SPAMMERS EXPLOIT ANTI-SPAM TRAP

Some spammers are getting their messages through using techniques designed to spot and stop them.  
<http://www.net-security.org/news.php?id=6015>

#### FIVE STEPS TO ENFORCING YOUR ENDPOINT SECURITY

Your security policy has to have teeth. Here's how to enforce your endpoint security policy.  
<http://www.net-security.org/news.php?id=6016>

#### METASPLOIT FRAMEWORK, PART 2

Newly updated. This article provides insight into the Metasploit Framework, a very useful tool for the penetration tester. Part two of three.  
<http://www.net-security.org/news.php?id=6017>

#### USING CTELNET IN SUN CLUSTER SOFTWARE WITH SECURE SHELL

You can use the ctnet application in Sun Cluster software to connect to systems by means of the ssh command instead of telnet. The ctnet tool is part of the Sun Cluster Console (SUNWcccon) package in Sun HPC ClusterTools software.

<http://www.net-security.org/news.php?id=6018>

#### WINDOWS XP SP2 RELEASE SURROUNDED BY A FEAST OF EGOS

Eager to tarnish Microsoft's shiny new Service Pack 2, the security press managed to spin the most thin and marginal issues into "gaping holes" and "security craters."

<http://www.net-security.org/news.php?id=6019>

#### SPYWARE INTERFERES WITH MICROSOFT PATCH

Though Microsoft's new security update package is all about protecting systems from worms, viruses and spyware, it can't do much about what's already on computers - and that could pose a problem.

<http://www.net-security.org/news.php?id=6020>

#### CAN SPAMMERS REALLY EXPLOIT WIRELESS NETWORKS?

A US citizen is thought to have become the first person to be accused of hacking a wireless network in order to send spam.

<http://www.net-security.org/news.php?id=6021>

#### 'TRUSTED' SYSTEMS MOVE TO THE MAINSTREAM

When it comes to operating systems, it's a matter of trust—or mistrust, as the case may be.

<http://www.net-security.org/news.php?id=6022>

#### SECURITY: CAN YOU REALLY TRUST JUST TECHIES?

HR, senior execs and staff all off the hook as IT team take the blame...

<http://www.net-security.org/news.php?id=6023>

#### 'WAR DRIVE' REVEALS NEW YORK'S HIDDEN SECURITY FLAWS

While physical security was tightened to unprecedented levels here last week for the Republican National Convention, IT security researchers uncovered an unsettling number of unencrypted wireless devices that they said created a potential information security nightmare for convention organizers and delegates.

<http://www.net-security.org/news.php?id=6024>

#### SECURITY: FROM THE HORSE'S MOUTH

Network Times decided to ask a few security vendors a set of three questions to hopefully give readers a better idea of what is important and what is available in the security arena.

<http://www.net-security.org/news.php?id=6026>

#### PRIMUS CLAIMS SECURE BROADBAND FIRST

Australia's fourth largest ISP, Primus Telecom, has launched a secure DSL service in the hope of boosting its credibility as a tier-one carrier.

<http://www.net-security.org/news.php?id=6027>

#### ISPS GIVEN THUMBS DOWN FOR VIRUS, HACKER CONTROL

U.S. residential Internet users are much more satisfied with the spam protection from their Internet service providers, but remain unhappy with their ISPs' defenses against hackers and viruses, J.D. Power and Associates said Wednesday.

<http://www.net-security.org/news.php?id=6028>

#### SPAMMERS USE E-MAIL ID TO GAIN LEGITIMACY

With few junk e-mail filters supporting a protocol for verifying the source address of digital messages, spammers have adopted it themselves as a way to appear more legitimate, according to a report released on Wednesday.

<http://www.net-security.org/news.php?id=6029>

#### MICROSOFT PUTS FINGERPRINT READERS INTO HARDWARE

Microsoft unveiled a new array of keyboard and mice, with some featuring built-in fingerprint readers to make it easier for users to log on to personal computers and Web sites.

<http://www.net-security.org/news.php?id=6030>

#### MICROSOFT OFFERS MORE TIME TO TEST XP SERVICE PACK 2

Registry key to prevent PCs from automatically downloading update now good for 240 days.

<http://www.net-security.org/news.php?id=6031>

#### PERIMETER SECURITY IS CHANGING FAST

Most security solutions today are built around attempting to protect the vulnerability of the PC and, or the server, by attempting to keep "bad" things outside of the network security perimeter. But, with the changing and disappearing perimeter - security now needs to be intrinsic in every system and for every user.

<http://www.net-security.org/news.php?id=6032>

#### HOUSE PANEL MOVES TO CRIMINALIZE SPYWARE, NET PIRACY

People who illegally share copyrighted music and movies over the Internet could be jailed for up to five years under a bill approved by a powerful congressional panel today.

<http://www.net-security.org/news.php?id=6033>

#### STILLSECURE ENFORCES NETWORK SECURITY POLICIES

StillSecure announced the release of Safe Access version 2.0, which tests all PCs on a network and gives access only to those that meet

an organization's established security policies, while quarantining others.

<http://www.net-security.org/news.php?id=6034>

#### SECURING THAT PC

A book on computer security can often be boring. The author of this review thinks Thomas C. Greene's book is not boring at all.

<http://www.net-security.org/news.php?id=6035>

#### MICROSOFT STICKS WITH CONTROVERSIAL LONGHORN SECURITY

Although Microsoft continues to tweak a controversial architecture for securing PCs, it still plans to include the feature in Longhorn, the next release of Windows.

<http://www.net-security.org/news.php?id=6036>

## [ Software ]

Windows software is located at:  
[http://net-security.org/software\\_main.php?cat=1](http://net-security.org/software_main.php?cat=1)

Linux software is located at:  
[http://net-security.org/software\\_main.php?cat=2](http://net-security.org/software_main.php?cat=2)

Pocket PC software is located at:  
[http://net-security.org/software\\_main.php?cat=3](http://net-security.org/software_main.php?cat=3)

---

### AD-AWARE SE PERSONAL EDITION Build 1.04 (Windows)

Ad-aware is a free multi spyware removal utility.  
<http://www.net-security.org/software.php?id=135>

### AIRSNORT 0.2.5a (Linux)

AirSnort is a wireless LAN (WLAN) tool which recovers encryption keys.

<http://www.net-security.org/software.php?id=262>

### AUTOPSY FORENSIC BROWSER 2.03 (Linux)

The Autopsy Forensic Browser is a graphical interface to the command line digital forensic analysis tools in The Sleuth Kit.

<http://www.net-security.org/software.php?id=216>

### CRIPPIN 2.2 (Pocket PC)

Crippin was designed to protect confidential files in case a Pocket PC is lost or stolen.

<http://www.net-security.org/software.php?id=544>

DANTE 1.1.15 (Linux)

Dante is a circuit-level firewall/proxy that can be used to provide convenient and secure network connectivity to a wide range of hosts.  
<http://www.net-security.org/software.php?id=43>

SNORTALOG 2.3.0b (Linux)

Snortalog is a powerful perl script that summarize Snort logs making an easy view of what attacks are being seen through your network.  
<http://www.net-security.org/software.php?id=455>

THE SLEUTH KIT 1.72 (Linux)

The Sleuth Kit is a collection of UNIX-based command line file system forensic tools.  
<http://www.net-security.org/software.php?id=215>
