[Security news]

SECURITY FOR INTERNET USERS DEEMED WEAK

Internet users at home are not nearly as safe online as they believe, according to a nationwide inspection by researchers.
<http://www.net-security.org/news.php?id=6354>

WORM TARGETS MAC OS X USERS

Security experts have warned Mac users about the emergence of a new worm that "represents a huge security headache".
<http://www.net-security.org/news.php?id=6355>

BALLMER FLAGS SECURITY FOR A PRE-LONGHORN 'RELEASE 2'
Speaking at the Gartner Symposium and ITxpo 2004 Steve Ballmer outlined new security initiatives, some of which would make it into a pre-Longhorn 'Release 2' for Windows, next year.
<http://www.net-security.org/news.php?id=6356>

SECURITY REPORT: WINDOWS VS LINUX
Much ado has been made about whether or not Linux is truly more secure than Windows.
<http://www.net-security.org/news.php?id=6357>

ARE HACKERS NOW GUNNING FOR THE MAC?
Since the last Mac OS X security update was the third in a month, and because some of the holes looked ripe for exploiting, I have to wonder whether the Mac is now attracting more unwanted attention from hackers.
<http://www.net-security.org/news.php?id=6358>

CRITICAL SERVER NEEDS AND THE LINUX KERNEL
A discussion of four of the kernel features needed for mission-critical server environments, including telecom.
<http://www.net-security.org/news.php?id=6359>

AS THE WORMS RETURN
The most unwelcome guests always stay the longest.
<http://www.net-security.org/news.php?id=6362>

INTEL OUTLINES WIRELESS USB SECURITY
Intel is backing the 128-bit AES encryption protocol for securing wireless USB connections.
<http://www.net-security.org/news.php?id=6363>

IBM TO START SECURITY REPORTING
IT giant IBM is to start releasing a monthly report detailing threats to corporate networks from hackers, viruses and worms.
<http://www.net-security.org/news.php?id=6364>

STILL NO OS X VIRUSES
The sky began to fall October 22, thanks to this discussion on MacInTouch. Readers learned that the first ever virus for Mac OS X had been found. Again!
<http://www.net-security.org/news.php?id=6365>

SECURITY WITH EASE: ACCORDANCE ARAID 2000
Due to its closed RAID architecture, the ARAID 2000 works completely without additional drivers; the software provided by chipset makers for their controllers is enough.
<http://www.net-security.org/news.php?id=6366>

SETTING UP A SIMPLE LINUX FIREWALL

This is an overview of the things I think you need to know if you're going to try and set up a simple firewall using linux on an old PC.

<http://www.net-security.org/news.php?id=6367>

ISSUES DISCOVERING COMPROMISED MACHINES

This article discusses the discovery of compromised machines in large enterprise environments, and offers some suggestions on correlating NIDS and HIPS logs to avoid false positives.

<http://www.net-security.org/news.php?id=6368>

80% US HOME PCS HAVE SPYWARE: STUDY

A survey of of 329 dial-up and broadband adult computer users by the US National Cyber Security Alliance and America Online has found that 80 percent of home computers were infected with spyware or adware of some kind.

<http://www.net-security.org/news.php?id=6369>

HACKING: THE MUST-HAVE BUSINESS TOOL

A new federal case illustrates the role computer intrusion is taking in the high-stakes world of niche Internet commerce.

<http://www.net-security.org/news.php?id=6370>

IMMUNIZING PCS FROM NEW THREATS

Defensive software mimics human immune system to block worms.

<http://www.net-security.org/news.php?id=6371>

THE STYLISTIC ST5000 TABLET PC UPDATED WITH SECURITY FEATURES

The device keeps your data protected with a number of security features.

<http://www.net-security.org/news.php?id=6372>

USERS SEE SPYWARE AND VIRUSES THROUGH ROSE-COLORED GLASSES

People who believe their PCs are free of malware that can track their computer usage or gain control over their machines are most likely wrong.

<http://www.net-security.org/news.php?id=6373>

VOIP SECURITY A MOVING TARGET

Those who want to operate secure VoIP networks must be mindful of myriad threats because the technology is susceptible to vulnerabilities that might be foreign to traditional telecom managers and their staffs.

<http://www.net-security.org/news.php?id=6374>

HOW SPYWARE AND THE WEAPONS AGAINST IT ARE EVOLVING

Spyware has reached epidemic proportions and is only getting worse.

<http://www.net-security.org/news.php?id=6375>

TIGHTEN SECURITY NOW

Network attacks are increasing " and at an alarming pace, according to IBM's Global Security Intelligence Services.

<http://www.net-security.org/news.php?id=6376>

YOUR PC MAY BE LESS SECURE THAN YOU THINK

A survey conducted by AOL found that 20 percent of home computers were infected by a virus or worm, and that various forms of snooping programs such as spyware and adware are on a whopping 80 percent of systems.

<http://www.net-security.org/news.php?id=6377>

POSTNUKE OPEN SOURCE CMS ATTACKED

On the morning of October 26th the developers of the free software content management system PostNuke posted a security announcement saying that a vulnerability in the paFileDB download management software allowed an attacker to put up a hacked version of PostNuke for download.

<http://www.net-security.org/news.php?id=6378>

EASY TO REMAIN UNTRACEABLE

Breaking into computer networks and remaining untraceable after the breach has been detected is apparently easier than anyone would like it to be, said The Grugq, a Britain-based hacker.

<http://www.net-security.org/news.php?id=6379>

THE DNSDOCTOR UTILITY

This utility will perform tests of a DNS zone or domain name. There are two versions available for download.

<http://www.net-security.org/news.php?id=6380>

INSECURITY BEGINS AT HOME

Spyware is rife and virus infection commonplace yet many home users reckon they are safe from online threats.

<http://www.net-security.org/news.php?id=6381>

SPAMMERS GO ON TRIAL

Three people who allegedly sent America Online customers millions of junk e-mail messages touting penny stocks and other Internet gimmicks went on trial Tuesday in the nation's first such felony case.

<http://www.net-security.org/news.php?id=6382>

WHY CURRENT GENERATION INTRUSION PREVENTION SYSTEMS FAILS BUSINESS

The problem is that current generation intrusion detection and prevention (IDP) lacks context about the network. It may positively identify an attack, but it knows nothing about the target's likelihood of succumbing to the attack.

<http://www.net-security.org/news.php?id=6383>

MAC WORM SPARKS SECURITY CONCERNS

Anti-virus experts have warned Mac users and system administrators against becoming complacent about security after the discovery of a worm targeting the Mac OS X operating system.

<http://www.net-security.org/news.php?id=6384>

VOIP BRINGS ASSOCIATED SECURITY RISKS

As local companies gear up to take advantage of the new legislation allowing voice over IP, many have not fully considered the additional security risks associated with the converged network.

<http://www.net-security.org/news.php?id=6385>

US BANCORP TEAMS UP WITH VERISIGN ON BANKING SECURITY

US Bancorp will use a hardware-token based authentication service from VeriSign to secure access to commercial banking services for its customers.

<http://www.net-security.org/news.php?id=6386>

BLUETOOTH POSES SECURITY RISK

Red-M, a vendor of intrusion detection tools, says many firms underestimate the danger of Bluetooth.

<http://www.net-security.org/news.php?id=6387>

EBAY VIRUS FEARS DISMISSED AS SCAREMONGERING

Security fears sparked by the recently identified W32/Myfip virus are unfounded, according to a security industry executive who claims the concern is nothing more than empty scaremongering by antivirus firms.

<http://www.net-security.org/news.php?id=6388>

SYMANTEC UNVEILS SECURITY STRATEGY

Symantec has launched a new strategy for enterprise I.T. security that is designed to help businesses manage and protect the massive amounts of digital information on their networks.

<http://www.net-security.org/news.php?id=6389>

BIG.BIZ STRUGGLES AGAINST SECURITY THREATS

Most large companies are struggling to protect themselves against security threats, a survey from security consultancy NetSec published today reveals.

<http://www.net-security.org/news.php?id=6390>

NTT DOCOMO, IBM, INTEL TEAM TO SECURE MOBILE DEVICES

Trusted Mobile Platform is designed to protect wireless devices against viruses.

<http://www.net-security.org/news.php?id=6391>

WHAT REALLY SELLS SECURITY MANAGERS ON ONE AV VENDOR OVER ANOTHER?

With a malware storm always on the horizon, you'd expect AV vendors to have among the best customer support programs. Check out what Ed Skoudis found out.

<http://www.net-security.org/news.php?id=6392>

ACCESS TO BUSH SITE CUT FOR 'SECURITY REASONS

US President George W. Bush's re-election campaign said on Wednesday it had cut its website off from access from certain foreign countries "for security reasons," but declined to elaborate.

<http://www.net-security.org/news.php?id=6393>

RSA SECURITY UNVEILS DRM SOLUTION FOR MOBILE DEVICES

RSA Security announced a standards-based security solution for digital rights management (DRM) that provides a security infrastructure for consumer-device manufacturers and service providers alike.

<http://www.net-security.org/news.php?id=6394>

NEW CALLER I.D. SPOOFING SITE OPENS

Web-based caller I.D. spoofing is back, and this time it's available to everyone.

<http://www.net-security.org/news.php?id=6395>

BANKING ON E-AUTHENTICATION

Banks are getting behind the federal government's E-Authentication initiative, giving a significant push to federal efforts to use electronic identities for e-government and e-commerce, said Steven Timchak, director of the initiative at the General Services Administration.

<http://www.net-security.org/news.php?id=6396>

MICROSOFT AND IT SECURITY

Microsoft has come in for heavy criticism in recent years on the IT Security front, for obvious reasons.

<http://www.net-security.org/news.php?id=6397>

SMARTCARD MCU AIMS FOR APPLICATIONS GROWTH

STMicroelectronics has added a new contactless smartcard microcontroller with 2Kbyte of EEPROM to its successful ST19 family of field-proven secure MCUs.

<http://www.net-security.org/news.php?id=6398>

XACTA TO CERTIFY USDA SYSTEMS

Xacta Corp. officials will help two Agriculture Department agencies obtain federal security certification and accreditation requirements for their information systems, company officials announced this week.

<http://www.net-security.org/news.php?id=6399>

TOO MANY USERS FALL FOR CYBER SECURITY URBAN MYTHS
Commonly held misconceptions highlight problems.
<http://www.net-security.org/news.php?id=6400>

LINUX USERS: WELCOME TO THE WORLD OF MALWARE
Linux users are often smug about the state of their computer security, rightly criticizing Windows for its numerous security holes, but overlooking their own vulnerabilities.
<http://www.net-security.org/news.php?id=6401>

BIOMETRICS EARLY ADOPTERS REVEAL SECRETS, CHALLENGES
In a conference room overlooking the site of the World Trade Center, early adopters of biometrics technology this week stressed the importance of determining someone's true identity.
<http://www.net-security.org/news.php?id=6402>

PROTECT AGAINST WEAK AUTHENTICATION PROTOCOLS AND PASSWORDS
Did you know that your Windows computers store and send weak password hashes which are very easy to crack?
<http://www.net-security.org/news.php?id=6403>

SECRET SERVICE BUSTS CYBER GANGS
Operation Firewall nets 28 suspects allegedly involved in online fraud and conspiracy.

"SHOOTING THE HOSTAGE": WHY CURRENT GENERATION INTRUSION PREVENTION SYSTEMS FAILS BUSINESS

As a corporate security manager, you are caught between a rock and a hard place. Your networks are under attack at an ever-increasing rate, from viruses, worms and people. The consequences of successful intrusion or infection continue to rise. And in the arms race, the dark side seems to have the upper hand: Intrusion detection and prevention (IDP) systems haven't delivered the goods.

<http://www.net-security.org/article.php?id=739>

THE FEDORA - RED HAT FALSE VULNERABILITY SCAM

It looks like the "evil minds" have found a new way to use spam for their devious plans. This time spam is combined with a scam that will try to use social engineering for the purpose of creating server backdoors.

<http://www.net-security.org/article.php?id=738>

UNDERSTANDING E-MAIL SPOOFING

E-mail spoofing is a growing problem and has reached the point where you cannot rely on the information displayed in your e-mail client to tell you who really sent a message. This article takes a look at the problem and the proposed solutions.
