

HNS Newsletter

Issue 239 - 15.11.2004.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

INFOSECURITY CONFERENCE AND EXHIBITION

December 7-9 - Jacob K. Javits Convention Center - New York, NY

Join us to discover solutions that can protect your data and your business:

- *More than 55 educational sessions
- *CISSP continuing professional education credits
- *A full spectrum of security products, systems, solutions
- *Information to create & implement more effective policies
- *Networking with colleagues and experts in the field
- *The latest issues shaping the future of information security

For more information visit:

- 9) Virus News

[Security news]

ALLEGED DDOS KINGPIN JOINS MOST WANTED LIST

The feds turn up the heat on a corporate executive who went on the lam after being charged with paying hackers to take down the competition.

<http://www.net-security.org/news.php?id=6459>

SOURCEFIRE - THE OPEN SOURCE ANSWER TO NETWORK SECURITY

In the past couple of years, technologies such as intrusion detection

and protection systems have become mainstream tools in the corporate security arsenal. But many feel less than satisfied with the performance of some of these technologies.

<http://www.net-security.org/news.php?id=6460>

PHISHERS ADOPT SCAM TRICKS FROM VIRUS WRITERS

You know all about phishing scams, right?

<http://www.net-security.org/news.php?id=6461>

ONLINE FRAUD TUTORIALS... FROM THE SECRET SERVICE?

U.S. law enforcement closed down the thriving criminal marketplace Shadowcrew.com last week, but left its database of forbidden knowledge open to the public.

<http://www.net-security.org/news.php?id=6462>

EXPERTS DEBUNK LINUX SECURITY CRITICISMS

Linux experts slam a report naming the OS as a favorite hacker target, citing methodology flaws and "suspicious" conclusions.

<http://www.net-security.org/news.php?id=6463>

FINDING YOUR WEAKEST LINK

The Interceptors find public- and private-sector wireless vulnerabilities.

<http://www.net-security.org/news.php?id=6464>

ENCRYPTION GETS PERSONAL

Identity-based encryption avoids the need for a public key infrastructure.

<http://www.net-security.org/news.php?id=6465>

REPORT: A MISPLACED SENSE OF SECURITY?

Despite feeling safer now than a year ago, 20 percent of businesses in a network security survey of 300 IT staffers in companies with more than \$30 million in annual revenues admitted to unauthorized breaches into their company networks.

<http://www.net-security.org/news.php?id=6466>

DEMAND FOR IT SECURITY PROS GROWING FAST

Government regulations and dynamic threats driving need for qualified staff.

<http://www.net-security.org/news.php?id=6467>

CZECH VIRUS WRITER JOINS ANTI-VIRUS FIRM

Benny, one-time member of the 29A virus writing group, has begun work

as the main developer of Zoner Anti-Virus (ZAV), according to an entry on his home page.

<http://www.net-security.org/news.php?id=6468>

SECURITY STATS SOBERING AS CSI SHOW OPENS

Survey finds that 81 percent of companies say attacks on their network are increasing.

<http://www.net-security.org/news.php?id=6469>

AN IT MANAGER'S INSIGHT INTO SECURING REMOVABLE MEDIA

Removable media devices are here to stay. Their ease of use and low cost have made them ubiquitous in the work environment – but at what price? In this article we look at the pros and cons of removable media, and the steps IT managers can take to mitigate the security risks associated with them.

<http://www.net-security.org/news.php?id=6470>

ENFORCEMENT, NOT FLAWLESSNESS, KEY TO SECURITY

Surviving a security audit requires good policies, procedures and practices — and auditors look unfavorably on federal agencies with policy and procedural deficiencies, a security compliance official said today at a conference in Washington, D.C.

<http://www.net-security.org/news.php?id=6471>

BUILDING A LAMP SERVER W/ LDAP AUTHENTICATION

This tutorial is designed to guide you through the initial steps of setting up an Apache, MySQL, and PHP server on Linux which will utilize an external LDAP server for authenticating users.

<http://www.net-security.org/news.php?id=6472>

SECURITY BREACHED AGAIN AT US GIANTS

Two major US corporates have suffered apparent security breaches embarrassingly similar to incidents earlier this year.

<http://www.net-security.org/news.php?id=6473>

BOOM TIMES AHEAD FOR IT SECURITY PROFESSION

Boom times are ahead for security pros. The information security workforce will expand by an estimated 13.7 per cent annually to reach 2.1m workers by 2008. Approximately 680,000 of this expanded workforce will work in Europe.

<http://www.net-security.org/news.php?id=6475>

NOKIA BEEFS UP SSL VPN

New Secure Connector feature gives remote users secure network-level access, including access to business applications, data, and network services.

<http://www.net-security.org/news.php?id=6476>

SECURITY COMPANY DEFENDS LINUX-IS-VULNERABLE SURVEY

A UK security company has published an open letter following a furore

in the Linux camp after a study claimed that nearly two thirds of successful Internet-based attacks occurred on the open source operating system.

<http://www.net-security.org/news.php?id=6477>

SECURITY GROUP SETS BASELINE STANDARD FOR FIREWALLS

Four security software rivals have teamed up to set a baseline standard for application security firewalls, challenging others in the industry to join them.

<http://www.net-security.org/news.php?id=6478>

FIRMS WARN OF NEW MYDOOM WORM

Anti-virus software maker McAfee Inc. is warning about a new version of the Mydoom worm that infects computers of people who click on a link in e-mail they receive.

<http://www.net-security.org/news.php?id=6479>

BOFRA WORM SETS TRAP FOR UNWARY

A new family of worms which uses an unpatched vulnerability in Internet Explorer is spreading widely across the net.

<http://www.net-security.org/news.php?id=6480>

SPAMMERS TAKE AIM AT CHRISTMAS

Study reveals junk mail tactics becoming ever more sophisticated.

<http://www.net-security.org/news.php?id=6481>

ADMIRAL CALLS FOR IMPROVED PROTECTION FOR CLASSIFIED DATA

Defense Department officials need a better way to compartmentalize classified information as part of an information assurance program that also embodies information sharing, the deputy commander of the U.S. Pacific Command said.

<http://www.net-security.org/news.php?id=6482>

CRYPTOGRAPHY RESEARCH EXPANDS INTO EUROPE

Recognizing the strategic significance of Europe in driving the deployment of smart cards, Cryptography Research announced it has set up operations in the UK to provide enhanced support for European licensees of its recently launched DPA Countermeasures Licensing Program.

<http://www.net-security.org/news.php?id=6483>

JUNIPER LOOKS TOWARD FUTURE, EYES INTEGRATED SECURITY

Fresh off record third-quarter growth, Juniper Networks outlined its strategy for the next 12 months, including plans to move to integrated security and to secure the Infranet, a profitable public IP network.

<http://www.net-security.org/news.php?id=6484>

DHS PLOTS SECURITY DATABASE

The Homeland Security Department is developing a single security

clearance database that will include state, local and private-sector officials who will be authorized to gain access to a secure facility or classified information.

<http://www.net-security.org/news.php?id=6485>

TROJAN HORSE TARGETS MOBILE PHONES

A new Trojan horse sends unauthorized spam to mobile phones via SMS. Called Troj/Delf-HA by security firm Sophos, the malware has only infected a few users of a Russian wireless network, but Sophos warns that similar attacks may occur elsewhere.

<http://www.net-security.org/news.php?id=6486>

MICROSOFT FLAW LEAVES PCS OPEN TO PHISHING

ISA Server 2000 and Proxy Server 2.0 affected by internet spoofing scam.

<http://www.net-security.org/news.php?id=6487>

PROTECT YOUR ORGANIZATION'S SITES WITH A LEAK-PROOF SECURITY POLICY

Every organization requires some type of a network site security policy that will protect the organization's valuable assets -- everything from systems to data.

<http://www.net-security.org/news.php?id=6488>

ANTIVIRUS SUBSCRIPTION PRICES CLIMB

Troublesome Trojan horses, virulent worms, nasty viruses--sometimes it may seem like the Internet exists just to let the bad guys attack your PC.

<http://www.net-security.org/news.php?id=6489>

CYBER CRIME TOOLS COULD SERVE TERRORISTS: FBI

The hacking and identity theft tools now earning big money for mainly eastern European organised crime could be used by terrorists to attack the US, an FBI official claims.

<http://www.net-security.org/news.php?id=6490>

BANKS PREPARE FOR ATM CYBER CRIME

An international group of law enforcement and financial industry associations hopes to prevent a new type of bank robbery before it gets off the ground: cyber attacks against automated teller machines.

<http://www.net-security.org/news.php?id=6491>

I.T. SECURITY WORKFORCE TO NEARLY DOUBLE BY 2008

The key to a successful security strategy is involvement. It appears

the enterprises that remain free of viruses, break-ins and thefts will be those that refrain from throwing money or software at problems, and instead bring people in to respond to the shifting sands of I.T. hazards.

<http://www.net-security.org/news.php?id=6492>

SECURITY BASICS - BEATING HACKERS, PIRATES AND THIEVES

Internet pirates are looting bank accounts, stealing medical research and business secrets and taking over computers for malicious uses. Luckily, there are a few ways to thwart these evil-doers, and we'll offer a few in this article.

<http://www.net-security.org/news.php?id=6493>

IBM CANADA PUMPS CASH INTO SECURITY SERVICES

In an effort to establish a Canadian front on the international fight to secure corporate IT infrastructure, IBM Canada announced a US\$33.5 million investment over five years in its Canadian security practice and the creation of a security operations center (SOC).

<http://www.net-security.org/news.php?id=6494>

MICROSOFT ISSUES ONLY ONE FIX IN MONTHLY SECURITY UPDATE

However, Internet Explorer vulnerability make force additional patch.

<http://www.net-security.org/news.php?id=6495>

TEN SP2 FLAWS LEAVE XP USERS OPEN TO HACKERS

Millions at risk from 'silent and remote' attacks, claims security firm.

<http://www.net-security.org/news.php?id=6496>

DEFENDANT: MICROSOFT SOURCE CODE SALE WAS A SETUP

A 27-year-old Connecticut man facing felony economic espionage charges for allegedly selling a copy of Microsoft's leaked source code for \$20 says he's being singled out only because the software giant and law enforcement officials can't find the people who stole the code in the first place.

<http://www.net-security.org/news.php?id=6497>

US, INDIA LAUNCH SECURITY PARTNERSHIP

The United States and India agreed in talks to launch a new phase in cyber security co-operation, including scientific exchanges, officials said.

<http://www.net-security.org/news.php?id=6498>

WINDOWS SERVER 'R2' DETAILS BEGIN TO LEAK

'R2' still has yet to go to beta, but Microsoft is well on its way to

finalizing the product due to ship in the latter half of 2005, according to sources.
<http://www.net-security.org/news.php?id=6499>

NEW MYDOOM ATTACKS MAY SIGNAL 'ZERO DAY'
Latest version of worm occurs just as PC vulnerability is discovered.
<http://www.net-security.org/news.php?id=6500>

RESEARCHER ISSUES OWN PATCH FOR IE FLAW
A German researcher has released an unofficial patch to fix the FRAME/IFRAME vulnerability in Internet Explorer, exploits for which were released on public mailing lists last week.
<http://www.net-security.org/news.php?id=6501>

HOW TO CLEAN A COMPUTER VIRUS FROM YOUR PC
There's no shortage on advice of how to avoid catching a computer virus. But when it comes to advice about disinfecting contaminated PCs advice is thin on the ground.
<http://www.net-security.org/news.php?id=6502>

RED HAT TARGETS SECURITY WITH FEDORA CORE 3
Red Hat Inc's Fedora Project community has introduced version 3 of the Fedora Core Linux operating system, including changes to the SELinux policy that enables users to target the most vulnerable programs.
<http://www.net-security.org/news.php?id=6503>

E-MAIL AUTHENTICATION WILL NOT END SPAM
For consumers and businesses increasingly shaken by the growing onslaught of unwanted e-mail and the computer viruses and other nefarious hacking spam can bring, any hope for quick relief was soundly dashed yesterday during a government-hosted gathering of technology experts.
<http://www.net-security.org/news.php?id=6504>

HACKERS SHARPENING THEIR BYTE
It's not just computers and IT systems that are getting faster by the nanosecond, says a leading information security expert.
<http://www.net-security.org/news.php?id=6505>

[**Vulnerabilities**]

All vulnerabilities are located here:
http://www.net-security.org/archive_vuln.php

HP PSC 2510 Printer Anonymous Access FTP Daemon Vulnerability
<http://www.net-security.org/vuln.php?id=3818>

04WebServer 1.42 Multiple Vulnerabilities
<http://www.net-security.org/vuln.php?id=3817>

Hotfoen Ver 4.0 Automatic URL Opening Vulnerability
<http://www.net-security.org/vuln.php?id=3816>

BNC 2.8.9 Remote Buffer Overflow Vulnerability
<http://www.net-security.org/vuln.php?id=3815>

WebCalendar Multiple Vulnerabilities
<http://www.net-security.org/vuln.php?id=3814>

Kerio Personal Firewall Multiple IP Options Denial of Service
Vulnerability
<http://www.net-security.org/vuln.php?id=3813>

Samba SMBD Remote Denial of Service Vulnerability
<http://www.net-security.org/vuln.php?id=3812>

Icewarp Web Mail 5.2.8 Multiple Vulnerabilities
<http://www.net-security.org/vuln.php?id=3811>

Java Runtime Environment DNS Lookup Denial of Service Vulnerability
<http://www.net-security.org/vuln.php?id=3810>

Symantec LiveUpdate "ZIP Bombing" Denial of Service
Vulnerability
<http://www.net-security.org/vuln.php?id=3809>

602 Lan Suite 2004.0.04.0909 Resources Consumption Vulnerability
<http://www.net-security.org/vuln.php?id=3808>

Microsoft Internet Explorer Local File Existence Discovery
Vulnerability

<http://www.net-security.org/vuln.php?id=3807>

[**Advisories**]

All advisories are located at:

http://www.net-security.org/archive_adv.php

US-CERT Technical Cyber Security Alert - Cisco IOS Input Queue Vulnerability (TA04-316A)

<http://www.net-security.org/advisory.php?id=4038>

Debian Security Advisory - ez-ipupdate (DSA 592-1)

<http://www.net-security.org/advisory.php?id=4037>

Ubuntu Security Notice - apache2 vulnerability (USN-23-1)

<http://www.net-security.org/advisory.php?id=4036>

Ubuntu Security Notice - openssl script vulnerability (USN-24-1)

<http://www.net-security.org/advisory.php?id=4035>

Gentoo Linux Security Advisory - Davfs2, lvm-user: Insecure tempfile handling (GLSA 200411-22)

Gentoo Linux Security Advisory - ez-ipupdate: Format string vulnerability (GLSA 200411-20)

<http://www.net-security.org/advisory.php?id=4030>

SquirrelMail Security Notice - Cross Site Scripting in encoded text
<http://www.net-security.org/advisory.php?id=4029>

Mandrakelinux Security Update Advisory - samba (MDKSA-2004:131)
<http://www.net-security.org/advisory.php?id=4028>

Mandrakelinux Security Update Advisory - speedtouch (MDKSA-2004:130)
<http://www.net-security.org/advisory.php?id=4027>

Mandrakelinux Security Update Advisory - ez-ipupdate (MDKSA-2004:129)
<http://www.net-security.org/advisory.php?id=4026>

Mandrakelinux Security Update Advisory - webmin (MDKA-2004:042)
<http://www.net-security.org/advisory.php?id=4025>

Gentoo Linux Security Advisory - Pavuk: Multiple buffer overflows
(GLSA 200411-19)
<http://www.net-security.org/advisory.php?id=4024>

US-CERT Technical Cyber Security Alert - Buffer Overflow in Microsoft
Internet Explorer (TA04-315A)
<http://www.net-security.org/advisory.php?id=4023>

Gentoo Linux Security Advisory - Apache 2.0: Denial of Service by
memory consumption (GLSA 200411-18)
<http://www.net-security.org/advisory.php?id=4022>

Cisco Security Advisory - Cisco IOS DHCP Blocked Interface
Denial-of-Service (Revision 1.0)
<http://www.net-security.org/advisory.php?id=4021>

Ubuntu Security Notice - samba vulnerability (USN-22-1)
<http://www.net-security.org/advisory.php?id=4020>

Ubuntu Security Notice - libgd vulnerabilities (USN-21-1)
<http://www.net-security.org/advisory.php?id=4019>

Microsoft Security Bulletin - Summary for November 2004 (1.0)
<http://www.net-security.org/advisory.php?id=4018>

Gentoo Linux Security Advisory - GLSA 200411-17 (200411-17)
<http://www.net-security.org/advisory.php?id=4017>

Gentoo Linux Security Advisory - zip: Path name buffer overflow
(200411-16)
<http://www.net-security.org/advisory.php?id=4016>

Debian Security Advisory - libgd2 (DSA 591-1)
<http://www.net-security.org/advisory.php?id=4015>

Debian Security Advisory - gnats (DSA 590-1)
<http://www.net-security.org/advisory.php?id=4014>

Debian Security Advisory - libgd (DSA 589-1)
<http://www.net-security.org/advisory.php?id=4013>

Ubuntu Security Notice - ruby1.8 vulnerability (USN-20-1)
<http://www.net-security.org/advisory.php?id=4012>

Mandrakelinux Security Update Advisory - ruby (MDKSA-2004:128)
<http://www.net-security.org/advisory.php?id=4011>

Debian Security Advisory - gzip (DSA 588-1)
<http://www.net-security.org/advisory.php?id=4010>

Trustix Secure Linux Security Advisory - php, postfix, kernel,
sqlgrey, sqlite (2004-0057)
<http://www.net-security.org/advisory.php?id=4009>

Conectiva Linux Security Announcement - CLA-2004:888 (libtiff3)
<http://www.net-security.org/advisory.php?id=4008>

Conectiva Linux Security Announcement - rsync (CLA-2004:887)
<http://www.net-security.org/advisory.php?id=4007>

Conectiva Linux Security Announcement - xpdf (CLA-2004:886)
<http://www.net-security.org/advisory.php?id=4006>

Debian Security Advisory - freeamp (DSA 587-1)
<http://www.net-security.org/advisory.php?id=4005>

Gentoo Linux Security Advisory - OpenSSL, Groff: Insecure tempfile
handling (GLSA 200411-15)

<http://www.net-security.org/advisory.php?id=4004>

Debian Security Advisory - ruby (DSA 586-1)
<http://www.net-security.org/advisory.php?id=4003>

Gentoo Linux Security Advisory - Kaffeine, gxine: Remotely exploitable buffer overflow (GLSA 200411-14:01)
<http://www.net-security.org/advisory.php?id=4002>

Gentoo Linux Security Advisory - Portage, Gentoolkit: Temporary file vulnerabilities (GLSA 200411-13:01)
<http://www.net-security.org/advisory.php?id=4001>

Gentoo Linux Security Advisory - zgv: Multiple buffer overflows (GLSA 200411-12:01)
<http://www.net-security.org/advisory.php?id=4000>

Ubuntu Security Notice - squid vulnerabilities (USN-19-1)
<http://www.net-security.org/advisory.php?id=3999>

Gentoo Linux Security Advisory - ImageMagick: EXIF buffer overflow (GLSA 200411-11:01)
<http://www.net-security.org/advisory.php?id=3998>

Gentoo Linux Security Advisory - Gallery: Cross-site scripting vulnerability (GLSA 200411-10:01)
<http://www.net-security.org/advisory.php?id=3997>

Gentoo Linux Security Advisory - GPdf, KPDF, KOffice: Vulnerabilities in included xpdf (GLSA 200410-30:02)
<http://www.net-security.org/advisory.php?id=3996>

Gentoo Linux Security Advisory - Xpdf, CUPS: Multiple integer overflows (GLSA 200410-20:02)
<http://www.net-security.org/advisory.php?id=3995>

SGI Security Advisory - SGI Advanced Linux Environment 3 Security Update #17 (20041102-01-U)
<http://www.net-security.org/advisory.php?id=3994>

Ubuntu Security Notice - zip vulnerability (USN-18-1)
<http://www.net-security.org/advisory.php?id=3993>

Trustix Secure Linux Security Advisory - apache (2004-0056)
<http://www.net-security.org/advisory.php?id=3992>

Debian Security Advisory - shadow (DSA 585-1)
<http://www.net-security.org/advisory.php?id=3991>

Fedora Legacy Update Advisory - Updated foomatic package fixes security vulnerability (FLSA:2076)
<http://www.net-security.org/advisory.php?id=3990>
