

HNS Newsletter

Issue 256 - 14.03.2005.

<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

Make plans now to attend Black Hat Briefings & Training Europe, March 29-April 1 in Amsterdam, the world's premier technical security event. Featuring 30 speakers in four tracks, 10 training sessions, with 250 delegates from 20 nations attending. Learn about the technical security market drivers in the European market. You can download an electronic brochure at our site, which will provide you with a 100 Euros discount.

[Security news]

HACKER HELPS B-SCHOOL APPLICANTS

A computer hacker gained access to internal admissions records at Harvard, Stanford and other top business schools, then helped applicants log on and learn their fate weeks ahead of schedule, officials said Thursday.

<http://www.net-security.org/news.php?id=7290>

RFID INVADES THE CAPITAL

In May, Homeland Security employees will begin using an RFID-equipped ID card. Some say the device will create thousands of new opportunities for hackers and snoops.

<http://www.net-security.org/news.php?id=7291>

DAMPIG TROJAN MENACES SYMBIAN MOBILES

Virus writers have created a new Trojan capable of infecting Symbian

Series 60 smartphones.

<http://www.net-security.org/news.php?id=7292>

POLICING THE VIRUS WRITERS: GOOD NEWS?

More suspects are being caught, but that doesn't mean you can expect to see fewer viruses.

<http://www.net-security.org/news.php?id=7293>

MORE SECURE LINUX STILL NEEDS TO WIN USERS

NSA put its efforts into SELinux, but complexity is likely to hold back adoption.

<http://www.net-security.org/news.php?id=7294>

THE RISE OF THE CUSTOMISED SECURITY ATTACK

As criminals operating online have begun to realise the potential commercial value of Internet-related crimes, so they have started to investigate other ways of using malware to line their pockets.

<http://www.net-security.org/news.php?id=7295>

SINGLE SIGN ON 'IN-A-BOX' LANDS IN EUROPE

Single sign on appliance firm Imprivata launched in the Europe on Monday (7 March) with a promise to reduce corporate password management pains.

<http://www.net-security.org/news.php?id=7296>

UNIFIED MANAGEMENT IS NEXT FOR SECURITY

How well does unified threat management fit the requirements of an effective information security program?

<http://www.net-security.org/news.php?id=7297>

NEW IM WORMS HIT MSN MESSENGER

New worms spreading through MSN Messenger -- and its bundled-with-Windows Windows Messenger version -- via links to a malicious site are infecting users and leaving their PCs open to hacker hijack, security vendors reported Monday.

<http://www.net-security.org/news.php?id=7298>

ID CARDS ARE A WASTE, SAYS SECURITY GURU

Bruce Schneier tells Computer Weekly why ID cards could exacerbate crime and why the only way to beat ID theft is to make banks responsible for its prevention.

<http://www.net-security.org/news.php?id=7299>

CA, SYMANTEC BOLSTER RECOVERY, ID MANAGEMENT

Vendors create building blocks for next-generation security.

<http://www.net-security.org/news.php?id=7300>

VIRUS WRITERS LAUGH AT LAWS

Virus writers have little to fear, a security firm said Monday, and know they can practice their craft with near impunity.
<http://www.net-security.org/news.php?id=7301>

PRIMARY RESPONSE UPDATE TARGETS TROJANS, ROOTKITS

Sana Security said on Monday that a new version of its Primary Response product can help customers detect a new generation of complex online threats, including Trojan horse programs and malicious remote monitoring software known as "rootkits."
<http://www.net-security.org/news.php?id=7302>

CRYPTO SUITE SUPPORTS LINUX-BASED DEVICES

Cryptography specialist Certicom has launched a security software suite aimed at helping device makers create secure, Web-based user interfaces based on elliptic curve cryptography.
<http://www.net-security.org/news.php?id=7303>

GATES MISSES THE MARK, AND THE POINT, ON SECURITY

Bill Gates wants us to believe security is Microsoft's new Number One priority. He wants us to believe they have the users' best interests at heart.
<http://www.net-security.org/news.php?id=7304>

SCAMMERS USE SYMANTEC, DNS HOLES TO PUSH ADWARE

Users being tricked into installing programs onto their computers.
<http://www.net-security.org/news.php?id=7305>

SENSIBLE IT SECURITY FOR SMALL BUSINESSES

"Do I need a new firewall?" This is a frequent question asked by owners of small businesses concerned about growing security threats infesting the Internet.
<http://www.net-security.org/news.php?id=7306>

HOME USERS WILL BODGE DIY SECURITY

Web site that advises home users on security could do more harm than good.
<http://www.net-security.org/news.php?id=7307>

NUCLEAR CYBER SECURITY DEBATE HOTS UP

Two companies that make digital systems for nuclear power plants have come out against a government proposal that would attach cyber security standards to plant safety systems.
<http://www.net-security.org/news.php?id=7308>

HIGH PROFILE, LOW SECURITY

Big companies stumble with high profile security breaches that make your local WiFi coffee shop look secure.

<http://www.net-security.org/news.php?id=7309>

SERVICE MANAGEMENT FUNCTIONS: SECURITY MANAGEMENT

Failure to secure information can have a severe impact on business credibility.

<http://www.net-security.org/news.php?id=7310>

GROUP STUDIES INFRASTRUCTURE SECURITY

The Institute for Information Infrastructure Protection, a consortium of two dozen cybersecurity organizations charged with coordinating a national research and development program, last week began a \$8.5 million, two-year research program for securing computer-based systems that control critical infrastructures, such as dams.

<http://www.net-security.org/news.php?id=7311>

YET ANOTHER WORLDWIDE VIRUS SCARE THAT WASN'T

Yet another mobile virus is making the news, but the press still hasn't recognized that most of these stories are hyped up well beyond the actual threat level.

<http://www.net-security.org/news.php?id=7312>

HACKERS 'POISON' SEARCH ENGINE RESULTS

Users being directed to webpages containing malware.

<http://www.net-security.org/news.php?id=7313>

I.T. FRAMEWORKS DEMYSTIFIED: AVOIDING OVERLOAD

"Companies need to have a focus, set goals for implementing frameworks and devote adequate project management resources," David Pultorak, president of Fox IT, a consulting firm specializing in I.T. service management. "If you overdo these frameworks and misapply them or are not sure what the implementation is, the result can be less than satisfactory."

<http://www.net-security.org/news.php?id=7314>

MICROSOFT UPDATES CODE REMOVAL TOOL, PASSES ON PATCHES

Tool adds features to detect malicious code.

<http://www.net-security.org/news.php?id=7315>

E-MAIL FIREWALLS: A VITAL DEFENSE LAYER

The exponential rise in spam and e-mail-borne viruses has pushed must-have network security layers beyond traditional firewalls and intrusion-detection appliances.

<http://www.net-security.org/news.php?id=7316>

ASTARO ROLLS OUT NEW SPYWARE

Astaro released an improved version of its Linux-based security package that now includes gateway-based spyware protection against malware and the ability to block and removed infected software already on a system.

<http://www.net-security.org/news.php?id=7317>

MAIL SERVERS: RESOLVING THE IDENTITY CRISIS

Dspam filters spam with the best. In my installation, it stops over 98% of all spam: I've only had one false positive in the last year, and that was a message to the Dspam list that contained a real spam!

<http://www.net-security.org/news.php?id=7318>

UK CARD FRAUD HITS £505M

The banking industry hopes that losses in future will be contained by schemes such as Chip and PIN.

<http://www.net-security.org/news.php?id=7319>

COMBATING "CARDHOLDER NOT PRESENT" FRAUD

Of the security issues facing banks everywhere, prevention of card fraud has always been a high priority, and is set to grow even further in importance. The level of card fraud has risen significantly over recent years, caused in the main, by the explosion in the number and usage of payment cards and the associated high level of organised card crime activity.

<http://www.net-security.org/news.php?id=7320>

VIRUS AUTHORS SWITCH FROM HAVOC TO PROFIT

The last quarter of 2004 was categorised by a distinct trend of virus writers moving away from merely trying to create disruptions to developing malicious code that could potentially generate revenue.

<http://www.net-security.org/news.php?id=7321>

HUNGARIAN CHARGED WITH HACKING SONY ERICSSON NETWORK

Swedish authorities formally charged a 26-year-old Hungarian man with industrial espionage yesterday, after he allegedly hacked into the Sony Ericsson AB and Ericsson AB intranets.

<http://www.net-security.org/news.php?id=7322>

ENABLING AECURE SSL OWA ACCESS THROUGH THE ISA FIREWALL

To get you up and running with your secure OWA and Web site publishing through the ISA firewall, we'll present a two part series on how the ISA firewall handles remote access to Web sites using Web Publishing Rules.

<http://www.net-security.org/news.php?id=7323>

WIRELESS SECURITY STILL LAX

Report finds 36 per cent of the City's wireless networks left open to attack.

<http://www.net-security.org/news.php?id=7324>

WINDOWS NT4 HOLDOUTS OPEN TO SECURITY HOLE

Hundreds of thousands of web sites that continue to run the Windows NT4 face a security dilemma, with no public patch available for a vulnerability in a key Windows networking protocol.

<http://www.net-security.org/news.php?id=7325>

COMMWARRIOR MOBILE VIRUS COULD GO GLOBAL

Although viruses spread via mobile phones are sure to become more of a problem in the future, their novelty and the amount of press they are being given may be diverting attention from more pressing security concerns, Graham Cluley of security firm Sophos told NewsFactor.

<http://www.net-security.org/news.php?id=7326>

HACKERS BREACH LEXISNEXIS, GRAB INFO ON 32,000 PEOPLE

Hackers have compromised databases belonging to LexisNexis and stolen information on at least 32,000 people, according to a statement today from LexisNexis' parent company, Reed Elsevier PLC.

<http://www.net-security.org/news.php?id=7327>

JUNIPER SCORES WITH WLAN PROTECTOR

With the announcement of its NetScreen-5GT Wireless firewall this week, Juniper has firmly (and finally) jumped on the wireless bandwagon.

<http://www.net-security.org/news.php?id=7328>

EXPLOIT RELEASED FOR CA PRODUCT VULNERABILITY

Malicious hackers have released code that exploits a widespread vulnerability in software from Computer Associates International (CA), setting off a round of Internet scanning for vulnerable CA systems.

<http://www.net-security.org/news.php?id=7329>

UNSECURED WI-FI IN ONE THIRD OF ALL WIRELESS NETWORKS

The explosion of wireless networks is leaving global businesses wide open to 'drive-by hacking' and other security risks, experts have warned.

<http://www.net-security.org/news.php?id=7330>

A LOOK AT MICROSOFT'S ANTI SPYWARE BETA

Over the last couple of years, spyware has grown from being a nuisance into being an epidemic.

<http://www.net-security.org/news.php?id=7331>

CREDIT CARD FLAWS FUEL ONLINE FRAUD BONANZA

Ivan Remsik, senior analyst for financial services at Forrester, warned that, as long as multiple technologies use or reside on the same physical plastic entity, fraud is set to rise.

<http://www.net-security.org/news.php?id=7332>

TIME-DRIFT TECHNIQUE FINGERS PCS

Security researchers have developed a technique for remotely fingerprinting an electronic device using clock skews - small, microscopic deviations in device hardware.

<http://www.net-security.org/news.php?id=7333>

MANY WI-FI NETS OPEN TO SECURITY BREACHES

The explosion of Wi-Fi networks both in businesses and in public hotspots is needlessly exposing businesses and individual users to security risks because proper precautions aren't taken, according to research released Thursday by RSA Security.

<http://www.net-security.org/news.php?id=7334>

COMPANIES TURN TO SECURE IM TO MEET PRIVACY CONCERNS

With the use of instant messaging on an upswing, companies concerned about security, regulatory and privacy issues are sometimes turning to secure IM solutions that allow only authorised users access to IM -- while stopping others from sending instant messages.

<http://www.net-security.org/news.php?id=7335>

WINDOWS HONEYPOT FOILS WORMS

A new Microsoft labs project could lead to better security for Windows servers.

<http://www.net-security.org/news.php?id=7336>

ANTI-PHISHING LAWS ON THE CARDS

The US is drawing up a law to outlaw phishing, and EU legislation is likely to follow.

COMBATING "CARDHOLDER NOT PRESENT" FRAUD
Of the security issues facing banks everywhere, prevention of card fraud has always been a high priority, and is set to grow even further in importance. The level of card fraud has risen significantly over recent years, caused in the main, by the explosion in the number and usage of payment cards and the associated high level of organised card crime activity.
<http://www.net-security.org/article.php?id=774>

THE RISE OF THE CUSTOMISED SECURITY ATTACK

The shift to financially motivated email attacks means that individual organisations are being singled out as targets. Evidence of criminals using the Internet and email to carry out their crimes can be seen in many threats from phishing to online blackmail and extortion. Tackling more sinister customised plots requires a tailored approach, as blanket solutions are often only suitable for bulk attacks.

[Software]

Windows software is located at:

http://net-security.org/software_main.php?cat=1

Linux software is located at:

http://net-security.org/software_main.php?cat=2

Pocket PC software is located at:

http://net-security.org/software_main.php?cat=3

DROPBEAR SSH SERVER 0.45 (Linux)

Dropbear is an SSH 2 server, designed to be usable in small memory environments.

<http://www.net-security.org/software.php?id=490>

ETHERREAL 0.10.10 (Linux)

Ethereal is a free network protocol analyzer.

<http://www.net-security.org/software.php?id=99>

FE3D 0.8-2 (Windows)

fe3d is a 3D visualization tool for network (security) information, it currently supports insecure.org's nmap and languard XML log files.

<http://www.net-security.org/software.php?id=590>

GRSECURITY 2.1.2 (Linux)

grsecurity is a complete security system for Linux 2.4 that implements a detection/prevention/containment strategy.

<http://www.net-security.org/software.php?id=208>

IPTABLES 1.3.1 (Linux)

The netfilter/iptables project is the Linux 2.4.x / 2.5.x firewalling subsystem.

<http://www.net-security.org/software.php?id=4>

NUFW 1.0.0 (Linux)

NuFW is an "authenticating gateway". This means it requires authentication for any connections to be forwarded through the gateway.

<http://www.net-security.org/software.php?id=526>

SHOREWALL 2.2.2 (Linux)

Shorewall is an iptables based firewall that can be used on a dedicated firewall system, a multi-function masquerade gateway/server or on a standalone Linux system.

<http://www.net-security.org/software.php?id=40>

SNORT 2.3.1 (Linux)

Snort is a lightweight network intrusion detection system, capable of performing real-time traffic analysis and packet logging on IP networks.

<http://www.net-security.org/software.php?id=112>

SSL-EXPLORER 0.1.8 RC3 (Windows)

The 3SP SSL-Explorer is the world's first open-source SSL-based VPN solution of its kind.

<http://www.net-security.org/software.php?id=579>

VISUALROUTE 2005 9.2d (Windows)

VisualRoute delivers the functionality of key Internet "ping," "whois," and "traceroute" tools, in a high-speed visually integrated package.

<http://www.net-security.org/software.php?id=2>

WEBSCARAB 20050311-1804 (Windows)

WebScarab is a framework for analysing applications that communicate using the HTTP and HTTPS protocols.

<http://www.net-security.org/software.php?id=504>

WEPLAB 0.1.4 (Linux)

Weplab is a tool to review the security of WEP encryption in wireless networks from an educational point of view.

<http://www.net-security.org/software.php?id=539>

WINFINGERPRINT 0.6.1 (Windows)

Winfingerprint is a Win32 MFC VC++ .NET based security tool that is able to Determine OS, enumerate users, groups, shares, and more.

<http://www.net-security.org/software.php?id=103>
