[Security news]

SECURE REMOTE ACCESS TO OUTLOOK WEB ACCESS WEB SITES

In this article we'll dive into a key ISA firewall OWA security technology - SSL to SSL Bridging.

<http://www.net-security.org/news.php?id=7484>

SMARTCARDS MOVE A STEP CLOSER

Eftpos network operator ETSL has successfully processed its first smartcard transactions, another step on the road to retirement for conventional debit and credit cards that store information on magnetic stripes.

<http://www.net-security.org/news.php?id=7485>

REVIEW: PROGRAMS THAT MANAGE PASSWORDS

Don't think taking your passwords with you on a USB drive solves all

your security problems. A computer with a surreptitious keylogging program can still capture your passwords.
<http://www.net-security.org/news.php?id=7486>

MICROSOFT EX-EMPLOYEE SENTENCED FOR SOFTWARE THEFT

A former employee of Microsoft was sentenced to two years in prison and ordered to pay more than \$5 million in restitution for selling the world's largest software maker's products for personal gain, federal prosecutors said.
<http://www.net-security.org/news.php?id=7487>

IT SECURITY TASK FORCE SETS DEADLINES

An interagency task force charged with identifying federal IT security functions that could be provided centrally has set an ambitious timeline for completing its work.
<http://www.net-security.org/news.php?id=7488>

HOT SPOTS FOR HACKERS: WIRELESS NETWORKS

War drivers are people who ride in their cars with laptop computers and scout for wireless Internet, or WiFi, connections.
<http://www.net-security.org/news.php?id=7489>

GOOGLE YOURSELF TO IDENTIFY SECURITY HOLES

Google your own network or sites to identify possible security holes.
<http://www.net-security.org/news.php?id=7490>

STOLEN VOICES - THE CHALLENGE OF SECURING VOIP

Though securing VoIP calls brings with it a set of new and often unique challenges, businesses should give as much serious consideration to securing their voice traffic as they do to their data today.
<http://www.net-security.org/news.php?id=7491>

OLD VIRUSES STILL GOING STRONG

Security vendor Sophos has published a report revealing the top ten viruses causing problems for businesses around the world during the month of March 2005.
<http://www.net-security.org/news.php?id=7492>

NEW BUGS PUTS OUTLOOK AND IE USERS AT RISK

Software flaws ranked high risk.
<http://www.net-security.org/news.php?id=7493>

DATABASE ROOTKIT MENACE LOOMS

Crackers are developing more sophisticated techniques for take over the control of corporate databases using malicious code akin to malware already common on Unix platforms.
<http://www.net-security.org/news.php?id=7494>

RED HAT LINUX 4.0 OFFERS POWER, SECURITY

In our Clear Choice test of Red Hat Enterprise Linux 4.0, (we tested RHEL 4.0 Advanced Server, Red Hat's most robust Linux distribution), we found huge performance gains over previous editions, beefed up security options and vastly improved hardware detection mechanisms.
<http://www.net-security.org/news.php?id=7495>

ALLOWING THE ISA 2004 SERVER TO USE WINDOWS UPDATE SERVICES

Steve Moffat provides a step by step walkthrough on allowing the ISA firewall to use Windows Update Services.
<http://www.net-security.org/news.php?id=7496>

LOCAL AUTHORITIES UNDER GREAT WEB SECURITY THREAT

Local authorities and small government departments are at the greatest risk of IT security breaches in the public sector according to web management specialists, System Associates.
<http://www.net-security.org/news.php?id=7497>

ENTERPRISE I.T. STILL WARY OF XP SP2

On April 12th, the tool that Microsoft provided to block updates will be deactivated and PCs around the world will begin downloading the 266-MB upgrade. Only seven percent of those questioned in the AssetMetrix survey had already installed the software.
<http://www.net-security.org/news.php?id=7498>

HANDHELD SECURITY TOO EXPENSIVE FOR THE ENTERPRISE?

If your enterprise relies on PDAs and smartphones to get business done, you may be paying too much to secure it.
<http://www.net-security.org/news.php?id=7499>

THE PRICE OF RESTRICTING VULNERABILITY PUBLICATIONS

As in other fields of science, there is a real danger that publication restrictions will inhibit the advancement of the state of the art in computer security.
<http://www.net-security.org/news.php?id=7500>

CARJACKERS SWIPE BIOMETRIC MERC, PLUS OWNER'S FINGER

A Malaysian businessman has lost a finger to car thieves impatient to get around his Mercedes' fingerprint security system. Accountant K Kumaran, the BBC reports, had at first been forced to start the S-class Merc, but when the carjackers wanted to start it again without having him along, they chopped off the end of his index finger with a machete.
<http://www.net-security.org/news.php?id=7501>

SYBASE INVOKES LICENCE GAG IN FLAW DISCLOSURE ROW

Database maker Sybase will likely drop legal threats against a UK-based security company this week, allowing the company to publish details on six flaws, a source familiar with the negotiations said on

Monday.

<http://www.net-security.org/news.php?id=7502>

THE DAY AFTER: YOUR FIRST RESPONSE TO A SECURITY BREACH

What can you do to prevent this from ever happening again?

<http://www.net-security.org/news.php?id=7503>

MARCH 2005 DNS POISONING SUMMARY

This report is intended to provide useful details about this incident to the community.

<http://www.net-security.org/news.php?id=7504>

COMPUTER CRIME COST TO BUSINESS SOARS

NHTCU figures put cost at £2.4bn in 2004.

<http://www.net-security.org/news.php?id=7505>

SERVER AND DOMAIN ISOLATION USING IPSEC AND GROUP POLICY

This article demonstrates how IPsec transport mode can be leveraged as one of the best means currently available to protect corporate networks.

<http://www.net-security.org/news.php?id=7506>

INTERVIEW WITH JON LECH JOHANSEN

Depending on your point of view, Jon Lech Johansen is either your hero or adversary. To the copyright industry, Jon Lech Johansen has been a detriment to their policy of control since the advent of De_CSS (Decrypt Content Scrambling System.)

<http://www.net-security.org/news.php?id=7507>

THE FEDS CAN OWN YOUR WLAN TOO

This article will be a general overview of the procedures used by the FBI team.

<http://www.net-security.org/news.php?id=7508>

MAKING THE MICROSOFT OPERATIONS MANAGER MORE SECURE

Microsoft Operations Manager (MOM) 2005 is a great solution for managing your Exchange, SQL and other servers - but what about security?

<http://www.net-security.org/news.php?id=7509>

IN PRAISE OF WINDOWS 2003 SP1

Usually I get to use this space to complain about Microsoft's poor security practices, but not this time -- with last week's release of Windows 2003 Service Pack 1, this time they get praise.

<http://www.net-security.org/news.php?id=7510>

WEB POSTCARDS HIDE TROJAN HORSE PROGRAMS
SANS Institute warns of attacks that trick users into installing Trojan remote access programs.
<http://www.net-security.org/news.php?id=7511>

MABIR MOBILE VIRUS ON THE PROWL
While the Mabir virus can spread by Bluetooth, there appears to be a flaw in the virus program.
<http://www.net-security.org/news.php?id=7512>

WOMAN TO LEAD UK FIGHT AGAINST CYBERCRIME
Detective chief superintendent Sharon Lemon has been appointed head of the National Hi-Tech Crime Unit.
<http://www.net-security.org/news.php?id=7513>

THE WIRELESS SECURITY BALANCE GAME
Making sure that your wireless LAN network is secure is clearly important, but with the technology changing so rapidly, it appears that many are sticking with the "good enough" approach.
<http://www.net-security.org/news.php?id=7514>

THE INVISIBLE THREAT FROM MOBILE DEVICES
With the increasing convergence of phone and network aware devices, come new and often unnoticed threats. Features such as built-in cameras, wireless networking, Bluetooth, calendars, phone books, all present their own particular problems, and associated risks.
<http://www.net-security.org/news.php?id=7515>

UNIVERSITY SYSTEM WORKS TO THWART HACKERS
The state university system's computing service building, which is at UNLV, is one of the most protected buildings on campus -- or so local legend goes.
<http://www.net-security.org/news.php?id=7516>

MORE SOPHISTICATED CYBER CRIME COSTS UK BILLIONS
National Hi-Tech Crime Unit puts cost at \$4.61 billion.
<http://www.net-security.org/news.php?id=7517>

GERMANY'S POSTBANK IS HIT BY NEW PHISHING ATTACK
Germany's Postbank has been the target of another phishing attack, its third after two back-to-back assaults last year.
<http://www.net-security.org/news.php?id=7518>

VIRUS ATTACKS UP 50 PER CENT
The number of virus attacks on enterprises increased by half between 2003 and 2004, according to ICSA Labs, an independent division of internet security company Cybertrust.
<http://www.net-security.org/news.php?id=7519>

IT MANAGERS IGNORE MOBILE SECURITY

Blame the user instead.

<http://www.net-security.org/news.php?id=7520>

DOES SECURITY RUN IN YOUR VEINS?

Fujitsu's system uses palm vein patterns to identify bank customers in Japan.

<http://www.net-security.org/news.php?id=7521>

OPENING EYES TO HACKERS

Europeans bracing for rise in data theft.

<http://www.net-security.org/news.php?id=7522>

RFID POLICY PANEL RAISES PRIVACY CONCERNS

Lack of authentication means identity thieves could set up fake readers.

<http://www.net-security.org/news.php?id=7523>

HOW 20% EFFORT CAN GET YOU 80% SECURITY

To manage risk, maintain razor-sharp security architecture and still enjoy a peaceful night's sleep, security professionals at this week's InfoSec World conference offered this advice: Know your limits, speak the boss's language and embrace change.

<http://www.net-security.org/news.php?id=7524>

FEWER PERMISSIONS ARE KEY TO LONGHORN SECURITY

Questions remain about Microsoft's plans for a new user privileges model.

<http://www.net-security.org/news.php?id=7525>

CHECK POINT TO ROLL OUT SECURE WIRELESS ACCESS POINT

Check Point next week will announce a security appliance for large numbers of remote sites that are part of corporate VPNs.

<http://www.net-security.org/news.php?id=7526>

MARKET ANALYSIS: STORAGE SECURITY

You wouldn't hire any old security service to guard your company's important physical assets, would you? We outline areas of vulnerability and present questions to get you thinking about the level of protection your organization needs.

<http://www.net-security.org/news.php?id=7527>

SECURITY IN THE PALM OF YOUR HAND

While the number of corporate employees that work remotely has grown significantly during the past several years, the number of threats and ability to cause significant damage to the corporate network has also skyrocketed.

<http://www.net-security.org/news.php?id=7528>

DRESSING UP FOR SECURITY SUCCESS

Linux PAM (Pluggable Authentication Modules) is a wonderful authentication application library that's used by essential programs like 'login' and 'passwd', and, so, is included in virtually every Linux distribution.

<http://www.net-security.org/news.php?id=7529>

WILL SONY CRACKDOWN ON PSP HACKS?

Less than two weeks after Sony released its long-anticipated PlayStation Portable, a handheld gaming device with multimedia capabilities, the device's most ardent fans began spreading details about their successful hacks.

<http://www.net-security.org/news.php?id=7530>

DNS ATTACKS ATTEMPT TO MISLEAD CONSUMERS

Employees at more than 500 companies have fallen victim to domain attacks in the last month, underscoring the increasing popularity of the tactic among Internet fraudsters, security experts said this week.

<http://www.net-security.org/news.php?id=7531>

PHONEY MICROSOFT MAIL CAUSES CONCERN

Trojan attack spreading.

<http://www.net-security.org/news.php?id=7532>

EIGHT PATCHES LINED UP FOR MS APRIL PATCH BATCH

Microsoft is due to publish critical updates for Office and MSN Messenger when it delivers its next batch of security updates next Tuesday (12 April).

<http://www.net-security.org/news.php?id=7533>

PARANOID PENGUIN - LINUX VPN TECHNOLOGIES

Which virtual private network is right for you? Mick runs down the options and comes up with some winners and some warnings.

<http://www.net-security.org/news.php?id=7534>

UNDERENCRYPTED AND OVEREXPOSED

Do you know where your pictures are? A stolen hard drive teaches a lesson.

<http://www.net-security.org/news.php?id=7535>

AUTOPSY FORENSIC BROWSER 2.05 (Linux)

The Autopsy Forensic Browser is a graphical interface to the command line digital forensic analysis tools in The Sleuth Kit.

<http://www.net-security.org/software.php?id=216>

CHKROOTKIT 0.45 (Linux)

Chkrootkit is a tool to locally check for signs of a rootkit.

<http://www.net-security.org/software.php?id=210>

EASY INTEGRITY CHECK SYSTEM 3.1b (Linux)

Easy integrity check system is designed primarily for system administrators for filesystem integrity checkings.

<http://www.net-security.org/software.php?id=410>

GFI MAILESENTIALS FOR EXCHANGE/SMTP 11 (Windows)

This is a server based anti spam & email management solution for Microsoft Exchange Server & Notes/SMTP servers.

<http://www.net-security.org/software.php?id=329>

HONEYNET SECURITY CONSOLE 2.0 (Windows)

Honeynet Security Console is an analysis tool to view events on your personal network or honeynet.

<http://www.net-security.org/software.php?id=587>

KISMAC 0.10a (Mac OS X)

KisMAC is a free stumbler application for MacOS X, that puts your card into the monitor mode.

<http://www.net-security.org/software.php?id=625>

LITTLE SNITCH 1.1.1 (Mac OS X)

Little Snitch alerts you on outgoing network connections.

<http://www.net-security.org/software.php?id=626>

MAC GPG 1.2.4 (Mac OS X)

Mac GNU Privacy Guard (Mac GPG for short) is, after a fashion, the Mac OS X port of GnuPG.

<http://www.net-security.org/software.php?id=628>

NAGIOS 2.0b3 (Linux)

Nagios is a host and service monitor designed to inform you of network problems before your clients, end-users or managers do.

<http://www.net-security.org/software.php?id=279>

OP 1.27 (Linux)

The op tool provides a flexible means for system administrators to grant access to certain root operations without having to give them full superuser privileges.

<http://www.net-security.org/software.php?id=321>

PASSWORD SAFE 2.09 (Windows)

Password Safe is a password database utility.

<http://www.net-security.org/software.php?id=172>

SAFE'N'SEC 1.1 (Windows)

Safe'n'Sec is a security solution to combat unknown viruses, spyware packages, Trojans, zero day exploits and combined attacks.

<http://www.net-security.org/software.php?id=627>

SHOREWALL 2.2.3 (Linux)

Shorewall is an iptables based firewall that can be used on a dedicated firewall system, a multi-function masquerade gateway/server or on a standalone Linux system.

<http://www.net-security.org/software.php?id=40>

SILC CLIENT 1.0.2 (Linux)

SILC is much more than just about encrypting the traffic. That is easy enough to do with IRC and SSL hybrids, but even then the entire network cannot be secured, only part of it.

<http://www.net-security.org/software.php?id=189>

SSL-EXPLORER 0.1.9 (Windows)

The 3SP SSL-Explorer is the world's first open-source SSL-based VPN solution of its kind.

<http://www.net-security.org/software.php?id=579>

THE SLEUTH KIT 2.01 (Linux)

The Sleuth Kit is a collection of UNIX-based command line file system forensic tools.

<http://www.net-security.org/software.php?id=215>

YASSL 0.9.8 (Linux)
yaSSL is an SSL Library for programmers building security
functionality into their applications and devices.

[Webcasts]

All webcasts are located at:
<http://net-security.org/webcasts.php>

Best Practices for Deploying & Securing Wireless Networks
Organized by Airdefense on 12 April 2005, 2:00 PM
<http://www.net-security.org/webcast.php?id=369>

Vulnerability Expert Forum US
Organized by eEye on 13 April 2005, 1:00 PM
<http://www.net-security.org/webcast.php?id=277>

Exposing Spyware. Don't be lured into the Trap
Organized by ISS on 13 April 2005, 3:00 PM
<http://www.net-security.org/webcast.php?id=370>

Vulnerability Expert Forum Europe
Organized by eEye on 14 April 2005, 3:30 PM
<http://www.net-security.org/webcast.php?id=258>

[Conferences]

All conferences are located at:
<http://net-security.org/conferences.php>

OWASP AppSec Europe 2005 Conference
Organized by OWASP - 9 April-10 August 2005
<http://www.net-security.org/conference.php?id=132>

4th Annual PKI R&D Workshop (PKI'05)
Organized by National Institute of Standards and Technology - 19
April-21 April 2005
<http://www.net-security.org/conference.php?id=115>

Infosecurity Europe 2005
Organized by Reed Exhibitions - 26 April-28 April 2005
<http://www.net-security.org/conference.php?id=126>

DallasCon 2005 Professional Cyber Defense Conference
Organized by DallasCon - 2 May-5 May 2005
<http://www.net-security.org/conference.php?id=127>

The International Conference on Computational Science & Its
Applications (ICCSA 05)
Organized by Institute of High Performance Computing - 9 May-12 May
2005
<http://www.net-security.org/conference.php?id=116>

The 18th International FLAIRS Conference
Organized by The American Association of Artificial Intelligence - 16
May-18 May 2005
<http://www.net-security.org/conference.php?id=117>

Second European PKI Workshop
Organized by University of Salford - 30 June-1 July 2005
<http://www.net-security.org/conference.php?id=118>

SIG SIDAR Conference on Detection of Intrusions and Malware &
Vulnerability Assessment (DIMVA 2005)
Organized by German Informatics Society - 7 July-8 July 2005
<http://www.net-security.org/conference.php?id=119>

The 4th European Conference on Information Warfare and Security (ECIW
2005)
Organized by Academic Conferences International - 11 July-15 July
2005
<http://www.net-security.org/conference.php?id=120>

The 32nd International Colloquium on Automata, Languages and
Programming (ICALP'05)
Organized by European Association for Theoretical Computer Science -
11 July-15 July 2005
<http://www.net-security.org/conference.php?id=121>

Crypto 2005
Organized by International Association for Cryptologic Research - 14

August-18 August 2005
<http://www.net-security.org/conference.php?id=122>

8th Information Security Conference(ISC'05)
Organized by Institute for Infocomm Research - 21 September-23
September 2005
<http://www.net-security.org/conference.php?id=123>

The 4th International Workshop for Applied PKI (IWAP'05)
Organized by Institute for Infocomm Research - 21 September-23
September 2005
<http://www.net-security.org/conference.php?id=124>

RSA Conference Europe 2005
Organized by RSA Conference - 17 October-19 October 2005
<http://www.net-security.org/conference.php?id=133>

Asiacrypt 2005
Organized by International Association for Cryptologic Research - 1
December-4 December 2005
<http://www.net-security.org/conference.php?id=125>
