[Security news]

SMALL DOESN'T MEAN ANYTHING TO HACKERS
Being small doesn't make you invisible.
<http://www.net-security.org/news.php?id=8302>

ORACLE SIMPLIFIES SOA, WEB SERVICES SECURITY
Oracle announced the industry's first integrated, standards-based business process platform that simplifies the security of service-oriented architectures (SOAs) and Web services.
<http://www.net-security.org/news.php?id=8303>

MOZILLA SITE ATTACKED TO SPREAD SPAM
A site promoting Firefox was attacked last weekend in order to

commandeer it to send spam, the Mozilla Foundation said on Friday.
<http://www.net-security.org/news.php?id=8304>

RETHINKING THE DATA SECURITY BOX

Computer security can be a difficult problem to get a handle on, so sometimes it takes some creative thinking. I would say it involves "thinking outside the box," but that's a little too trite and overused.

<http://www.net-security.org/news.php?id=8305>

GOOGLE GROWTH YIELDS PRIVACY FEAR

Google is at once a powerful search engine and a growing e-mail provider. It runs a blogging service, makes software to speed web traffic and has ambitions to become a digital library. And it is developing a payments service.

<http://www.net-security.org/news.php?id=8306>

HOW TO PREVENT PHARMING

Protect your company's online reputation by locking down DNS and guarding against domain hijacking.

<http://www.net-security.org/news.php?id=8307>

ONLINE PRIVACY REGULATIONS FORCING BETTER HANDLING OF DATA

In essence, computerized banking transactions and Internet commerce practices have put new twists on old identity theft methods used by criminals. Federal guidelines are just now starting to focus on electronic processes that did not exist when other federal regulations were first designed.

<http://www.net-security.org/news.php?id=8308>

HOW TO PREVENT YOUR WEBSITE FROM BEING USED AGAINST YOU IN A PHISHING ATTACK

Phishing has become more and more commonplace and these attacks put companies that conduct online business at risk, and threaten to undermine consumer confidence.

<http://www.net-security.org/news.php?id=8309>

SECURE RSS SYNDICATION

I have a problem. It's actually a pretty common problem. I have data that I want to syndicate to myself, but I don't want you to see it.

<http://www.net-security.org/news.php?id=8310>

TROUBLESHOOTING IPSEC TUNNEL MODE SCENARIOS

In this article we'll take a look at how to troubleshoot a common site to site IPSec tunnel-mode VPN scenario.

<http://www.net-security.org/news.php?id=8311>

MALWARE MAELSTROM MENACES UK

Lock up your email servers - there's a blizzard of Windows malware out there.

<http://www.net-security.org/news.php?id=8312>

VIRUS BOUNTIES NO LONGER EFFECTIVE

Wild West methods increasingly irrelevant, say security experts.

<http://www.net-security.org/news.php?id=8313>

PREPARE FOR DISASTERS THAT COULD BRING YOUR BUSINESS TO A HALT

This article looks at how 'non-traditional' disasters, such as gas leaks and human error, can impact on the operations of your organisation.

<http://www.net-security.org/news.php?id=8314>

MICROSOFT ADMITS TO MEDIA CENTER HOLE

Security flaw could allow hackers to crash PCs.

<http://www.net-security.org/news.php?id=8315>

WATCH OUT FOR THIRD-PARTY SYSTEMS WHEN MANAGING NETWORK SECURITY

Even the best security efforts may be missing an entire class of susceptible systems: equipment maintained by other companies. Here's what to watch out for.

<http://www.net-security.org/news.php?id=8316>

EMAIL AUTHENTICATION TAKES BIG BITE OF SPAM

New research suggests anti-spam tools are slowly winning the war on junk mail.

<http://www.net-security.org/news.php?id=8317>

FINANCIAL IMPACT OF SOME SECURITY BREACHES SKYROCKETS

The financial impact of the theft of proprietary information has more than doubled in the last year, according to the 10th annual CSI/FBI Computer Crime and Security Survey.

<http://www.net-security.org/news.php?id=8318>

TO STOP HACKER ATTACKS, DON'T RELY ON ISPS

Your Internet service provider isn't to blame if your company is hit with a distributed denial-of-service attack.

<http://www.net-security.org/news.php?id=8319>

WINDOWS XP DOS BUG WORSE THAN THOUGHT

It affects several other editions of Windows, and could have buffer overflow potential.

<http://www.net-security.org/news.php?id=8320>

BRINGING SPAMMERS TO THEIR KNEES

PC World Senior Writer Tom Spring discusses the latest trends in spam

and gives you the tips and tools for getting rid of it.
<http://www.net-security.org/news.php?id=8321>

THE NEED TO FOCUS ON HIDDEN SECURITY THREATS
Keeping up with spyware, key loggers, Trojans, exploits and other malicious software is challenge on its own.
<http://www.net-security.org/news.php?id=8322>

GAO: FEDERAL SYSTEMS SECURITY STILL LACKING
The good news: Federal agencies are making progress in implementing stronger information security regimes. The bad news: It hasn't helped much.
<http://www.net-security.org/news.php?id=8323>

TROJANS STAMPEDE ACROSS THE WEB
Malicious code targeting bank accounts.
<http://www.net-security.org/news.php?id=8324>

ETHICAL ISSUES FOR IT SECURITY PROFESSIONALS
This article takes a look at a neglected area of most computer security professionals' training: how to deal with the ethical issues that can - and invariably do - crop up during the course of doing your job.
<http://www.net-security.org/news.php?id=8325>

NETWORK MONITORING WITH NGREP
With ngrep, you can analyze network traffic in a manner similar to that of other network sniffers. However, unlike its brethren, ngrep can match regular expressions within the network packet payloads.
<http://www.net-security.org/news.php?id=8326>

A SECURITY QUALIFICATION IS A MUST BUT MAKE SURE IT FITS YOUR FIELD
Europe will need another 680,000 information security professionals by 2008.
<http://www.net-security.org/news.php?id=8327>

NEW WORM POSES AS ITUNES
Worm writers are piggy-backing on the success of Apple's iTunes digital juke box according to an anti-virus software firm.
<http://www.net-security.org/news.php?id=8328>

CAN'T RECALL PASSWORDS? WRITE THEM DOWN
Flying in the face of convention, a security expert is now telling users to write down passwords and stick the slip of paper in their wallets.
<http://www.net-security.org/news.php?id=8329>

VISA, AMEX CUT TIES WITH CARDSYSTEMS

Visa USA has dumped a card processing firm blamed for a security breach affecting anything up to 40m The payment-processing company left 40 million accounts vulnerable to hackers. A Visa spokeswoman said CardSystems "has not corrected, and cannot at this point correct, the failure to provide proper data security for Visa accounts."

<http://www.net-security.org/news.php?id=8330>

ORACLE TAKEN TO TASK FOR TIME TO FIX VULNERABILITIES

Claiming that Oracle has failed to fix six vulnerabilities despite having more than 650 days to issue a patch, researchers at security firm Red Database Security published details of the flaws on Tuesday.

<http://www.net-security.org/news.php?id=8331>

WRITING SECURE PHP

Here are a few of the more common security problems and how to avoid them.

<http://www.net-security.org/news.php?id=8332>

ATTACKERS TURNING TO FAKE ONLINE GREETING CARDS

The next e-mail greeting card you get may come with a nasty surprise.

<http://www.net-security.org/news.php?id=8333>

BILL PUTS SPOTLIGHT BACK ON DATA THEFT

Several prominent U.S. Senators, including the leaders of the Commerce Committee, have introduced another bill that takes on the growing online menace of identity and data theft.

<http://www.net-security.org/news.php?id=8334>

INTERNET USERS IGNORANT ABOUT DATA PRIVACY

U.S. Internet users are dangerously ignorant about the type of data that Web site owners collect from them.

<http://www.net-security.org/news.php?id=8335>

SECURING WIRELESS TECHNOLOGY

Wireless networking frees mobile workers from wires and cables, allowing them to collect and view data whenever, wherever they choose.

<http://www.net-security.org/news.php?id=8336>

ADVANCED CODE INJECTION TECHNIQUES AND TESTING PROCEDURES

Depending upon the nature of the application and the way the malicious data is stored or rendered, the attacker may be able to conduct a second-order code injection attack.

<http://www.net-security.org/news.php?id=8337>

SMALL BUSINESSES LACK IT SECURITY

Companies are not increasing budgets for the most basic systems, including email and wireless network connections.
<http://www.net-security.org/news.php?id=8338>

HP PROLIANT DL320 HARDWARE ISA FIREWALL REVIEW

This sturdy ISA-based hardware firewall is targeted at the experienced ISA firewall administrator who wants a pre-built and pre-hardened ISA firewall delivered to the door, ready to plug in and deploy.
<http://www.net-security.org/news.php?id=8339>

MICROSOFT BUYS ANOTHER SECURITY FIRM

Software maker buys FrontBridge Technologies, makers of an e-mail security product.
<http://www.net-security.org/news.php?id=8340>

REVIEW: GFI LANGUARD NETWORK SECURITY SCANNER 6

This is a review of the new release of LANguard Network Security Scanner (GFI LANguard NSS) from GFI. NSS will scan computers for known vulnerabilities and common misconfigurations and other potential security issues. It produces reports that can be used to assist in the tracking and mitigation of security issues that have been identified.
<http://www.net-security.org/news.php?id=8341>

INTERVIEW WITH DAN KAMINKSY ON MICROSOFT 'S SECURITY

Dan Kaminsky is a security researcher focusing on applied mechanisms for analyzing and understanding very large scale networks.
<http://www.net-security.org/news.php?id=8342>

SYSTEM SECURITY: A COMPREHENSIVE APPROACH

This security white paper outlines the seven critical categories of system security necessary to implement a comprehensive security framework.
<http://www.net-security.org/news.php?id=8343>

SECURITY FLAWS SLIP THROUGH ORACLE PATCH CYCLE

A security research firm has reported details of six vulnerabilities in products from Oracle that were not fixed in the supplier's last round of patches.
<http://www.net-security.org/news.php?id=8344>

ID THEFT FEARS PROMPT ECOMMERCE BOYCOTT

Identity theft fears are prompting some UK consumers to avoid buying goods or services online or over the phone, according to a national survey published this week.
<http://www.net-security.org/news.php?id=8345>

'ALIEN GREETING' HARBOURS WINDOWS MALWARE

A message purporting to come from an alien is in reality, you've guessed it, the latest Windows PC-infecting computer virus.

<http://www.net-security.org/news.php?id=8346>

SYS ADMIN: FRIEND OR FOE?

The network system administrator is the first line, and sometimes last line of defence that a network has. What happens though if that very same defender becomes more of a liability?

<http://www.net-security.org/news.php?id=8347>

IS WIRELESS SECURITY POINTLESS?

While no personal information appears to have been compromised, SpreadFirefox has encouraged all users to log into their accounts and change their passwords. The site sent out an e-mail to all account holders with instructions on how to do so.

<http://www.net-security.org/news.php?id=8348>

CARDSYSTEMS MAY BE DRIVEN OUT OF BUSINESS AFTER THE ATTACK

The head of a payment-processing firm that was infiltrated by computer hackers, exposing as many as 40 million credit card holders to possible fraud, told Congress on Thursday that his company is "facing imminent extinction" because of its disclosure of the breach and industry's reaction to it.

<http://www.net-security.org/news.php?id=8349>

IDENTIFYING P2P USERS USING TRAFFIC ANALYSIS

With the emergence of Napster in the fall of 1999, peer to peer (P2P) applications and their user base have grown rapidly in the Internet community. With the popularity of P2P and the bandwidth it consumes, there is a growing need to identify P2P users within the network traffic.

<http://www.net-security.org/news.php?id=8350>

BIG BROTHER? THE REST OF THE FAMILY IS LURKING ONLINE

With personal data so available, cyber-posses face few barriers in using it as a weapon.

<http://www.net-security.org/news.php?id=8351>

BIGGEST 419 BUST IN HISTORY

The FBI and Spanish police have arrested 310 people in Malaga, Spain in connection with a \$100m bogus (email) lottery scam run by Nigerian gangs.

<http://www.net-security.org/news.php?id=8352>

LINUX SCRIPTS MAKE WIRELESS MANAGEMENT A SNAP

Powerful tools can help you run your own wireless ISP.

<http://www.net-security.org/news.php?id=8353>

SECURE VOIP ON GOVERNMENT'S HIT LIST

Given recent forecasts of growth in the government telecom market, security issues associated with VoIP are understandably in the spotlight.

<http://www.net-security.org/news.php?id=8354>

ORACLE TAKES YEARS TO FIX HOLES

The database vendor fails to patch security holes, despite knowing about the vulnerabilities for as long as two years, an accuser says. But Oracle says it fixes holes in order of severity.

<http://www.net-security.org/news.php?id=8355>

LOST DOG SCAMS BITE ONLINE USERS

Scammers have taken a traditional double-cross played on owners of lost dogs to the Internet.

<http://www.net-security.org/news.php?id=8356>

INTRUSION DETECTION ON STEROIDS

I like Sourcefire's strategy of employing several technologies to detect intrusions, but I was more impressed by the RNA sensors' ability to detect vulnerabilities in specific hosts in real time.

<http://www.net-security.org/news.php?id=8357>

80 SECURITY TIPS

Whether your PC is 3 years or 3 days old, it faces the same, sometimes scary security issues.

<http://www.net-security.org/news.php?id=8358>

DESKTOP SECURITY: PROACTIVE PROTECTION AGAINST KNOWN AND UNKNOWN DESKTOP SECURITY THREATS

With security threats growing, it is imperative to have a multi-layered security solution that is fast, strong and nimble.

<http://www.net-security.org/news.php?id=8359>

MITNICK PREACHES SOCIAL ENGINEERING AWARENESS

Mitnick says people are the weakest link and organizations must build 'human firewall'.

<http://www.net-security.org/news.php?id=8360>

BEWARE THE ICE VIRUS HOAX

Experts at Sophos have warned of a new virus hoax. If you receive a mail claiming that ICE is a virus, first don't believe it, second don't forward it, because it's a hoax.

<http://www.net-security.org/news.php?id=8361>

SPY WORM SPREADS OVER INSTANT MESSAGING

Microsoft's MSN Messenger and AOL's Instant Messenger services are

being targeted by malicious messages containing links that could infect a computer with a Trojan horse or dangerous worm.
<http://www.net-security.org/news.php?id=8362>

UK COMPANIES DON'T HAVE BASIC SECURITY MEASURES FOR SMART HANDHELDS
Forty per cent of businesses feel they do not secure handheld devices to the level they secure laptops.
