[Security news]

MIRROR YOUR WEB SITE WITH RSYNC

This tutorial shows how you can mirror your web site from your main web server to a backup server that can take over if the main server fails.

<http://www.net-security.org/news.php?id=11232>

WHATEVER HAPPENED TO PGP?

PGP is often thought of as an encryption system, but your private key is a digital signature that can prove who your message comes from, as well as showing that it hasn't been tampered with.

<http://www.net-security.org/news.php?id=11233>

YAHOO MESSENGER WORM TURNS ON IE

One of the 'oddest and most insidious pieces of malware'.

<http://www.net-security.org/news.php?id=11234>

THREE SENTENCED FOR 'WAREZ' ACTIVITIES

Three men were sentenced Friday on copyright-infringement charges for being leading members of warez groups, the DOJ said.
<http://www.net-security.org/news.php?id=11235>

MEET THE HACKERS

Cybercrooks are stealing billions. An inside look at law enforcement's biggest targets.
<http://www.net-security.org/news.php?id=11236>

E-MAIL ATTACKS TARGET UNPATCHED WORD HOLE

Antivirus companies issue warning about sophisticated phishing attacks.
<http://www.net-security.org/news.php?id=11237>

COMMERCE SIGNS UP FOR SECURITY TRAINING

The Commerce Department has awarded a task order to the International Information Systems Security Certification Consortium, or (ISC)², to provide an expanded information security education program for the department's information security employees.
<http://www.net-security.org/news.php?id=11238>

HACKING SUSE LINUX 10.1

When you're done installing SUSE Linux 10.1 OSS, your desktop system is not complete.
<http://www.net-security.org/news.php?id=11239>

HOST-BASED INTRUSION PREVENTION MAY BE LAST BEST DEFENSE

Network- and server-based intrusion prevention may still be necessary, but companies are moving IPS down to the desktop level for better protection.
<http://www.net-security.org/news.php?id=11240>

MOBILE DEVICES: GROWING SECURITY THREAT

"The rapid uptake of advanced wireless devices by the enterprise workforce is making malware a more serious threat to telecoms and I.T. resources," said Tim Kridel, research analyst at Light Reading and author of the new report.
<http://www.net-security.org/news.php?id=11241>

MSN PHISHER SENTENCED TO 21 MONTHS

In an effort to combat phishing, Microsoft has filed 125 civil lawsuits against phishers to date, and secured takedowns of more than 2,000 phishing web sites, the company says.
<http://www.net-security.org/news.php?id=11242>

WHY WE PUBLISHED THE AT&T DOCS

A file detailing aspects of AT&T's alleged participation in the

National Security Agency's warrantless domestic wiretap operation is sitting in a San Francisco courthouse. But the public cannot see it because, at AT&T's insistence, it remains under seal in court records.

<http://www.net-security.org/news.php?id=11243>

VIRUS-PRONE APPLICATIONS BURROW INTO NETWORKS

A snapshot of large US companies has found that 'viral' applications such as VoIP, instant messaging, webmail and P2P applications are now endemic on many networks.

<http://www.net-security.org/news.php?id=11244>

SKYPE SICK WITH BAD BUG, MUST BE PATCHED

VoIP provider Skype rolled out an update on Friday to quash a bug that can let attackers send a file to a recipient without his or her consent, and potentially obtain access to the computer and its data.

<http://www.net-security.org/news.php?id=11245>

INTEL MACS VULNERABLE TO 'CHIP LEVEL' THREATS

Security vendors over state danger of hackers attacking computer processors.

<http://www.net-security.org/news.php?id=11246>

COMMERCIAL SOFTWARE OPENS CYBER-TERROR BACKDOOR

US firm warns of life-cycle attacks buried deep within millions of lines of code.

<http://www.net-security.org/news.php?id=11247>

SKYPE PATCHES SECURITY FLAW

Users are advised to upgrade their client software to fix the problem.

<http://www.net-security.org/news.php?id=11248>

SPAM FILTERING TECHNIQUES

Six approaches to eliminating unwanted e-mail.

<http://www.net-security.org/news.php?id=11249>

EUROPEAN CONSUMERS PLUG INTO BIOMETRICS

Privacy concerns sidelined as benefits emerge, says survey.

<http://www.net-security.org/news.php?id=11250>

MICROSOFT'S SECURITY AMBITIONS

Microsoft continues to reveal its security ambitions in very obvious ways.

<http://www.net-security.org/news.php?id=11251>

SECURE FIREFOX AND IM WITH PUTTY

There are times when you want to connect to the Internet through unknown and/or insecure networks such as the local Panera or other WiFi hotspot. If you aren't careful, you might make it all too easy for someone to sniff your connection using Ettercap.
<http://www.net-security.org/news.php?id=11252>

VOICE ENCRYPTION MAY DRAW U.S. SCRUTINY
Philip R. Zimmermann wants to protect online privacy. Who could object to that?
<http://www.net-security.org/news.php?id=11253>

WANT TO PASS YOUR NEXT SECURITY AUDIT?
ISO 27001 positions companies to move quickly when they spot a potential threat.
<http://www.net-security.org/news.php?id=11254>

BIOMETRIC WHITEWASH GATHERS PACE
Europe has passed the "tipping point" over which citizens fall head over heels in love with the idea of a society regulated by biometric identity scanners, according to a survey published today.
<http://www.net-security.org/news.php?id=11255>

VA DATA FILES ON MILLIONS OF VETERANS STOLEN
The Veterans Affairs Department today revealed that personal, identifying data for as many as 26 million American veterans was stolen from a VA employee's home in May.
<http://www.net-security.org/news.php?id=11256>

A MALWARE MATRIOSKA
Out of all instant messaging clients out there, ICQ is probably the easiest to spam, because the accounts are based on relatively small integer numbers.
<http://www.net-security.org/news.php?id=11257>

SAN FRANCISCO TO PUSH GOOGLE ON PRIVACY
Among other requests, the city will seek an "opt-in" system for users to share personal information.
<http://www.net-security.org/news.php?id=11258>

REPORTING VULNERABILITIES IS FOR THE BRAVE
I was involved in disclosing a vulnerability found by a student to a production web site using custom software (i.e., we didn't have access to the source code or configuration information).
<http://www.net-security.org/news.php?id=11259>

SURVEY: DATA SECURITY BECOMING POLITICAL ISSUE
Voters are beginning to see cybersecurity as an issue they will judge political candidates on, the Cyber Security Industry Alliance said.

<http://www.net-security.org/news.php?id=11260>

WHAT IS A DMZ?

"DMZ" is short for demilitarized zone and is a military term meaning "is an area, usually the frontier or boundary between two or more military powers (or alliances), where military activity is not permitted, usually by peace treaty, armistice or other bilateral or multilateral agreement."

<http://www.net-security.org/news.php?id=11261>

SECURE USB FLASH DRIVE IN DEVELOPMENT

Recently, at the WinHEC Windows Engineering Conference in Seattle, Lexar announced that they are developing a secure USB Flash Drive. It will allow for protection against unwanted use of or access to the flash drive, by only displaying the contents when it is put into an authorized computer.

<http://www.net-security.org/news.php?id=11262>

SONY BMG ROOTKIT SETTLEMENT FINALIZED

A U.S. district court judge in New York signed off Monday on a proposed agreement to a class-action lawsuit filed against Sony BMG, which claimed that the company had surreptitiously installed, what amounted to, spyware on customers' computers.

<http://www.net-security.org/news.php?id=11263>

CYBERCRIME PROSECUTORS NEED GUIDANCE

Australian High Tech Crime Center director Kevin Zuccato is glad to admit there is a lot to learn in prosecuting cyber miscreants.

<http://www.net-security.org/news.php?id=11264>

NEW YAHOO MESSENGER WORM HIJACKS INTERNET EXPLORER

"People have to treat instant messaging as they have been taught to treat e-mail -- with suspicion -- and not open suspicious attachments," said Natalie Lambert, an analyst at Forrester Research. "We have to start applying what we have learned with e-mail to these other applications."

<http://www.net-security.org/news.php?id=11265>

HACKING WITH NAT FRIEDMAN

Want to see a really cool hack?

<http://www.net-security.org/news.php?id=11266>

SECURITY VS. PRIVACY: THE REMATCH

This month USA Today reported that the National Security Agency has been compiling and searching a massive database of Americans' telephone call records and data mining it for suspicious patterns. NPR reported that this activity was part of the same eavesdropping program The New York Times revealed in April.

<http://www.net-security.org/news.php?id=11267>

MSN PHISHER GETS 21 MONTHS BEHIND BARS

Do not pass go, but do pay \$57,000 to Microsoft.

<http://www.net-security.org/news.php?id=11268>

THE IMPORTANCE OF SECURITY TRAINING

Security training is at the heart of writing good code, writes CIO

Update guest columnist John Heimann of Oracle.

<http://www.net-security.org/news.php?id=11269>

UNDERSTANDING TECHNICAL VS. LOGICAL VULNERABILITIES

Only about half of the vulnerabilities (technical vulnerabilities) in

web applications can be scanned for. The other half (logical

vulnerabilities) must be tested for by an experienced expert.

WhiteHat Security founder and CTO, Jeremiah Grossman, explains differences between the two issues and the fundamentals reasons why technology alone cannot solve the problem.

<http://www.net-security.org/news.php?id=11270>

MS ADVISES USERS TO PLAY SAFE WITH WORD

Attacks targeting an unpatched vulnerability in Microsoft Word 2002

and 2003 have prompted Microsoft to tell users they should run the application in "safe mode".

<http://www.net-security.org/news.php?id=11271>

HSBC STEPS UP FIGHT AGAINST FRAUDSTERS

Speed is crucial in battle against rising crime and bad debt.

<http://www.net-security.org/news.php?id=11272>

565 ARRESTED IN GLOBAL FRAUD SCHEMES

In the Nigerian scam, criminals send junk e-mail to thousands of

unsuspecting people offering them a share in a large fortune in

exchange for a smaller amount of money up front. The con artist takes the money and then disappears.

<http://www.net-security.org/news.php?id=11273>

BOTNET FLOODS UK FIRMS WITH 250 MILLION SPAMS

More than 150,000 spambots responsible for deluge.

<http://www.net-security.org/news.php?id=11274>

DOORSTOP X SECURITY SUITE FOR MAC OS X

Firewall add-on makes securing your Mac easy.

<http://www.net-security.org/news.php?id=11275>

SKYPE BUG LETS 'BUDDIES' SWIPE FILES

Skype has warned of a flaw in its popular VoIP client software that creates a means for hackers to swipe files from their "buddies".

<http://www.net-security.org/news.php?id=11276>

TWO TEENS CHARGED WITH MYSPACE.COM EXTORTION

Two New York teenagers were in police custody Wednesday facing illegal computer access and attempted extortion charges after they allegedly threatened to shake down the popular Web site MySpace.com unless its operators paid them \$150,000, prosecutors said.

<http://www.net-security.org/news.php?id=11277>

CA DOES FREE ANTIVIRUS FOR VISTA TESTERS

The free subscription gives Vista beta users access to daily virus updates and Web-based technical support in a bid to entice new customers.

<http://www.net-security.org/news.php?id=11278>

CARDERS SCAM SPAMMERS

Fraudsters who deal in stolen credit card data have devised a means to extract money from sponsors of junk mail campaigns.

<http://www.net-security.org/news.php?id=11279>

AT&T PROTEST PHOTOS

About 25 protesters gathered Wednesday outside AT&T's Folsom Street switching center in San Francisco to decry the company's alleged participation in an illegal National Security Agency internet surveillance program. A former company technician has asserted that AT&T maintains a secret wiretapping room on the sixth floor of the building.

MICROSOFT BRINGS DISK ENCRYPTION TO SERVERS

Software vendor to extend Bitlocker technology to Longhorn Server.

<http://www.net-security.org/news.php?id=11281>

MORE ADVENTURES IN KERNEL SECURITY

My kernel module of choice for this exercise was grsecurity.

<http://www.net-security.org/news.php?id=11282>

EXPERTS OFFER ADVICE TO PREVENT ID THEFT

"You need an ongoing vigilance," says Paul Stephens, a policy analyst with the Privacy Rights Clearinghouse in San Diego. "We want people to be proactive, to be vigilant, but we also don't want to have people panicking."

<http://www.net-security.org/news.php?id=11283>

COMMUNITY CREATORS, SECURE YOUR CODE! PART II

How does an attacker actually exploit the weaknesses found?

<http://www.net-security.org/news.php?id=11284>

ORACLE'S SECURITY CHIEF LAMBASTES FAULTY CODING

Davidson has strong words for 'naive' developers.

<http://www.net-security.org/news.php?id=11285>

TAKING STEPS TO PROTECT CUSTOMER DATA

With so much attention paid to malicious attacks by hackers, worms and viruses, it's a common misconception that outside forces pose the greatest danger to a company's data. The reality, however, is that internal elements are far more dangerous when it comes to data security than anything on the outside, including natural disasters.

<http://www.net-security.org/news.php?id=11286>

IS YOUR PHONE COMPANY SPYING ON YOU?

Is your telephone company engaging in spy activity? More specifically, spy activity on you?

<http://www.net-security.org/news.php?id=11287>

PHISHING PUSHES E-CRIME FURTHER UPSTREAM

Casting an attack to millions of users can be done for as little as \$300, scientist at VeriSign says.

<http://www.net-security.org/news.php?id=11288>

HOST-BASED INTRUSION PREVENTION MAY BE LAST BEST DEFENSE

Network- and server-based intrusion prevention may still be necessary, but companies are moving IPS down to the desktop level for better protection.

<http://www.net-security.org/news.php?id=11289>

E-COMMERCE IN CRISIS: WHEN SSL ISN'T SAFE

"It's not a problem of authentication but one of transactional authorization," says Bruce Schneier, leading security expert and CTO of Counterpane Internet Security. "No matter how hard you make the initial authentication for the end-user or hacker, the malware can just wait until the authentication is done and then manipulate the transaction."
