

HNS Newsletter
Issue 322 - 03.07.2006.
<http://net-security.org>

This is a newsletter delivered to you by Help Net Security. It covers weekly roundups of security events that were in the news the past week.

The Gartner IT Security Summit - 18 & 19 September, London

Real Solutions - Proven and Promising Practices for Information Security

IT Security is a high-stakes balancing act performed in gale-force winds. Threats from inside and outside the enterprise multiply while new business initiatives open up new fronts to secure and gateways to police.

Gartner's IT Security Summit 2006 gives you a clear, realistic view of the current and emerging threat landscape along with the best security processes and technologies to find your way through it.

[Security news]

CREATING A SAFE DIRECTORY WITH PAM AND ENCFS

This HowTo is about creating a user-session-safe directory which offers security on- and offline.

<http://www.net-security.org/news.php?id=11543>

SAILORS' DATA POSTED ON THE WEB

The Navy has begun a criminal investigation after Social Security numbers and other personal data for 28,000 sailors and family members were found on a civilian website.

<http://www.net-security.org/news.php?id=11544>

MICROSOFT: BAKING SECURITY IN

A Microsoft security expert explains how the company has improved its development process.

<http://www.net-security.org/news.php?id=11545>

SYMANTEC TO EXIT SECURITY APPLIANCE BUSINESS

About 80 staff were laid off as SGS and SNS appliances were said to be discontinued.

<http://www.net-security.org/news.php?id=11546>

FREENODE HAS BEEN HIJACKED

The world's largest FOSS IRC network, FreeNode, has been (for lack of a better word) hijacked.

<http://www.net-security.org/news.php?id=11547>

WATERGATE ECHOES IN NSA COURTROOM

It was perhaps inevitable that someone would compare President Bush's extrajudicial wiretapping operations to Richard Nixon's 1970s-era surveillance of journalists and political enemies. Both were carried out by Republican presidents; both bypassed the courts; both relied on the cooperation of U.S. telecommunications companies.

<http://www.net-security.org/news.php?id=11548>

TORRENTSPY NAMES ALLEGED MPAA ATTACKER

TorrentSpy named the attacker who it claims broke into its computer systems on behalf of the Motion Picture Association of America (MPAA), as part of a legal request that would force the MPAA to turn over documents stolen from the Internet file-searching company.

<http://www.net-security.org/news.php?id=11549>

IT EXPERT: I WORKED WITH 7/7 BOMBERS AND WARNED POLICE

A computer expert who worked alongside two of the July 7 bombers claims today that he tried to warn the police about their activities almost two years before the suicide attacks.

<http://www.net-security.org/news.php?id=11550>

BUSINESS LEADERS: US NOT PREPARED FOR INTERNET OUTAGE

The US is unprepared to deal with a major cyber emergency. That's the conclusion of a new report from the Business Roundtable, a group of 160 CEOs from the nation's largest companies.

<http://www.net-security.org/news.php?id=11551>

IDENTITY THIEVES LURKING IN P2P

Medical records, financial information and router passwords have all popped up on P2P networks, researchers say.

<http://www.net-security.org/news.php?id=11552>

SETTING TECHNICAL CRITERIA FOR OUTBOUND CONTENT MONITORING

'Exfiltration' reports must stand up to legal scrutiny.

<http://www.net-security.org/news.php?id=11553>

UTILITY DISABLES MICROSOFT'S ANTI-PIRACY APP

Firewall Leak Tester, which specializes in firewall stress tests, released RemoveWGA, a program that deletes the Windows Genuine Advantage Notification Tool.

<http://www.net-security.org/news.php?id=11554>

17 MISTAKES MICROSOFT MADE IN THE XBOX SECURITY SYSTEM

This article is about how easy it is to make terrible mistakes and how easily people seem to overestimate their skills. So this article is also about how to avoid the most common mistakes.

<http://www.net-security.org/news.php?id=11555>

STRIKING THE BALANCE BETWEEN STORAGE SECURITY AND AVAILABILITY

Any good strategy for data storage protection includes a strategic balance between information availability and information security. IT managers today are tasked with maintaining this balance at a reasonable cost. It's easy to make information completely secure—by locking it up in a safe, for example—but the trick is to also ensure that it is available when needed. However, by providing information access, there are always risks.

<http://www.net-security.org/news.php?id=11556>

DESIGNING HIGH-AVAILABILITY WINDOWS SYSTEMS

Rick Cook explains the major options for designing a system with an appropriate amount of uptime.

<http://www.net-security.org/news.php?id=11557>

GOV'T BREAK A LAW? CHANGE IT

The White House is nearing an agreement with Congress on legislation that would write President Bush's warrantless surveillance program into law, the Senate Judiciary Committee chairman said Sunday.

<http://www.net-security.org/news.php?id=11558>

IT DIRECTORS FEAR THE SACK OVER EMAIL SECURITY

More than a third of IT directors fear losing their jobs if confidential information sent by email is leaked or accidentally read by someone other than the intended recipient, according to a report issued today.

<http://www.net-security.org/news.php?id=11559>

LINUX HACKERS RE-CLAIM THE LINKSYS WRT54G

As predicted, the open source community has come up with a way to convert VxWorks-based LinkSys wireless WRT54G routers to Linux. The process does not require hardware hacking, and installs a recent version of "DD-WRT micro."

<http://www.net-security.org/news.php?id=11560>

YOU CAN NEVER BE TOO SECURE

When I think about our security strategy, I have to ask myself if we've done enough. Have we covered all the bases? If we haven't, do we have a work-around or some other risk-mitigation plan in place?

<http://www.net-security.org/news.php?id=11561>

USB DRIVES POSE INSIDER THREAT

In a recent test of a credit union's network security, consultants working for New York-based security audit firm Secure Network Technologies scattered 20 USB flash drives around the financial group's building.

<http://www.net-security.org/news.php?id=11562>

LIST OF DATA BREACHES GROWS

The dizzying pace of security breach notifications shows no signs of abating, with companies such as American International Group Inc. and ING U.S. Financial Services adding themselves to the list of businesses disclosing data compromises.

<http://www.net-security.org/news.php?id=11563>

NHS SLAMMED FOR IGNORING MOBILE DATA SECURITY

The National Health Service is failing to provide adequate security for potentially sensitive data held on mobile storage devices, research claimed today.

<http://www.net-security.org/news.php?id=11564>

MICROSOFT'S REAL TEST WITH VISTA IS VULNERABILITIES

Vista, the solution to all our problems: Microsoft portrays Vista as anything from the end of software vulnerabilities to the end of spyware.

<http://www.net-security.org/news.php?id=11565>

WHAT TO DO IF A SECURITY FLAW IS REPORTED

You've worked hard and long for months to get the software out the door. You think you've covered all the bases -- it performs well and it's completely secure. There is absolutely no way it can be hacked.

<http://www.net-security.org/news.php?id=11566>

NOKIA JOINT VENTURE TO SECURE ELECTRONIC PAYMENTS

Nokia teams with smart card vendor to secure payments that use short-range wireless technology.

<http://www.net-security.org/news.php?id=11567>

SQL INJECTION WEAKNESSES FOUND IN MAMBO, JOOMLA

Potentially serious security flaws have been found in existing versions of the Mambo and Joomla content management systems, and developers of the two projects are advising users to install upgrades or security patches as soon as possible.

<http://www.net-security.org/news.php?id=11568>

WHEN ACCESS MANAGEMENT BECOMES ROCKET SCIENCE

NASA's challenges are hardly limited to launching rockets and getting men to Mars.

<http://www.net-security.org/news.php?id=11569>

THREE HELD OVER COMPUTER VIRUS SPAM

Police in Britain and Finland have arrested three men suspected of conspiring to spread computer viruses through spamming, Metropolitan Police said.

<http://www.net-security.org/news.php?id=11570>

DATA SECURITY GRABS ATTENTION OF LAWMAKERS

An increase in data security breaches is prompting the creation of new laws.

<http://www.net-security.org/news.php?id=11571>

REMOTE AUTHENTICATION: FOUR TIPS FOR IMPROVING SECURITY

Remote users are a problem for a lot of us whose jobs are to keep our networks secure.

<http://www.net-security.org/news.php?id=11572>

PASSWORD-PROTECTED BULLETS

Safety catches do not always prevent firearm accidents and even newfangled biometric guns, which check the identity of a user by their fingerprint, cannot stop thieves from using stolen ammunition in other weapons.

<http://www.net-security.org/news.php?id=11573>

CONCERNS ARISE OVER VOTER DATABASE SECURITY

File this in the "seemed like a good idea at the time" drawer. The

Help America Vote Act (HAVA) was passed in 2002, partially in response to the controversy surrounding the 2000 presidential election.

<http://www.net-security.org/news.php?id=11574>

WINDOWS GENUINE PROGRAM REVISED FOLLOWING UPROAR

Microsoft has bowed to public pressure, releasing a version of WGA that no longer validates Windows using a server-side configuration.

<http://www.net-security.org/news.php?id=11575>

SECURITY NEEDS VARY FOR EACH INDUSTRY VERTICAL

IT managers cannot ignore secure content management (SCM), but needs vary greatly for each industry vertical, according a new report from research firm IDC.

<http://www.net-security.org/news.php?id=11576>

MYSPACE CASE OPENS SECURITY CAN OF WORMS

A fourteen-year old girl is suing MySpace for £30m after she was allegedly assaulted by a man she met on the popular teen hangout site.

<http://www.net-security.org/news.php?id=11577>

SECURITY SOFTWARE SLAPS IE IN "SANDBOX"

GreenBorder Pro uses virtualisation-like technologies to separate IE from the rest of the system, so that if malicious software does execute, it doesn't actually touch the computer.

<http://www.net-security.org/news.php?id=11578>

AJAX SECURITY BASICS

Though Ajax applications can be more difficult to test, security professionals already have most of relevant approaches and tools needed.

<http://www.net-security.org/news.php?id=11579>

STUDIES QUESTION E-VOTING SECURITY

A series of new reports have again raised questions about the security of electronic voting machines, with one report identifying multiple vulnerabilities.

<http://www.net-security.org/news.php?id=11580>

THE TEN MOST CRITICAL WIRELESS AND MOBILE SECURITY VULNERABILITIES

Inspired by the SANS Top 20, this list is a consensus of industry experts on wireless and mobile vulnerabilities that require immediate remediation. It is offered as a public service by the Mobile Antivirus Researcher's Association.

<http://www.net-security.org/news.php?id=11581>

IE BLIGHTED BY FLAW DUO

A brace of new Internet Explorer vulnerabilities have been disclosed on a security mailing list.

<http://www.net-security.org/news.php?id=11582>

VIRGIN FRANCE FINED OVER PIRACY

French music retailer Virgin France has been fined 600,000 euros (\$754,266; £414,147) for music piracy.

<http://www.net-security.org/news.php?id=11583>

APPLE FIXES VULNERABILITIES IN OS X UPDATE

The vulnerabilities allow attackers to launch a denial-of-service attack, view the names of files and folders in search results, or execute code with elevated privileges.

<http://www.net-security.org/news.php?id=11584>

U.S. GOV'T MANDATES LAPTOP SECURITY

The Bush Administration is giving federal civilian agencies just 45 days to comply with new recommendations for laptop encryption and two-factor authentication.

<http://www.net-security.org/news.php?id=11585>

SECURITY FLAW FOUND IN NOKIA PC SUITE

ActiveX error could compromise users' PCs.

<http://www.net-security.org/news.php?id=11586>

SAY HELLO TO VOICE PHISHING

Hi-tech fraudsters have begun using recorded telephone messages in a bid to trick users into handing over confidential account information.

<http://www.net-security.org/news.php?id=11587>

MICROSOFT MAKES ANTI-PIRACY TOOL LESS INTRUSIVE

The company upgraded its Windows Genuine Advantage tool to communicate less with Microsoft and changed its end-user license agreement to make it more clear what the tool does.

<http://www.net-security.org/news.php?id=11588>

RESEARCHER PUBLISHES DETAILS OF AMAZON.COM, MSN HOLES

Frustrated with what he calls a lack of response from Microsoft and Amazon.com, a security researcher has gone public with details of flaws on the two companies' Web sites.

<http://www.net-security.org/news.php?id=11589>

DRAFT STANDARDS RELEASED FOR SMARTCARD ROLLOUT

Draft standards and an interoperability framework for all public sector agencies has been released in preparation for the federal government's billion dollar smartcard rollout.

<http://www.net-security.org/news.php?id=11590>

CHECKLIST -PATCHING WINDOWS SERVERS

Patching a server is fundamentally different from patching a workstation, both in terms of the scope of the patches and the process involved.

<http://www.net-security.org/news.php?id=11591>

DATA BROKERS AND BUYERS ANGER CONGRESS

Almost every piece of personal information that Americans try to keep secret - including bank account statements, e-mail messages and telephone records - is semi-public and available for sale.

<http://www.net-security.org/news.php?id=11592>

MICROSOFT PATCHES SECURITY PATCH

Original fix nobbled Windows.

<http://www.net-security.org/news.php?id=11593>

TWO MEN SENTENCED TO PRISON ON PIRACY CHARGES

Men receive 12- and 18-month prison terms for online software piracy.

<http://www.net-security.org/news.php?id=11594>

ONLINE SCAMS: TOP 5 BEST OF THE WORST

According to recent studies, there is a trend of more targeted, monetarily driven malware attacks.

<http://www.net-security.org/news.php?id=11595>

IT CENTRALIZATION AT VA KEY TO SECURITY

'Cultural impediments' have slowed past efforts to change.

<http://www.net-security.org/news.php?id=11596>

SPAMMERS USING IMAGES TO FOOL FILTERS

Earlier this year, tools began circulating among spammers to automatically vary images ever so slightly -- a change in color here, a slightly larger border there. That changes the signature, helping it escape detection.

<http://www.net-security.org/news.php?id=11598>

EMPLOYEES MORE HONEST WITH BIG BROTHER WATCHING

"I was really surprised by how big the effect was, as we were expecting it to be quite subtle," said Melissa Bateson, a behavioral science researcher based at Newcastle University who led the study. "But the statistics show that the eyes had a strong effect on our tea and coffee drinkers."

<http://www.net-security.org/news.php?id=11597>

FBI RECOVERS STOLEN VA LAPTOP

"The worst-case scenario may have been averted this time, but an even greater tragedy would be if this type incident was allowed to happen again because of complacency in the workplace," said Joe Davis, a spokesperson for the Veterans of Foreign Wars.

<http://www.net-security.org/news.php?id=11599>

EMC TO ACQUIRE RSA SECURITY FOR ALMOST US\$2.1 BILLION

In a deal that marries one of the IT industry's biggest data storage vendors and one of its best-known security companies, EMC Thursday unveiled plans to acquire RSA Security.

The Gartner IT Security Summit - 18 & 19 September, London

Real Solutions - Proven and Promising Practices for Information Security

IT Security is a high-stakes balancing act performed in gale-force winds. Threats from inside and outside the enterprise multiply while new business initiatives open up new fronts to secure and gateways to police.

Gartner's IT Security Summit 2006 gives you a clear, realistic view of the current and emerging threat landscape along with the best security processes and technologies to find your way through it.
