[Security news]

BRUCE SCHNEIER ON PRIVACY AND PROPERTY IN THE INFORMATION STATE

Wired columnist and BT chief security technology officer, Bruce Schneier, who started out as a cryptologist and has since expanded his portfolio to all things security, is the TSA's worst nightmare.
<http://www.net-security.org/news.php?id=16304>

CLOSED SOURCE CONSPIRACY

Many people in the industry have an innate fear of closed source (AKA proprietary software), which especially applies to everything crypto-related.
<http://www.net-security.org/news.php?id=16305>

FASTFLUX MAKES FOR SOME COOL GRAPHS

Data visualization is incredibly useful in not only tracking down anomalous behavior on a network but also for displaying metrics and data to the non technical folks.
<http://www.net-security.org/news.php?id=16306>

SERIOUS SECURITY ALERT FOR MONSTER.COM AND USAJOBS.GOV USERS

Sophos is advising all users of careers website Monster.com and USAJobs.gov, the official job site of the US Federal Government, to change their passwords following news that both sites have been the victim of a serious hacking attack which has compromised both usernames and passwords.
<http://www.net-security.org/news.php?id=16307>

WHITEPAPER - SOLVING THE PASSWORD MANAGEMENT PARADOX
Discover how to solve the need for security without burdening the worker with oppressive requirements.
<http://www.net-security.org/news.php?id=16309>

BOOK REVIEW - IS IT SAFE? PROTECTING YOUR COMPUTER, YOUR BUSINESS, AND YOURSELF ONLINE
With the evolving world of the Internet, malicious activities are elevating rapidly. Majority of the attacks are targeting novice users, those who are not educated about the basic online security principles. Miller's "Is It Safe?" comes to the rescue as a perfect reading material for any computer user who wants to take online safety in his own hands.
<http://www.net-security.org/news.php?id=16308>

CODE REVIEW OR WAFS? PCI 6.6
Compliance with requirement 6.6 of the PCI DSS cites the use of either a web application firewall (WAF) or code review. It's far more effective to combine both.
<http://www.net-security.org/news.php?id=16310>

BEWARE OF FACEBOOK 'FRIENDS' WHO MAY TRASH YOUR LAPTOP
The message that popped into Laurie Gale's Facebook inbox last month seemed harmless enough -- a friend had seen a video of Ms. Gale and had sent a link so Ms. Gale could view it. The link led to a video site that prompted her to update her video software, which she did.
<http://www.net-security.org/news.php?id=16313>

WHAT THE HEARTLAND DATA BREACH TELLS US
The recent data breach at Heartland Payment Systems should make one thing clear: the standards for security around credit card numbers still aren't good enough. New technologies are needed to ensure that credit card numbers and other forms of sensitive information can be protected well enough. It's probably the case an entirely approach to information security is also needed.
<http://www.net-security.org/news.php?id=16311>

IPHONE SECURITY SOFTWARE REVIEW - DATA GUARDIAN
Data Guardian is a security utility that allows you to hold all your private information inside a locked database.
